FAA Conference January 2025  
Surfers Paradise, QLD, Australia

# Types of Astro Maps

- Sacred Maps - Fixed Local Zodiac Map - e.g Prague zodiac  
Cancer/Capricorn Solstice Points
- Geodetic - Fixed Zodiac - Zero Aries - Greenwich  
- 360° longitude MC GPS locations
- A\*C\*G - AstroCartoGraphy - exact time place rising stamp
- Planetary directions - from a central point  
Local Space - Planets placed on horizon, cities, houses, room  
Compass Astrology - Altitude Azimuth, Horizon

# AstroMapping

Different maps for different purposes. Using various Maps together

Natal/Birth Charts - places, connections in the world, people, work, travel, interests

Relocation - where to travel, live, work, invest? Use with Natal or relocated Charts

Solar Returns - Travel, work, family - The Year Ahead, - Local Space and Sacred Zodiac Maps : FengShui, houses, rooms etc

Transits, Progressions and Solar Arcs:

Use with Natal or relocated Charts (give different ASC and MC'S) CCG -CycloCartoGrapgy

Synastry Charts - where would we travel, purchase, invest

Rectification - tweak charts according to significant places for individual

Mundane astrology - hotspots in the world, Cardinal Sun ingresses, lunations, Ingresses, planetary stations

Horary questions - where to travel, find lost objects (local space), purchase, invest - Sacred Zodiac Maps

Oracles - Divination

Animating charts - teach us about planetary movements

Use :

Midpoints, Asteroids, Fixed Stars and other points,  
add Part of Fortune and Part of Spirit to relocated charts (now available with astro gold!!)

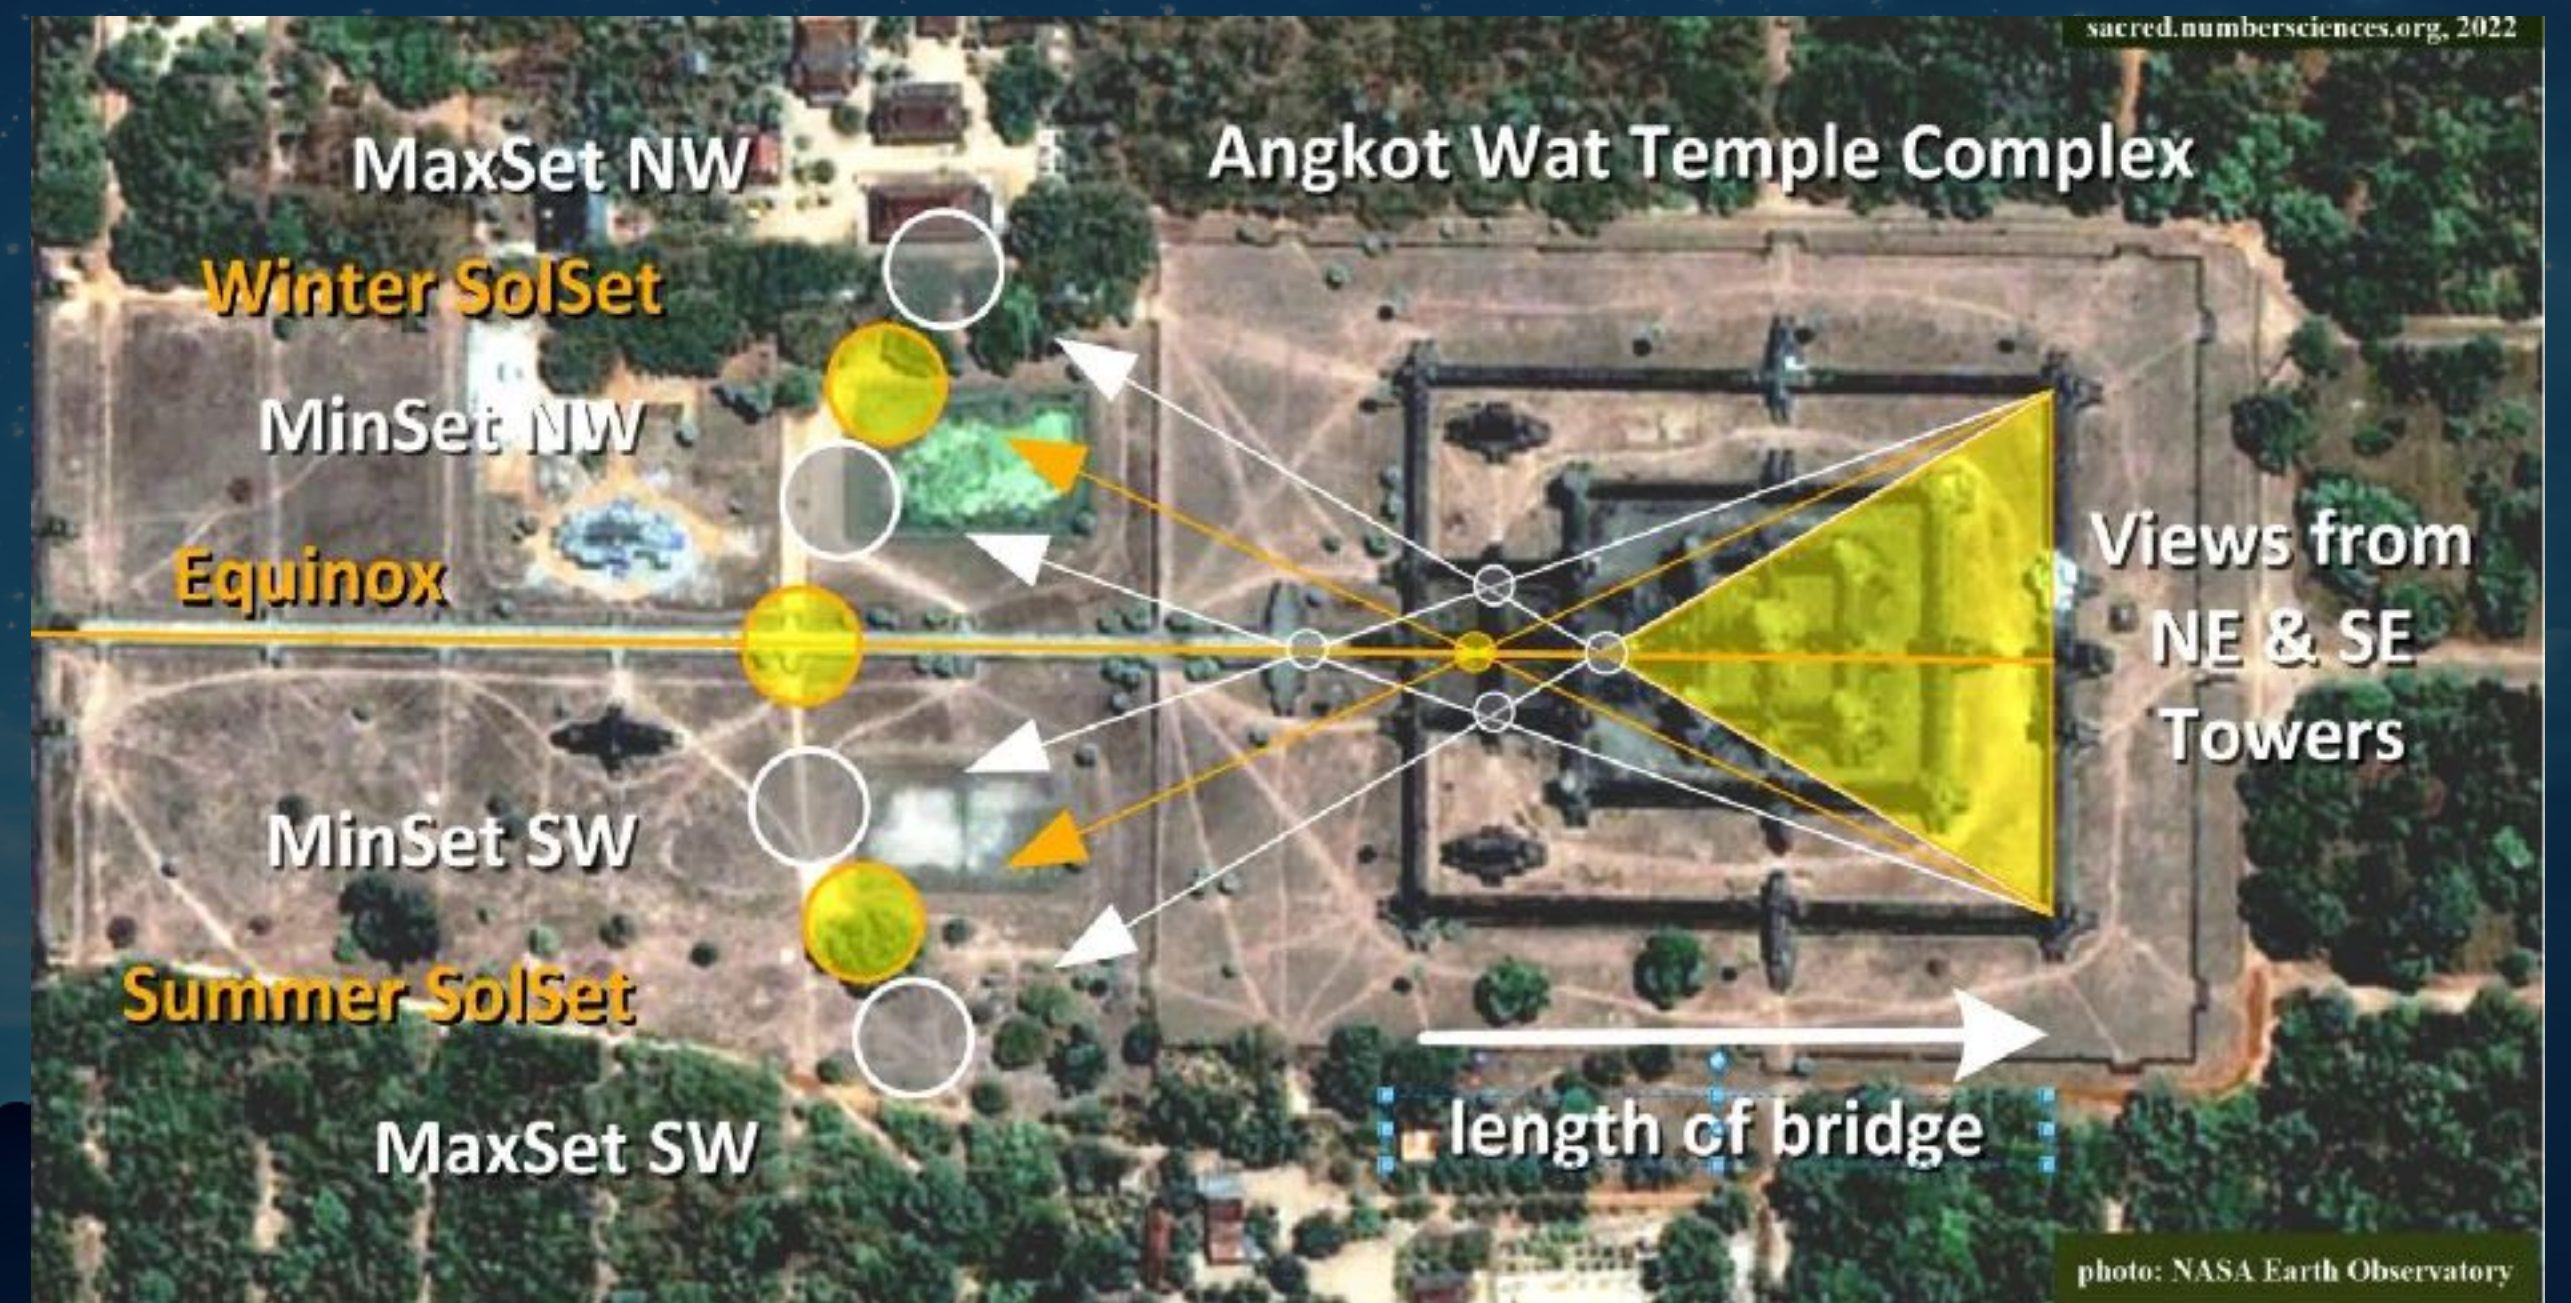

# From the beginning Indigenous Australia

- First navigation - using Sun and Stars
- Star Maps were highways  
Waypoints(memory)  
Songlines  
Easiest routes  
Remembering sequence  
Used to find waterholes, food, shelter,  
Meeting places, Festivals, Gatherings  
Maps held in songlines and stories
- How many of us could actually navigate by the Stars?

# Ancient Cultures

- The Sun - East/West
- Pagan tribes
  - aligned sacred places, worship sites, fires with Solstice Sun setting and rising points
- Ancient buildings aligned with Cardinal directions
  - North, South, East, West -
- Ancient buildings/temples aligned with Stars and Constellations, Sun Moon extremes Lunistice, Solstice even moved over time with precession (Malta)\*
- Stonehenge, Pyramids, Mayan Temples etc,

