In my early years of practicing Medical Astrology, I experienced a lack of ability to understand the fluctuations of health due to utilizing transits as my primary technique for timing. Transits are now the final indicator for me to understand when something will take place after multiple layers of considerations. In this class we will discuss how to use a condensed version of annual profections and Solar returns in Medical Astrology.

Just in reflection

- NO Medical Astrology practice has been standardized
- Emphasize being a practitioner 1st and an astrologer 2nd in the beginning of my practice
- HOW to think, not what to think
- Focus on understanding the current time & health

Consulting the clients chart

- OWN your projections so they don't distract your practice and help you
grow
- Assuming that you “shouldn't” project onto a chart is a fool's game and is
intellectually dishonest
- ASK LOTS of questions
- **Get good intake so you can explore the chart more**