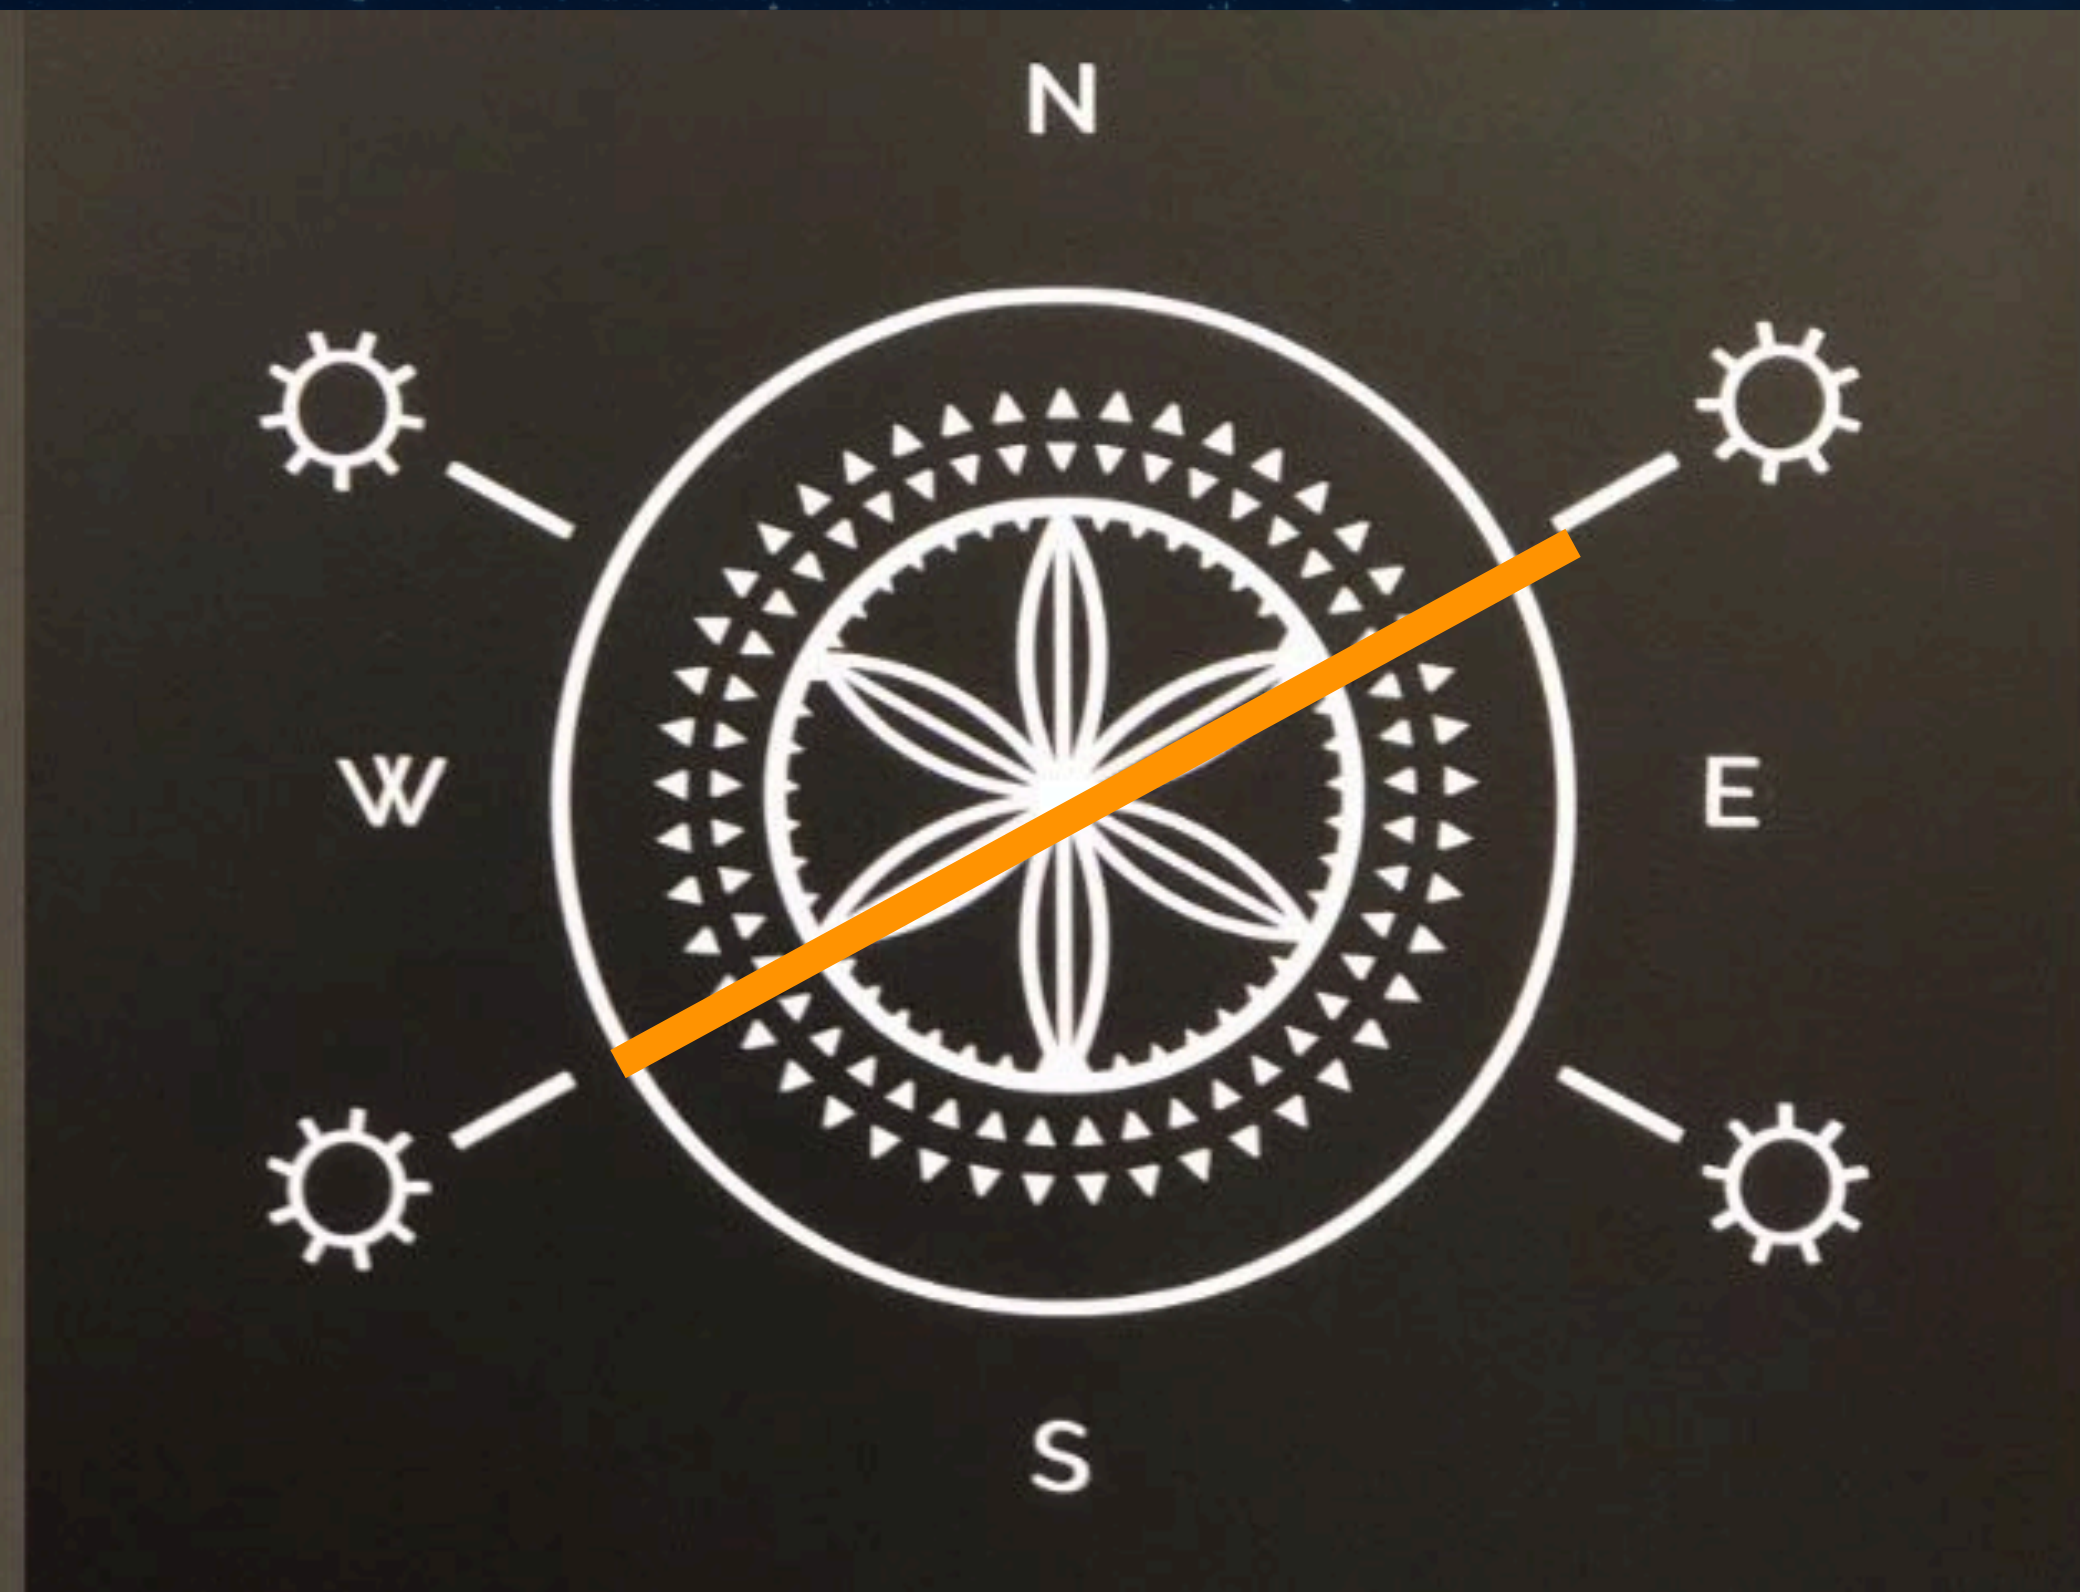

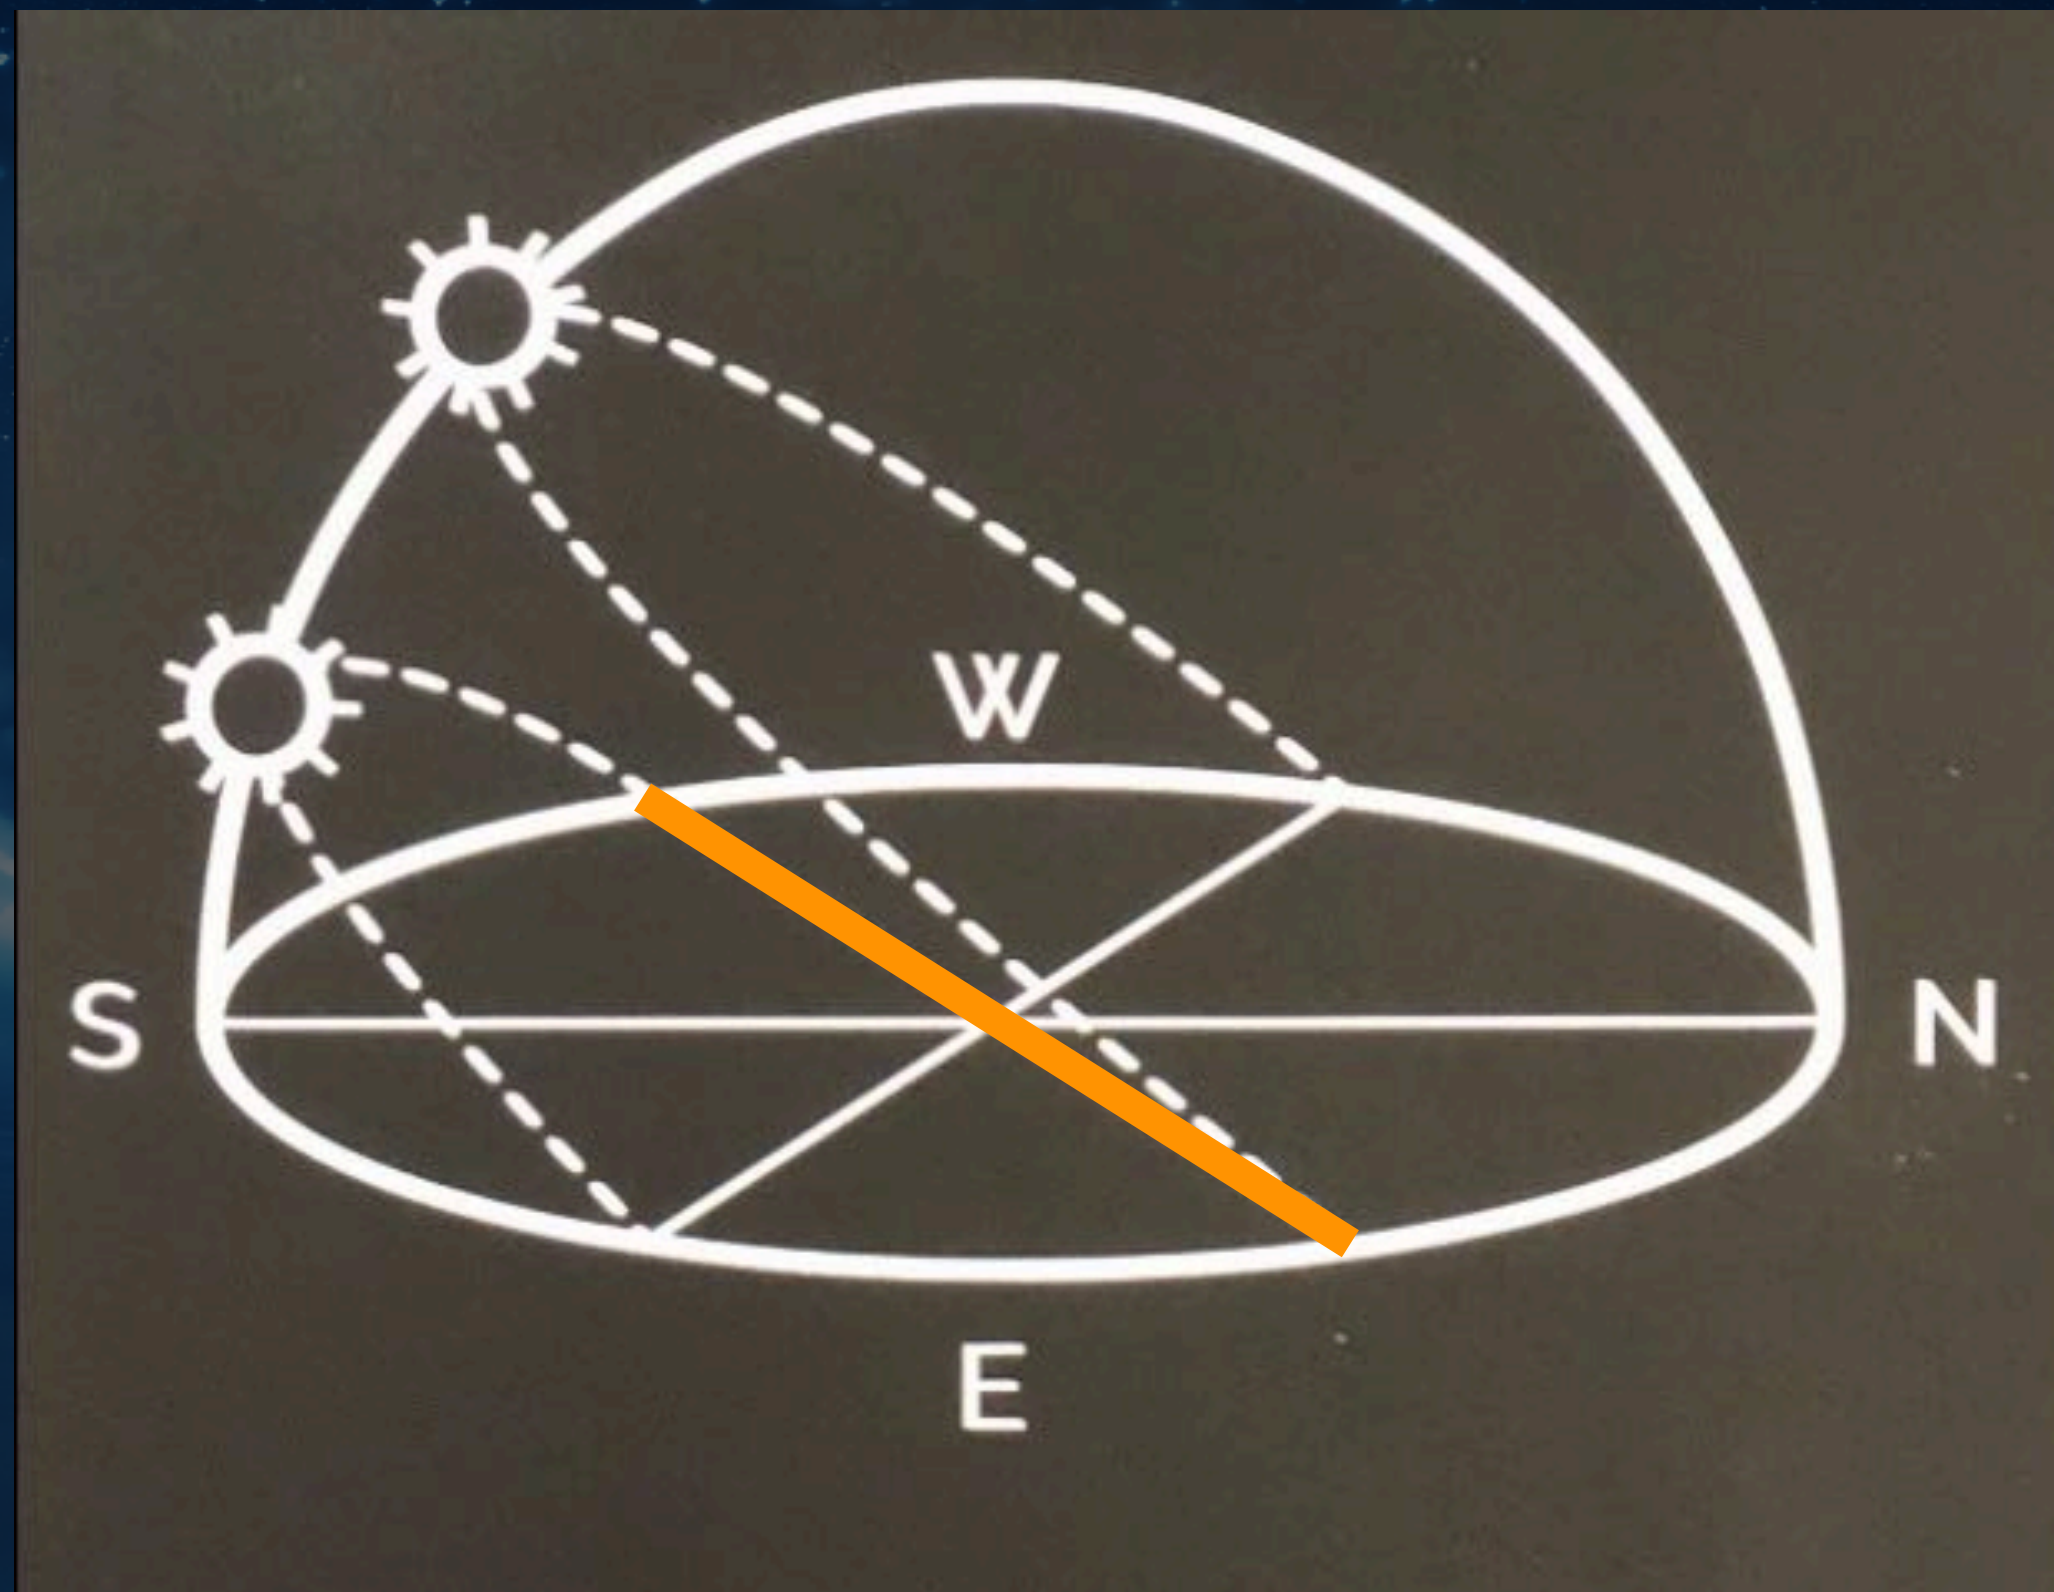

\*See Ancient Apocalypse Series Netflix — Graham Hancock

# Ancient alignments

Lithuanian Cosmology - Sun dial, Flower of Life

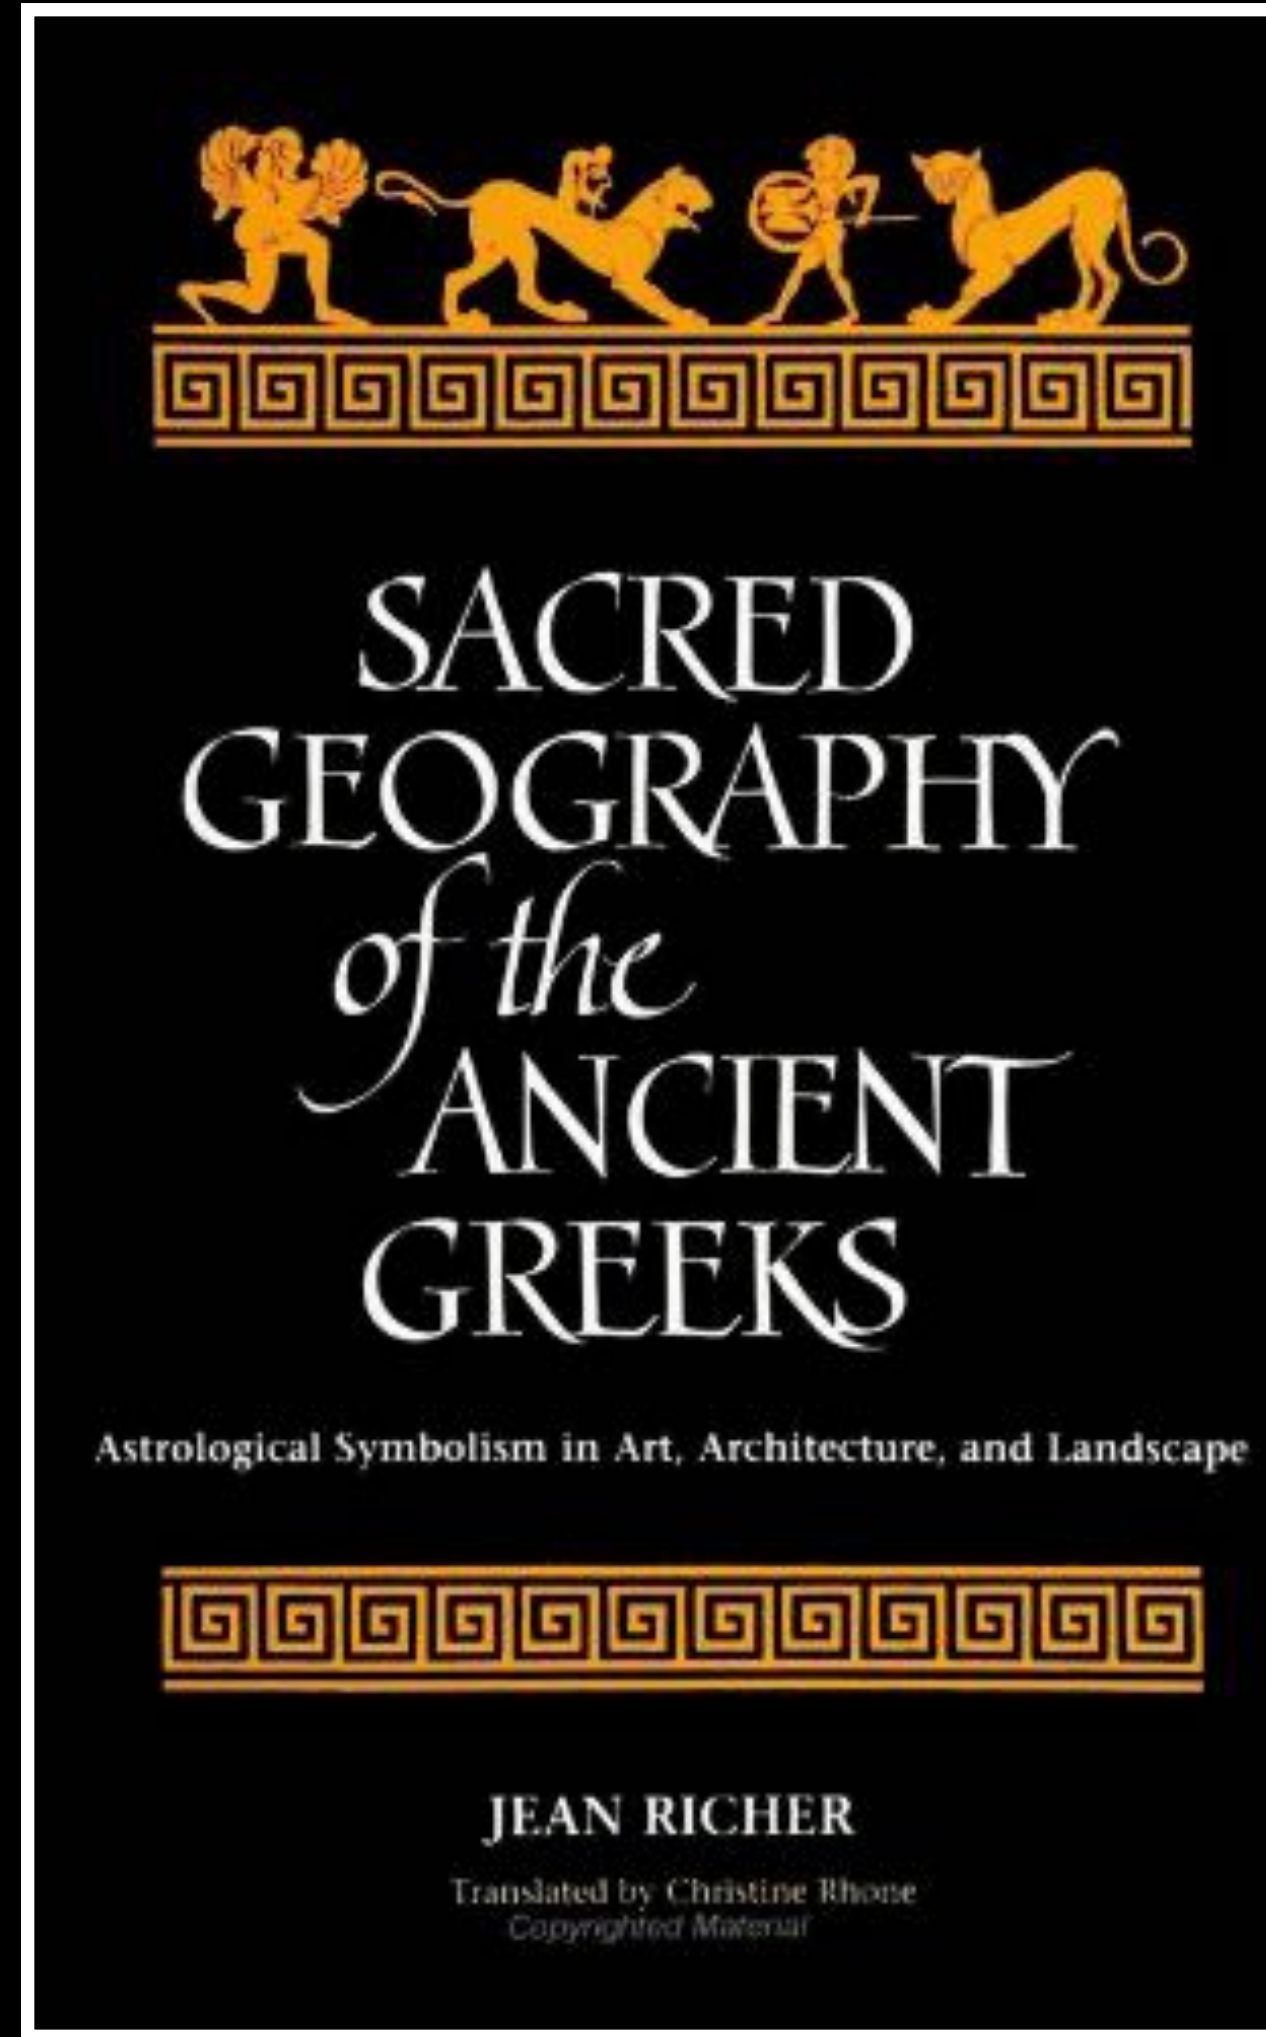

Motif - houses, textiles, tools, decoration

Sacred Aligments - Solstice Points  
Winter Sunrise- Summer Sunset

Astrology - Geography -  
Alignments of Place

Ancient Greece

Prague Zodiac  
Zodiac grid alignments with Solstice,  
Sunrise and Sunsets

# Ancient Greece

## SACRED GEOGRAPHY *of the* ANCIENT GREEKS

Astrological Symbolism in Art, Architecture, and Landscape

JEAN RICHER

Translated by Christine Rhone  
Copyrighted Material

Classical period Greece the Parthenon, on top of the Acropolis  
and most Temples in Greece aligned with East / West and Mutable Signs

Temples aligned across islands and mountains

Eg Apollo Temples : from Delos to Delphi

EAST - The Victory - Athena - Virgo  
WEST - The Battle - Poseidon - Pisces  
SOUTH - Horsemen, brothers in arms - Gemini  
NORTH - Intruders, wild centaurs - Sagittarius

Bagdad, Iraq  
Geocentric  
Lahiri  
Whole Sign

Chaldean order of Planets - Saturn, Jupiter, Mars, Venus, Mercury

Centre - Saturn, solid base,

East - Jupiter, protection, expansion

South - Mars, enemies/war/heat, conquer others (10th house)

West - Venus, friends. Enemies, (Libra) 7th House

North - Mercury, Trade, travel (travel to underworld death)

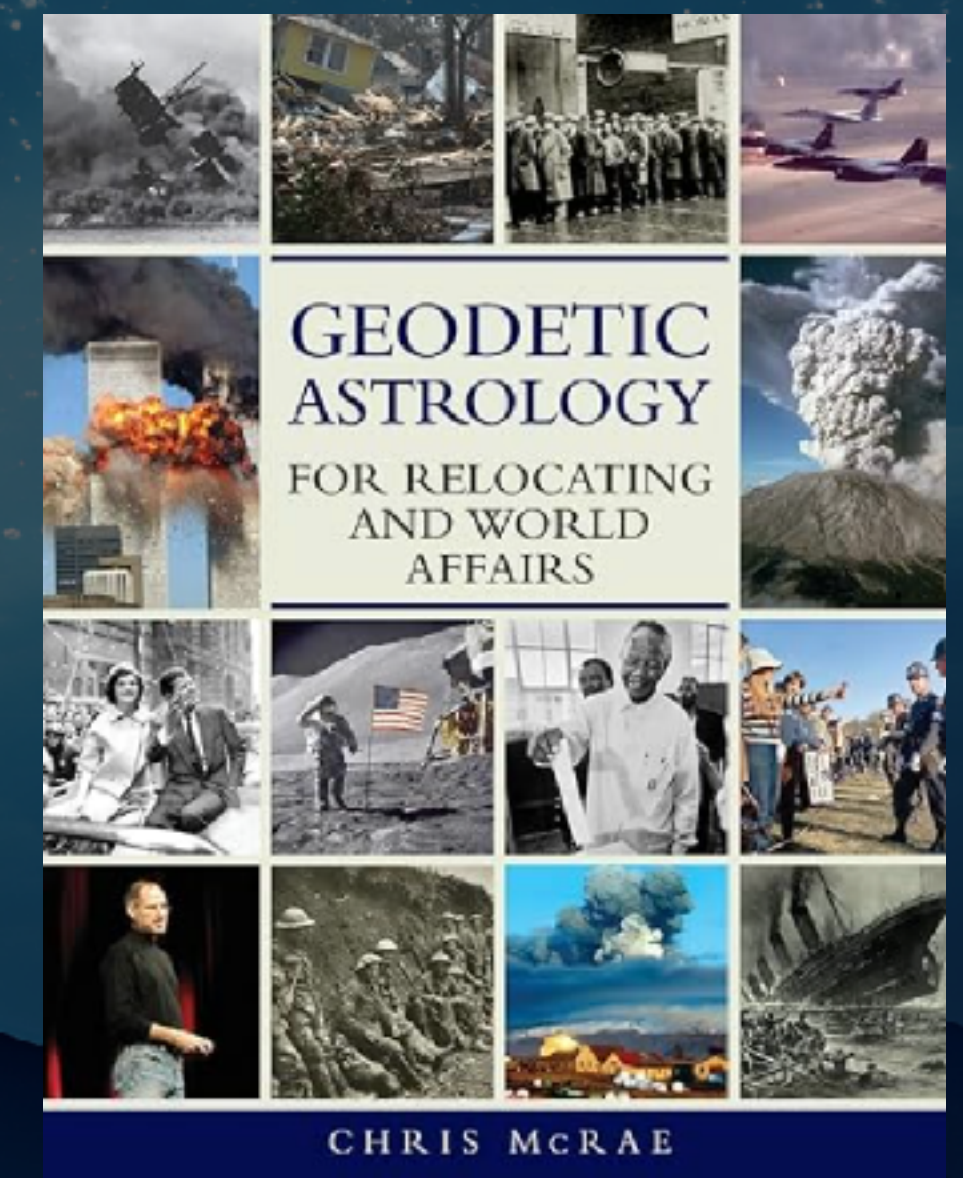

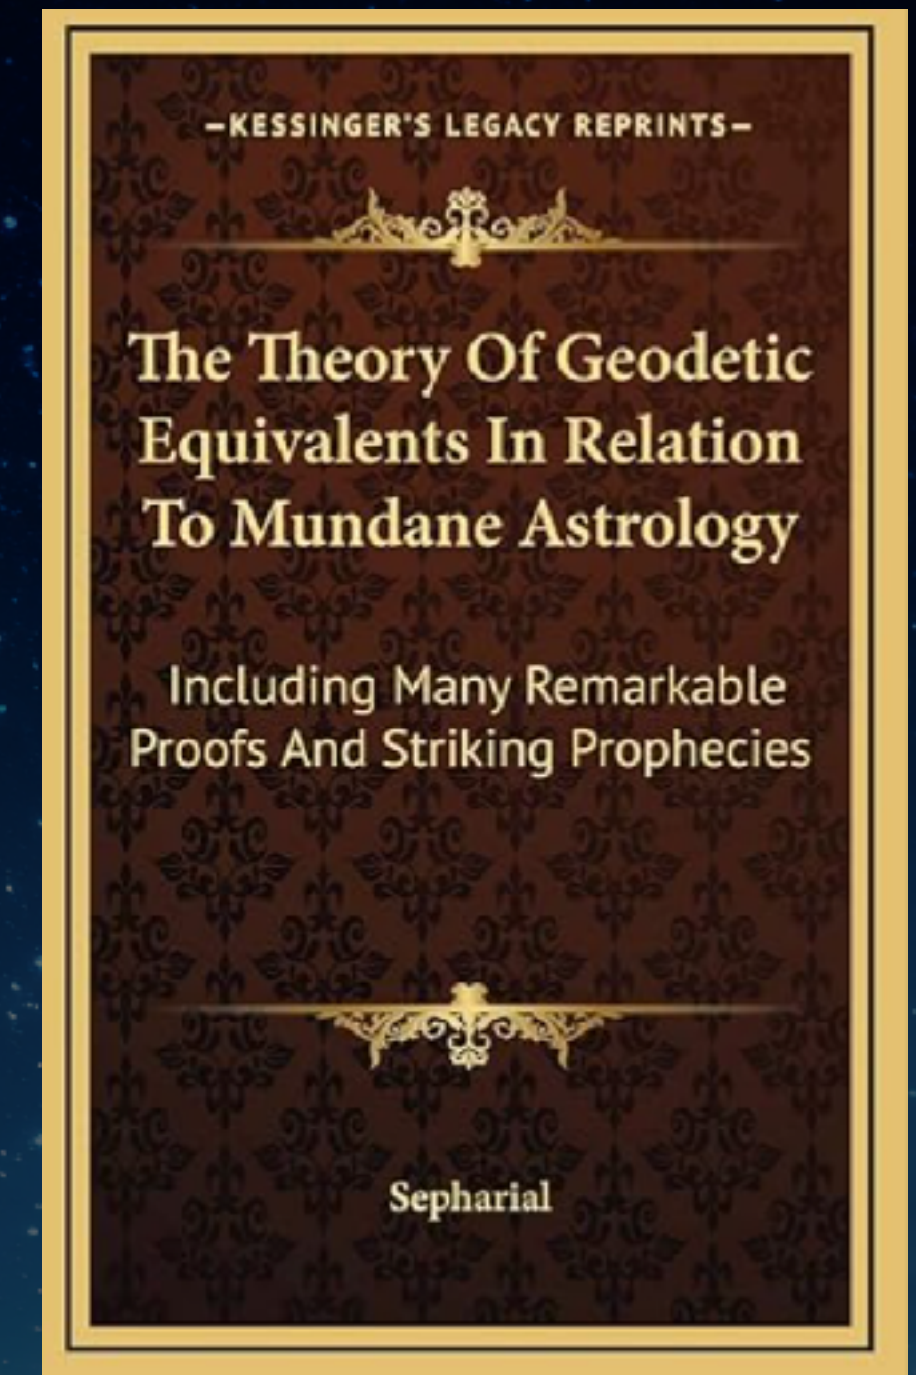

# Fixed Meridian

- Throughout history Astrolgers not always agreed where the Meridian should be

Other Astro developments on Geodetic astro mapping came through:

- Al-Biruni (11th century),
- William Lilly (17th century),
- Raphael (19th century),
- Green and Sepharial (20th century),
- Sepharial - "The Theory of Geodetic Equivalentents 1924"
- Johndro in 1930's
- Chris Mc Crae 2016  
Martin Davis
- Some used The Great Pyramids of Eygpt as Prime Meridian
- Why not use the International Date LINE?

# Mundane uses

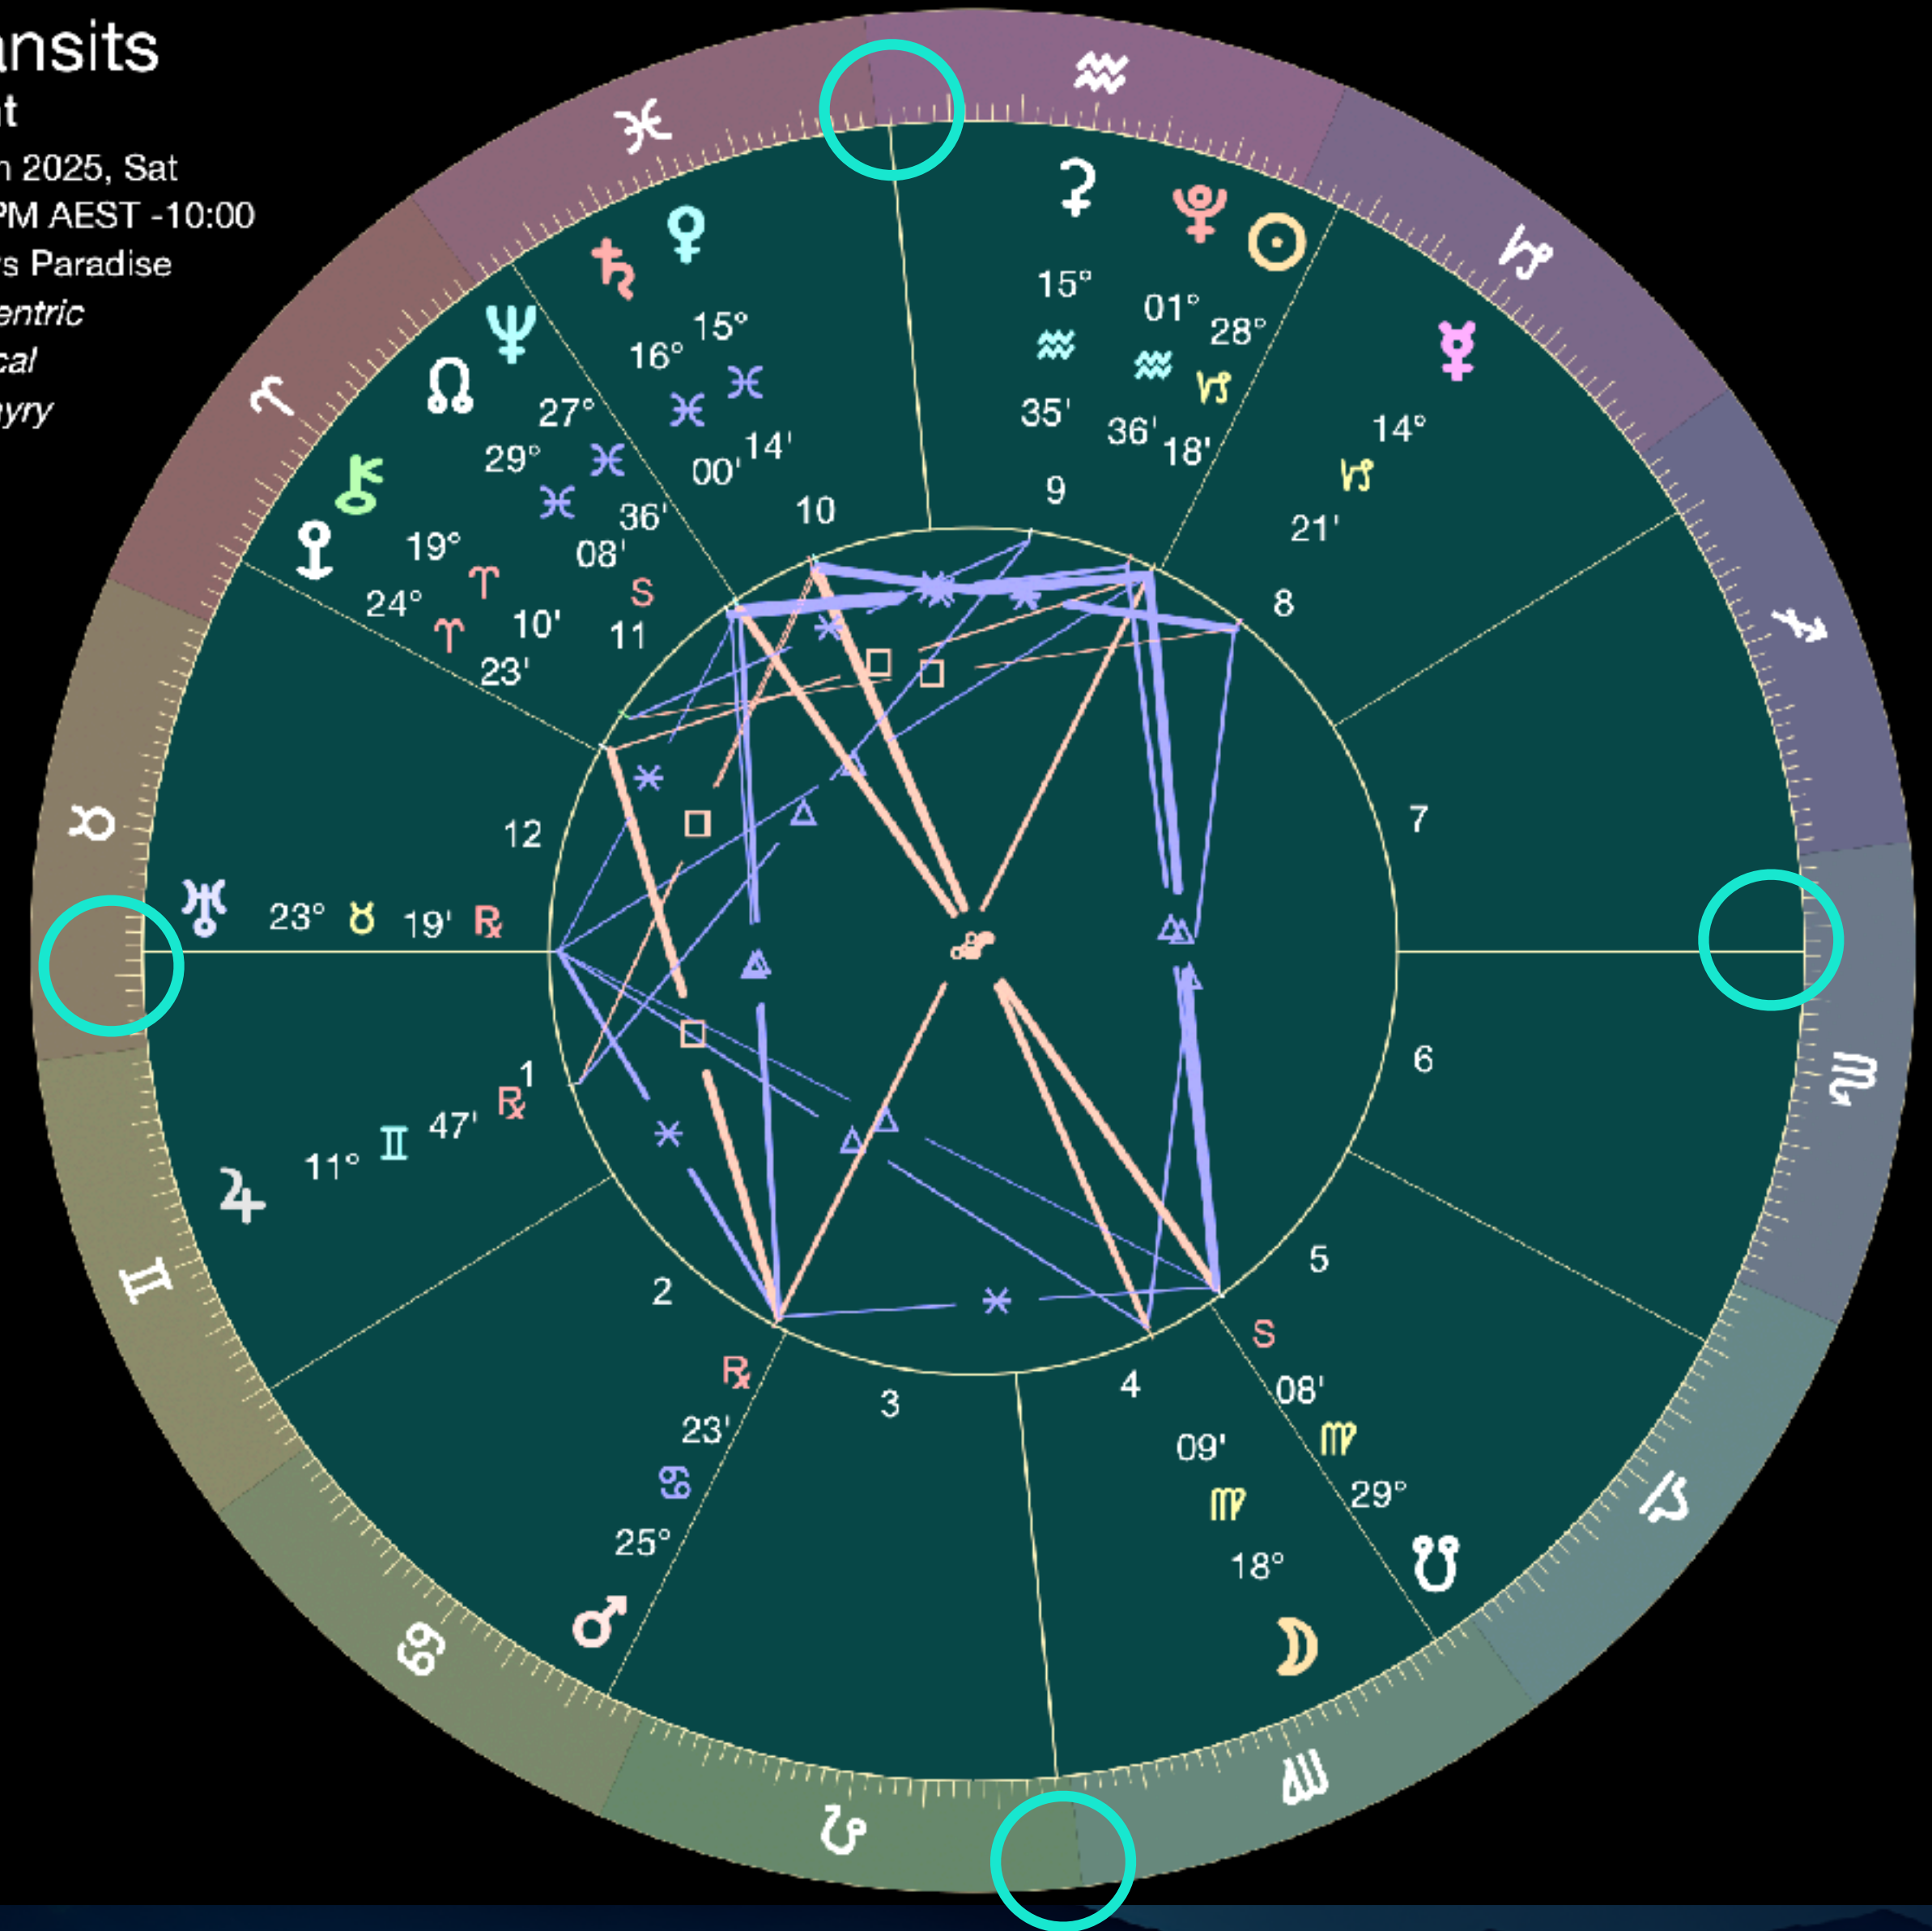

## Sacred, Geodetic, A+C+G in Mundane Astrology

- Cardinal ingresses - Aries Equinox - start of the Year, Cancer, Libra, Capricorn
- Event charts
- Eclipses and paths
- New cycles - Jupiter / Saturn, Pluto / Saturn, Uranus / Jupiter
- New Moon and Full Moon charts
- Transits to foundation charts  
- Solar Returns for countries, synastry between nations
- Planets on angles, planets in paran to each other on angles, crossing points
- Use Midpoints

### Transits

Mars OOB, rx, Cancer/Sun opposition

# Space X Fallout

Change depending on Latitude, Longitude altitude, time etc

# Distances = Degrees

- When using Geodetic AND A\*C\*G maps it's important to know that :  
1° of longitude = about 110kms on the world map. 68miles
- So using orbs of 1-2 degrees on either side of planet lines is sufficient
- Using 10° orbs will encompass 1000's of kms.
- Astro Lines converge toward poles :  
Circumference of Earth at Equator is  $40,000\text{kms}/360^\circ = 111\text{km/s}$  per 1°  
Circumference at Tropics =  $37,000\text{ kms}/360 = 102\text{kms}$   
Circumference at Poles =  $12,714\text{ kms}/360 = 36\text{kms}$

# Zodiacal or Mundo settings

- Our astrology charts use Zodiacal settings
- **IN MUNDO :**  
astronomically correct rising, based on right ascension and declination, showing where planet will rise exactly at location setting, culminating and anti-culminating positions for the planetary lines
- **ZODIACAL LONGITUDE:**  
using setting, culminating and anti-culminating positions for the planetary lines based on ecliptic zodiac degrees the ASC, DSC, MC and IC.
- **PLANETARY DIRECTIONS - LOCAL SPACE LINES**  
based on horizon and meridian, azimuths of planets extend out from centrepoint onto horizon
- Azimuth the direction measured in degrees clockwise from the azimuth circle

# Planets and Lines

- Sun - Purpose, growth, creativity, recognition, fame
- Moon - security, safety, familiarity, comfort, rest
- Mercury - connections, writing, social, siblings, learning interest
- Venus - love, loved ones, attraction, arts, music, fashion, culture, food
- Mars - confrontation, action, motivation, quests, adventures
- Jupiter - culture, expansions, journeys, growth, higher studies, pilgrimages, AHA's
- Saturn - work, mastery, status, marriage, commitment, structure, discipline
- Chiron - heal, hermit, retreat, study, outcast, outsider
- Uranus - ideas, inventions, change, exploration, freedom, unconventional, strange, different
- Neptune - escapes, psychic downloads, magical connections, spiritual quests, relaxation, creativity, art, revelations
- Pluto - empowerment, passion, intensity, danger, mystery, threats, underworld experience

Experience does not have to be physical

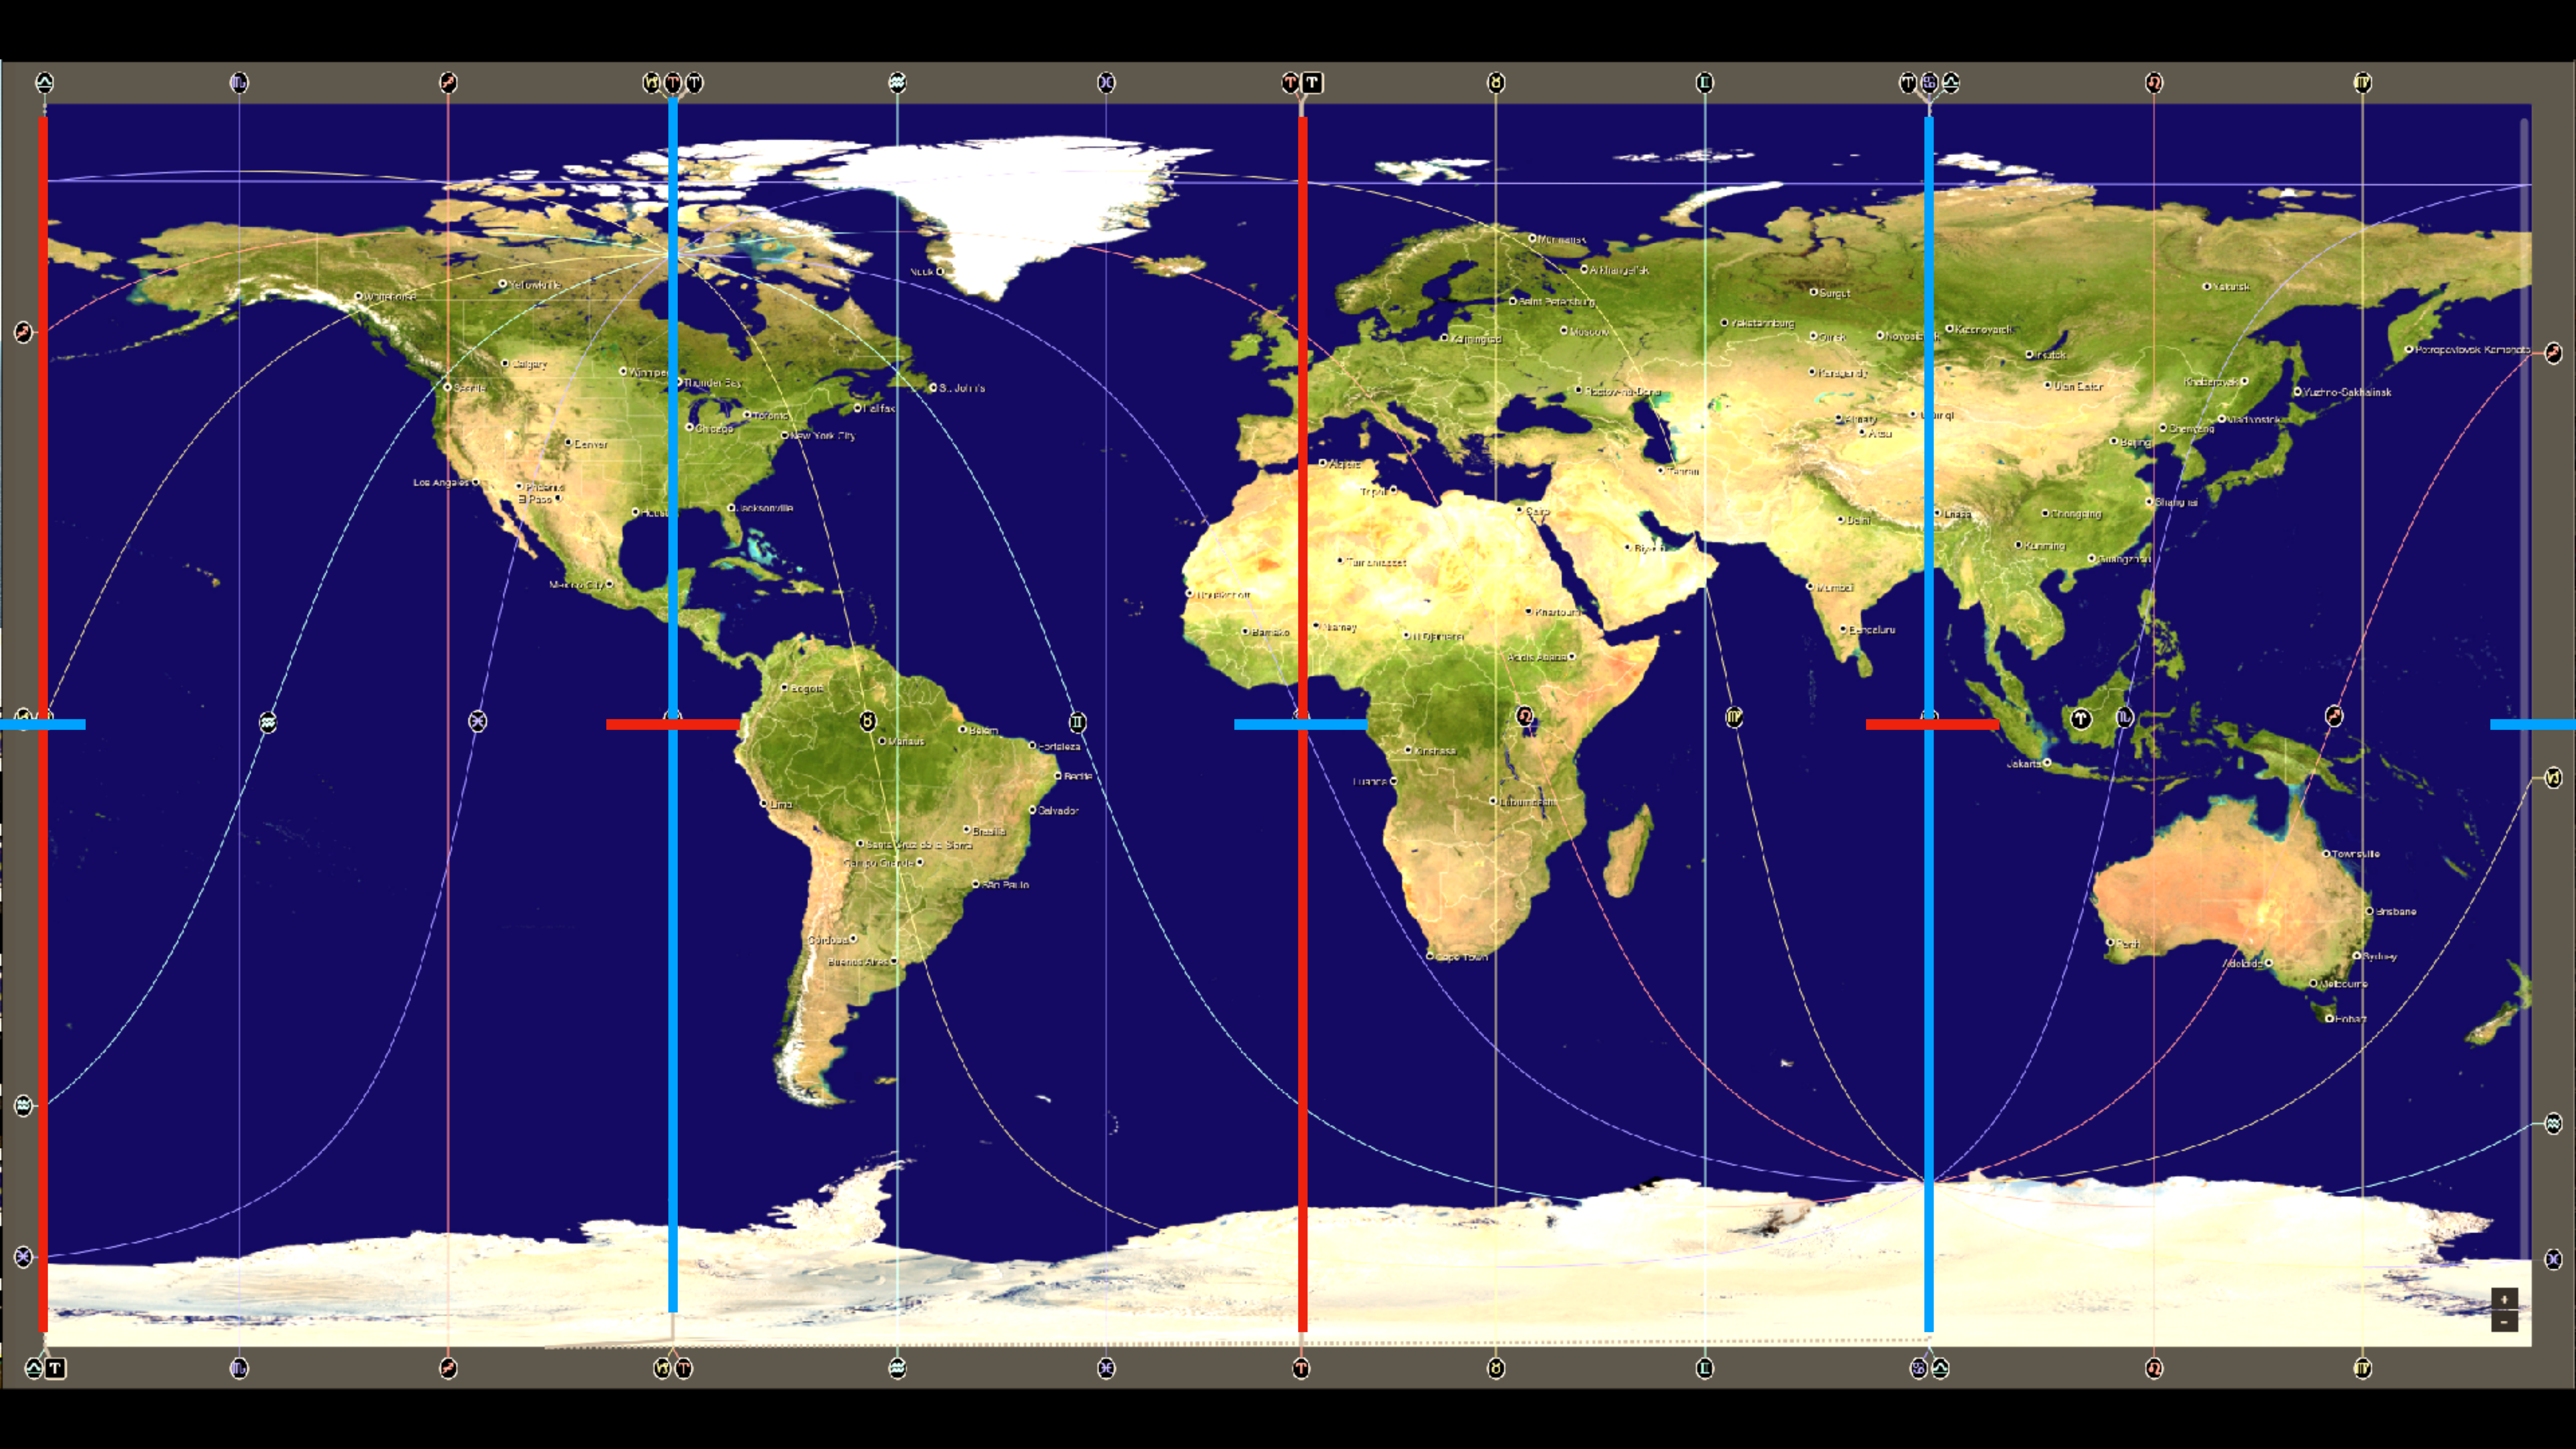

Your aspects and chart go with you

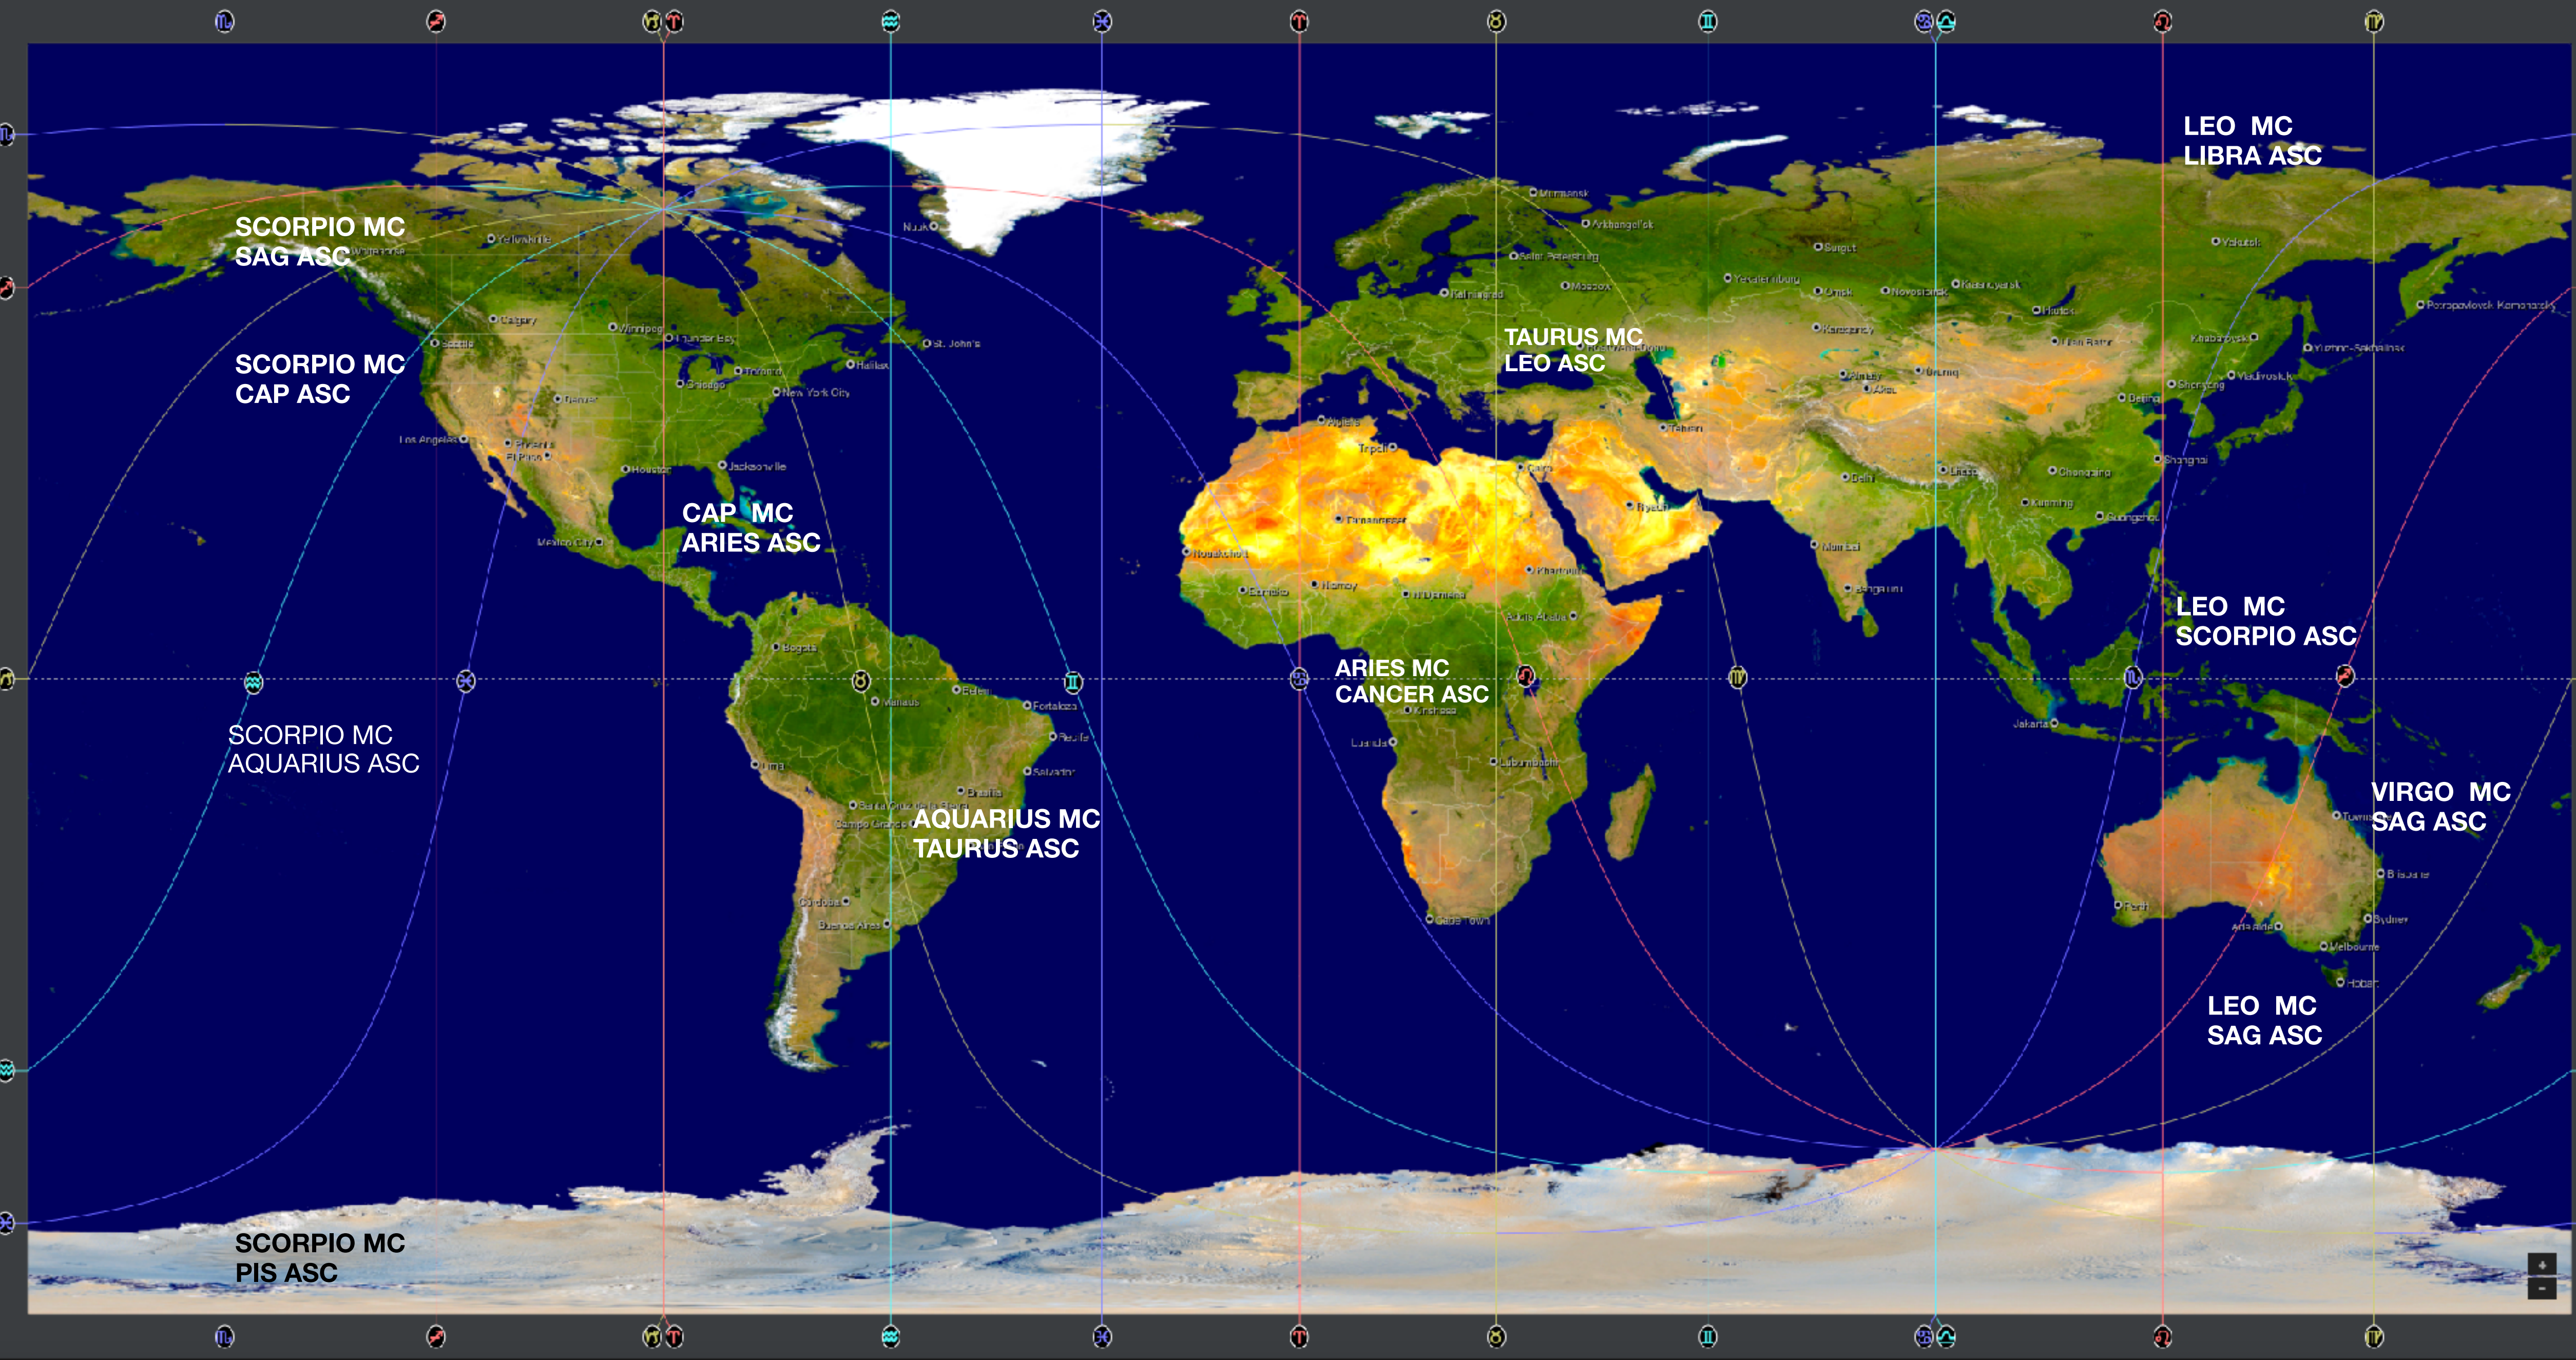

# Geodetic Maps

## The Fixed Zodiac on the World Map

- Geodetic Maps place "the zodiac across a map of the world"
- Geodetic astrology, "world" astrology, is a system where one can determine locations where particular planetary events may be more prominent:
- Tropical 0° Aries the geographic longitude 0°00' - begins at Greenwich, then goes east around the equator wrapping around the globe.
- The zodiac wraps around Earth so that every longitude on Earth has its own Midheaven and Ascending degree. called the Geodetic Equivalent or GE
- All places on the planet have fixed angles (i.e. Geodetic or GE Geodetic Equivalent)
- Geodetic Equivalent - GE
- The fixed angles Geodetic and Local: show how one/country/state/person relates to the objective public/world realities of a given location.
- Knowing the map, and zone will quickly determine where eclipses, lunations etc will be taking place

In New Orleans, but not showing?  
500 kms from Venus line

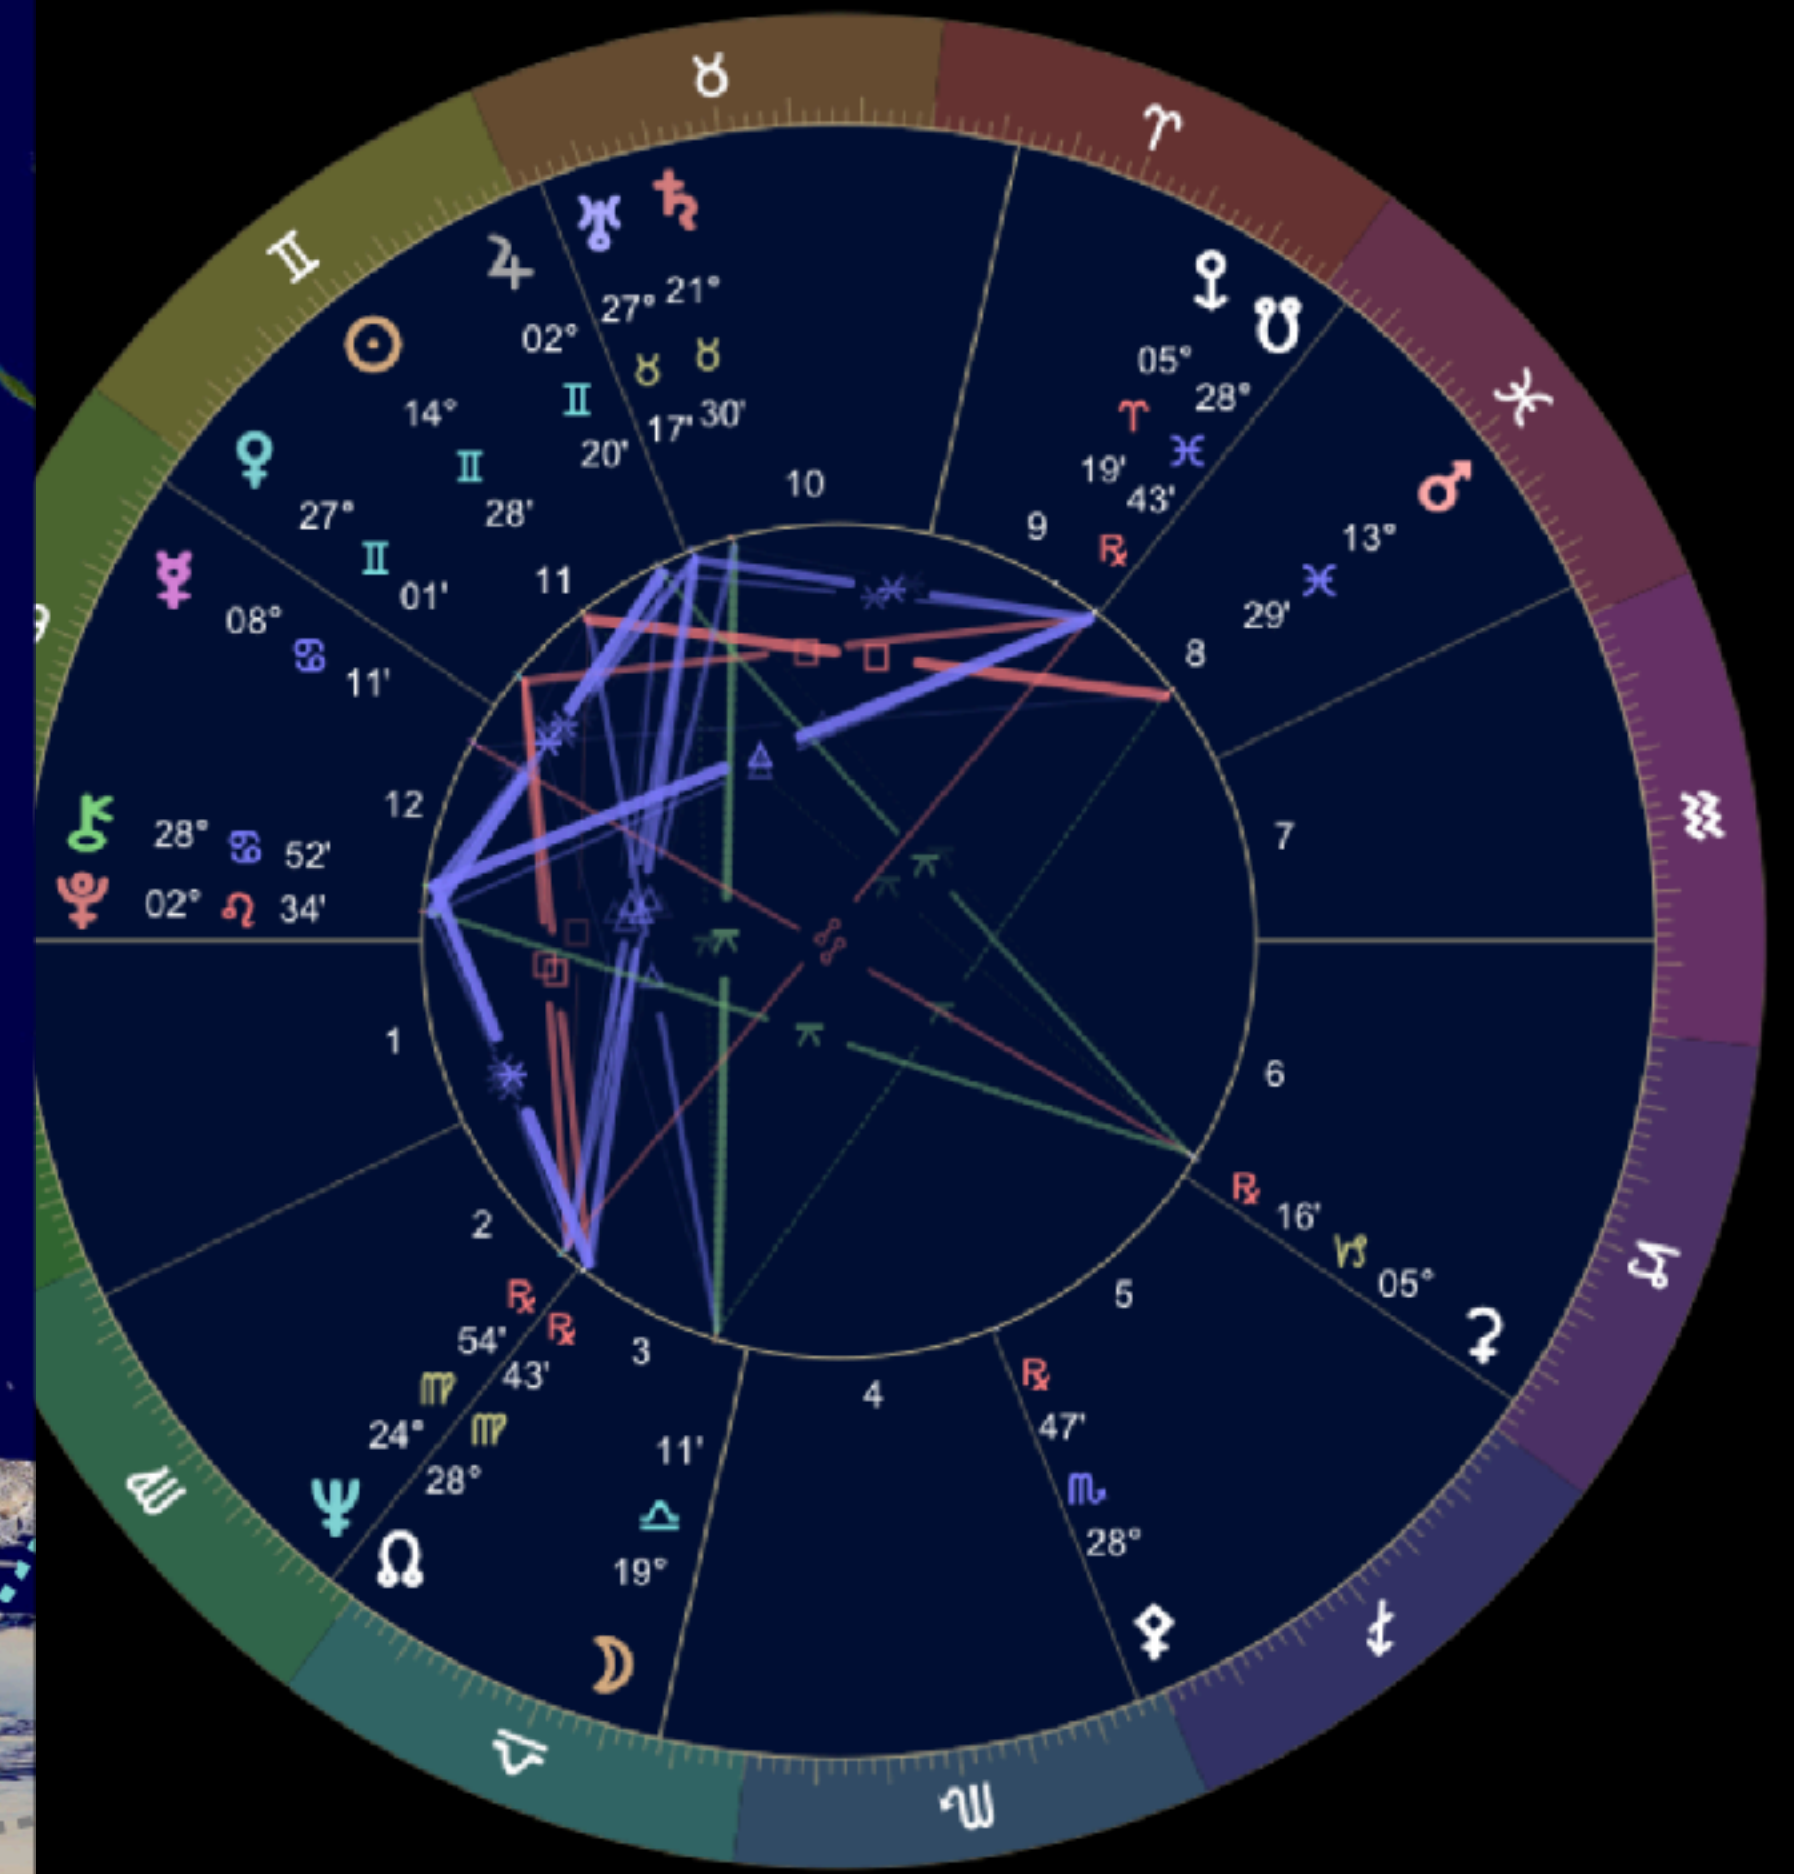

# Consider GE co-ordinates

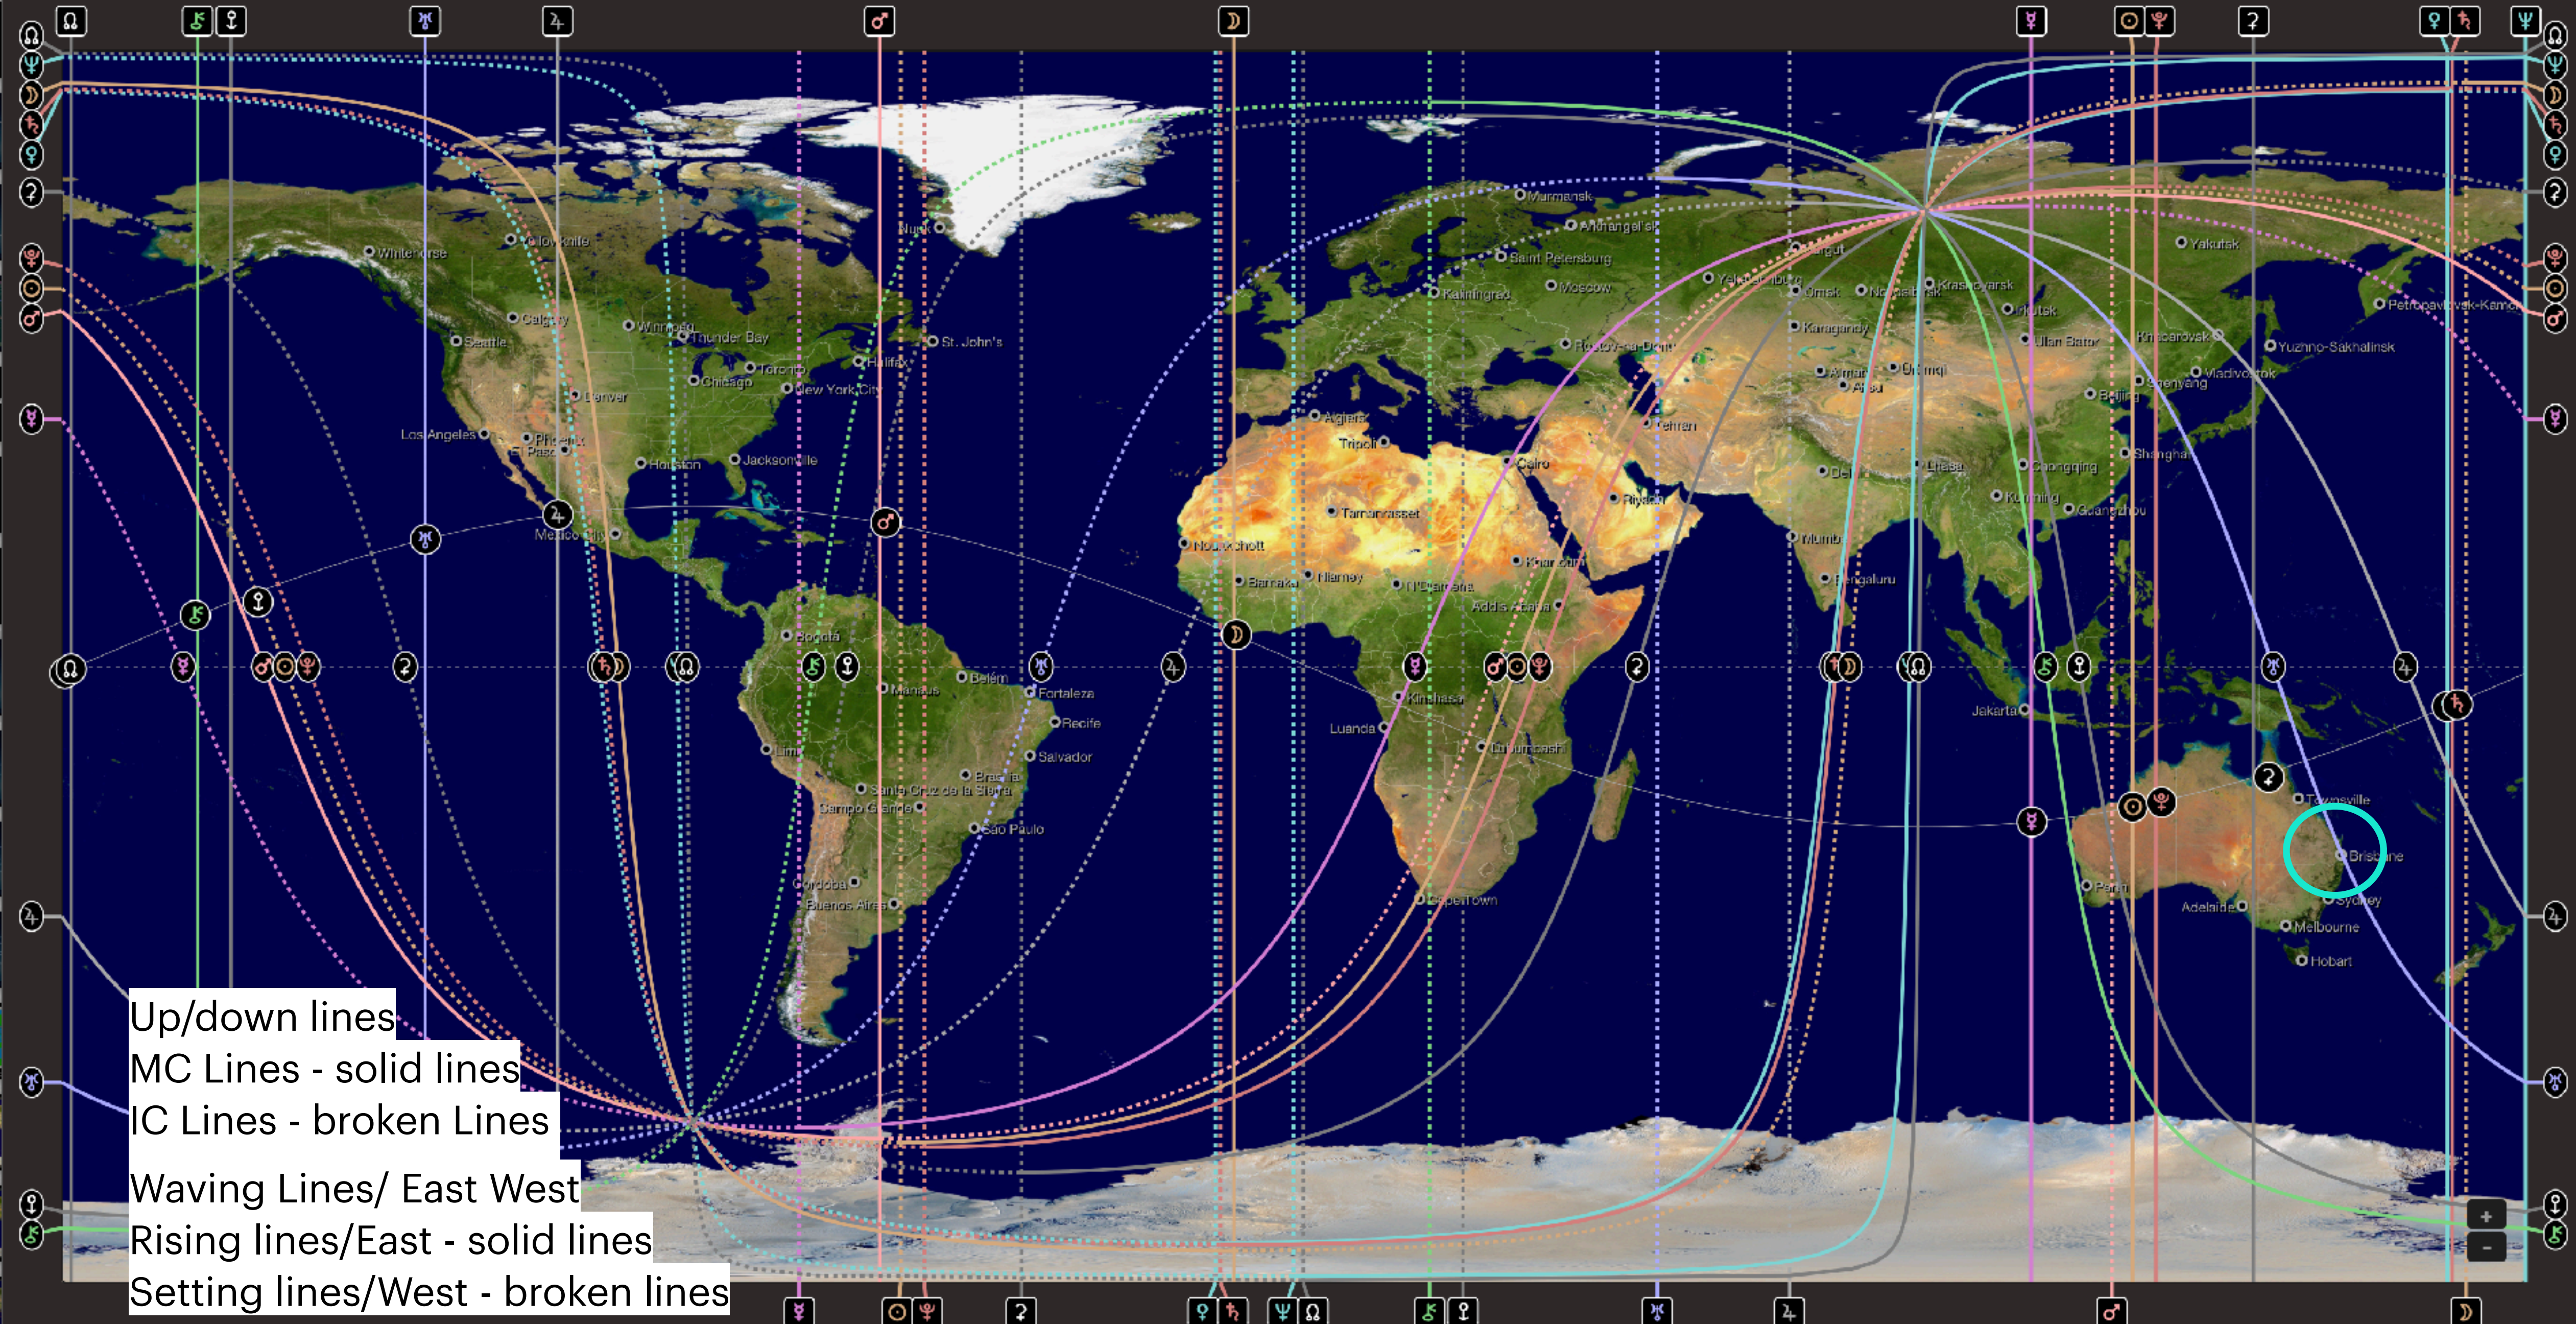

- Check and confirm other factors showing up in charts
- Note connections to places via planet degrees and angles
- What are the GE coordinates of birth places heritage, parents, husbands, friends, lovers, where family, friends end up or live where work, career, colleagues are connected
- Help make decisions, confirmations, plans, inspired
- Eg - best friends lives in LA, been 9 times  
LA - 2° SAG MC (square Moon) 15° Leo MC (my 9th House)
- Consider areas for work, retreats, outlets etc
- Consider hotspots before travel or moving

# A+C+G Maps AstroCartoGraphy

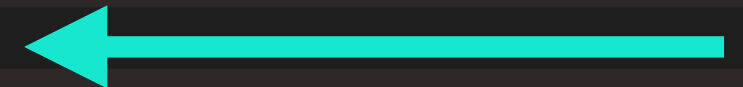

- First developed by Jim Lewis- developed through previous theories
- First done mapping by hand in mundo lines, where planets rise, culminate, set and anti-culminate around planet
- First Map 1976, First Book 1979
- See angular planets and parans easily by map  
Parans -  
2 planets(stars) are angular  
2 planets cross at same latitude
- Create relocated charts for places of interest  
Add Paran latitude
- In Mid 80's Jim Lewis struck by vehicle crossing Military Road, Sydney  
Mars Ascending line

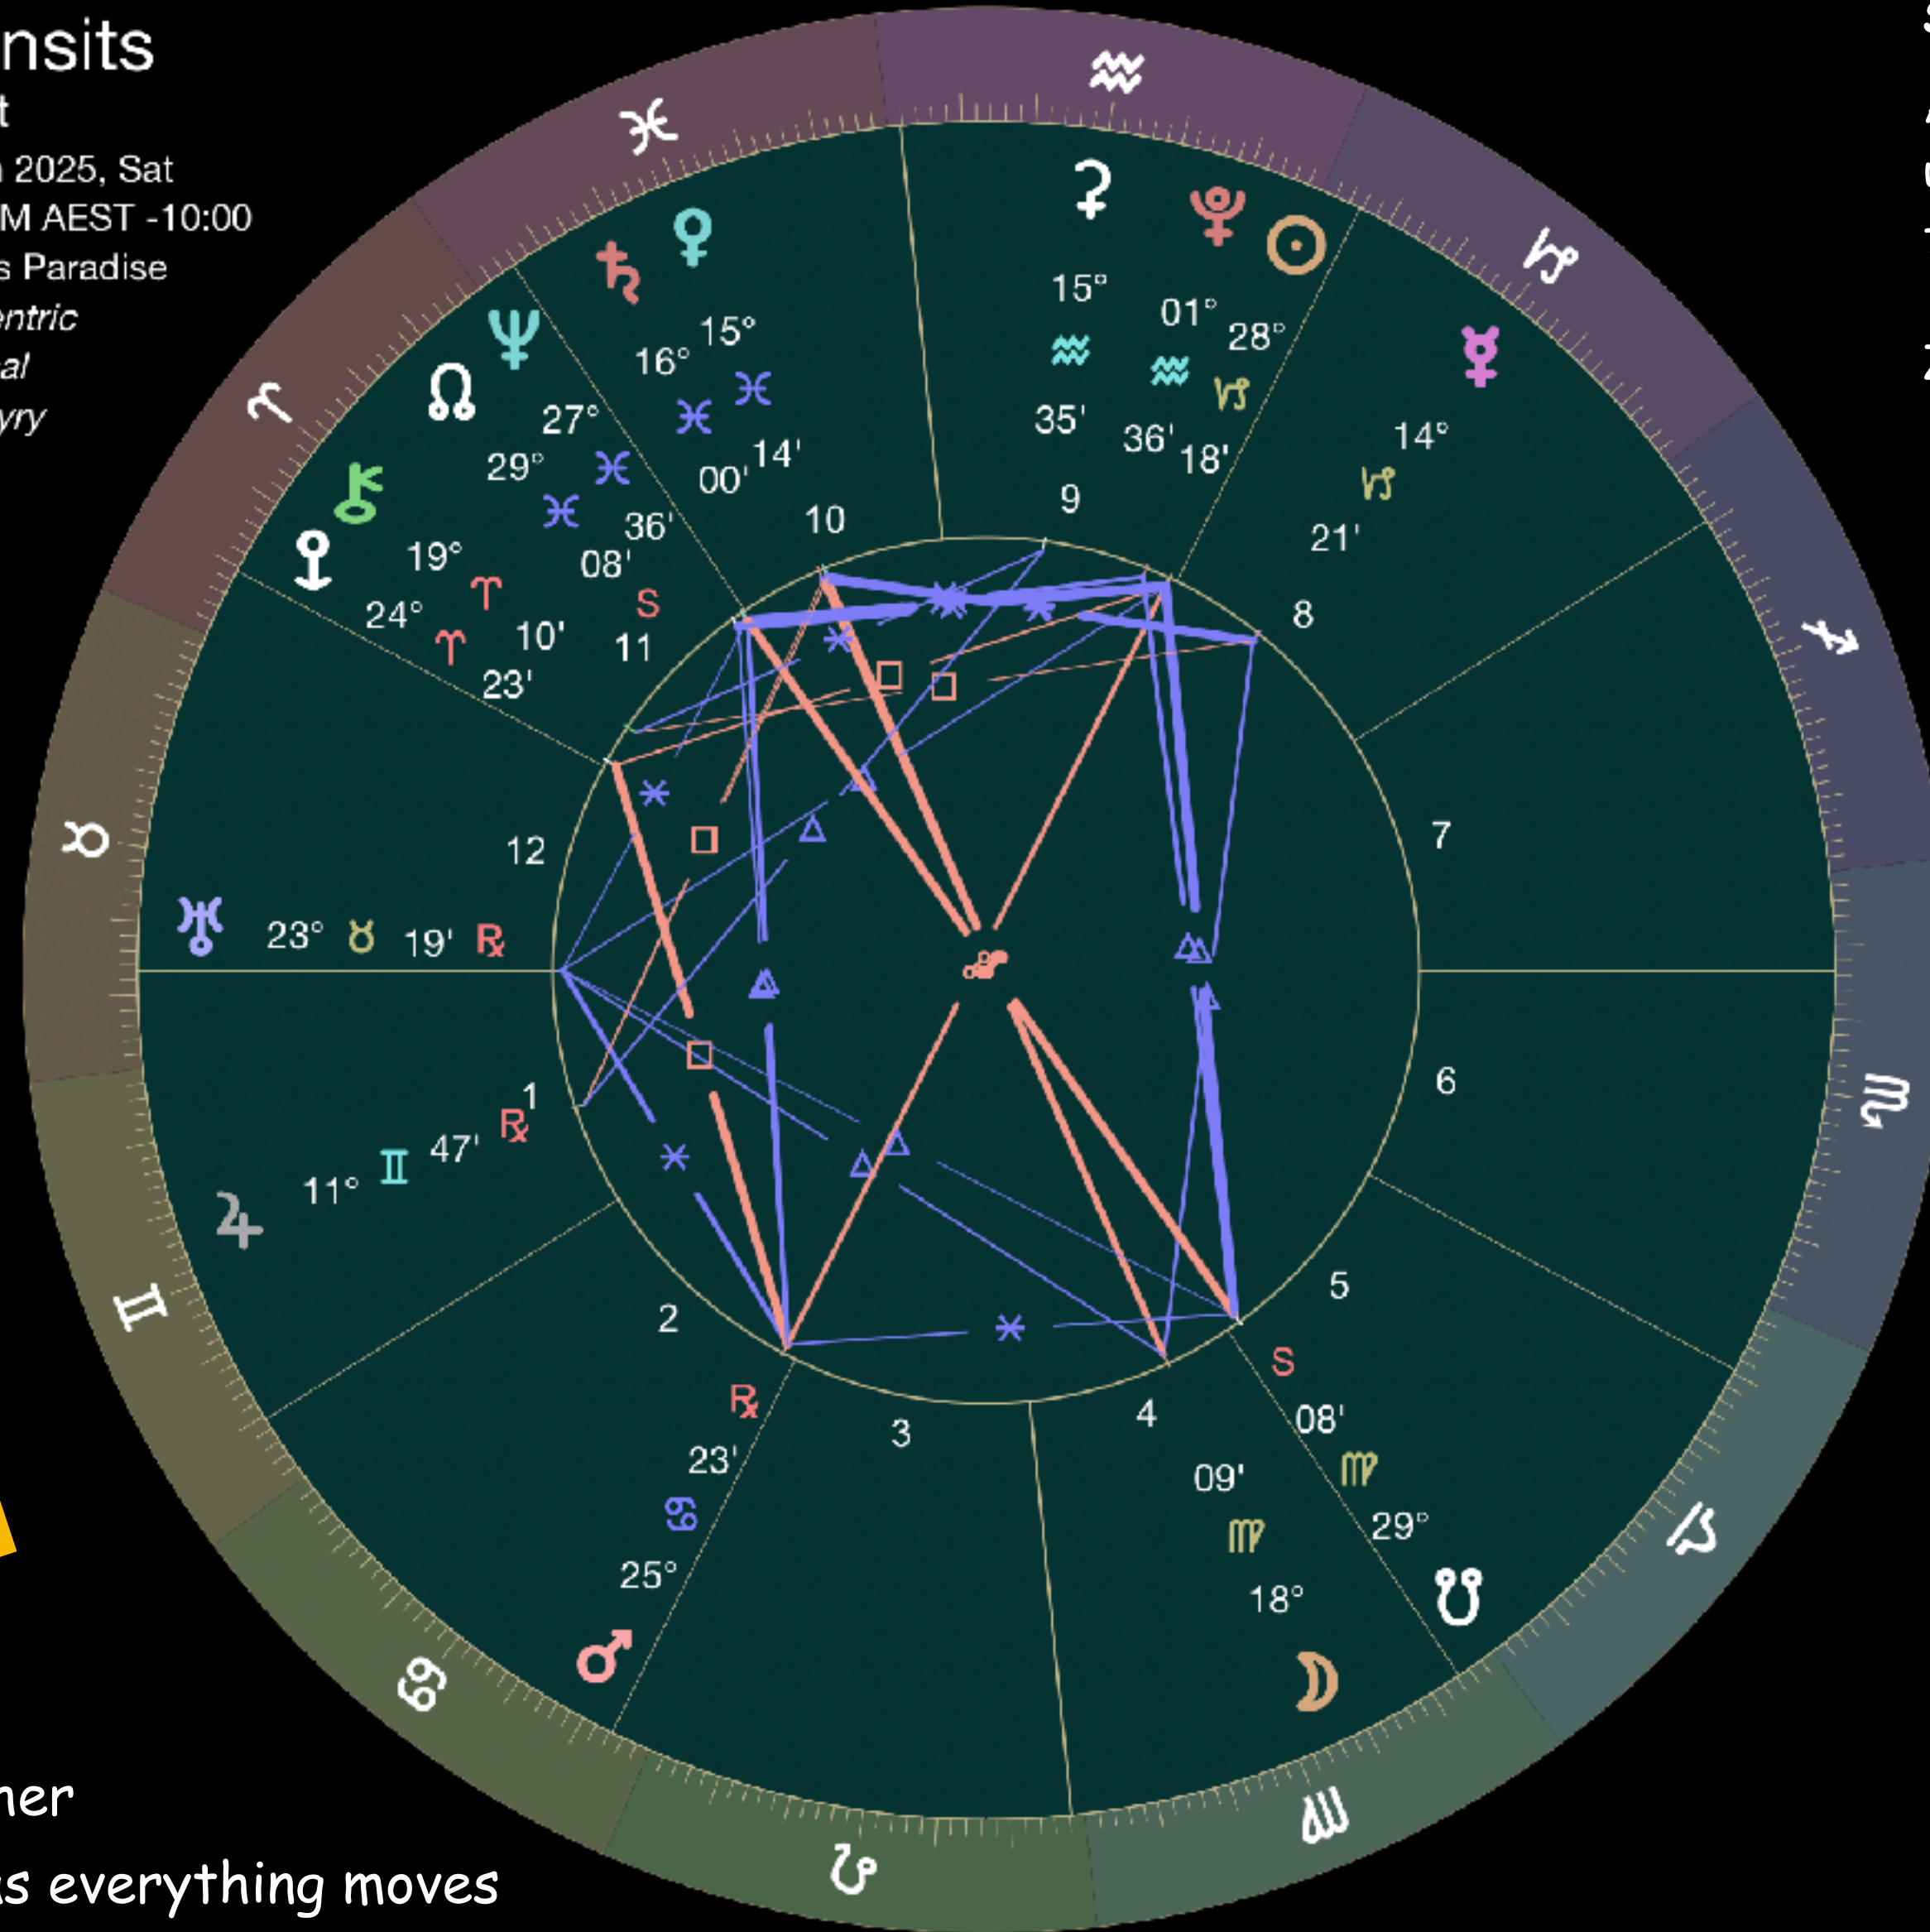

Up/down lines  
 MC Lines - solid lines  
 IC Lines - broken Lines  
 Waving Lines/ East West  
 Rising lines/East - solid lines  
 Setting lines/West - broken lines

## Compass Astrology

Measured clockwise from North

# Local Space Lines

Local Space Lines show the direction of a celestial object from the observer,  
Shown as the angular distance from the north or south point of the horizon to the point at which a vertical circle to the horizon.  
The horizontal angle or direction of a compass bearing.

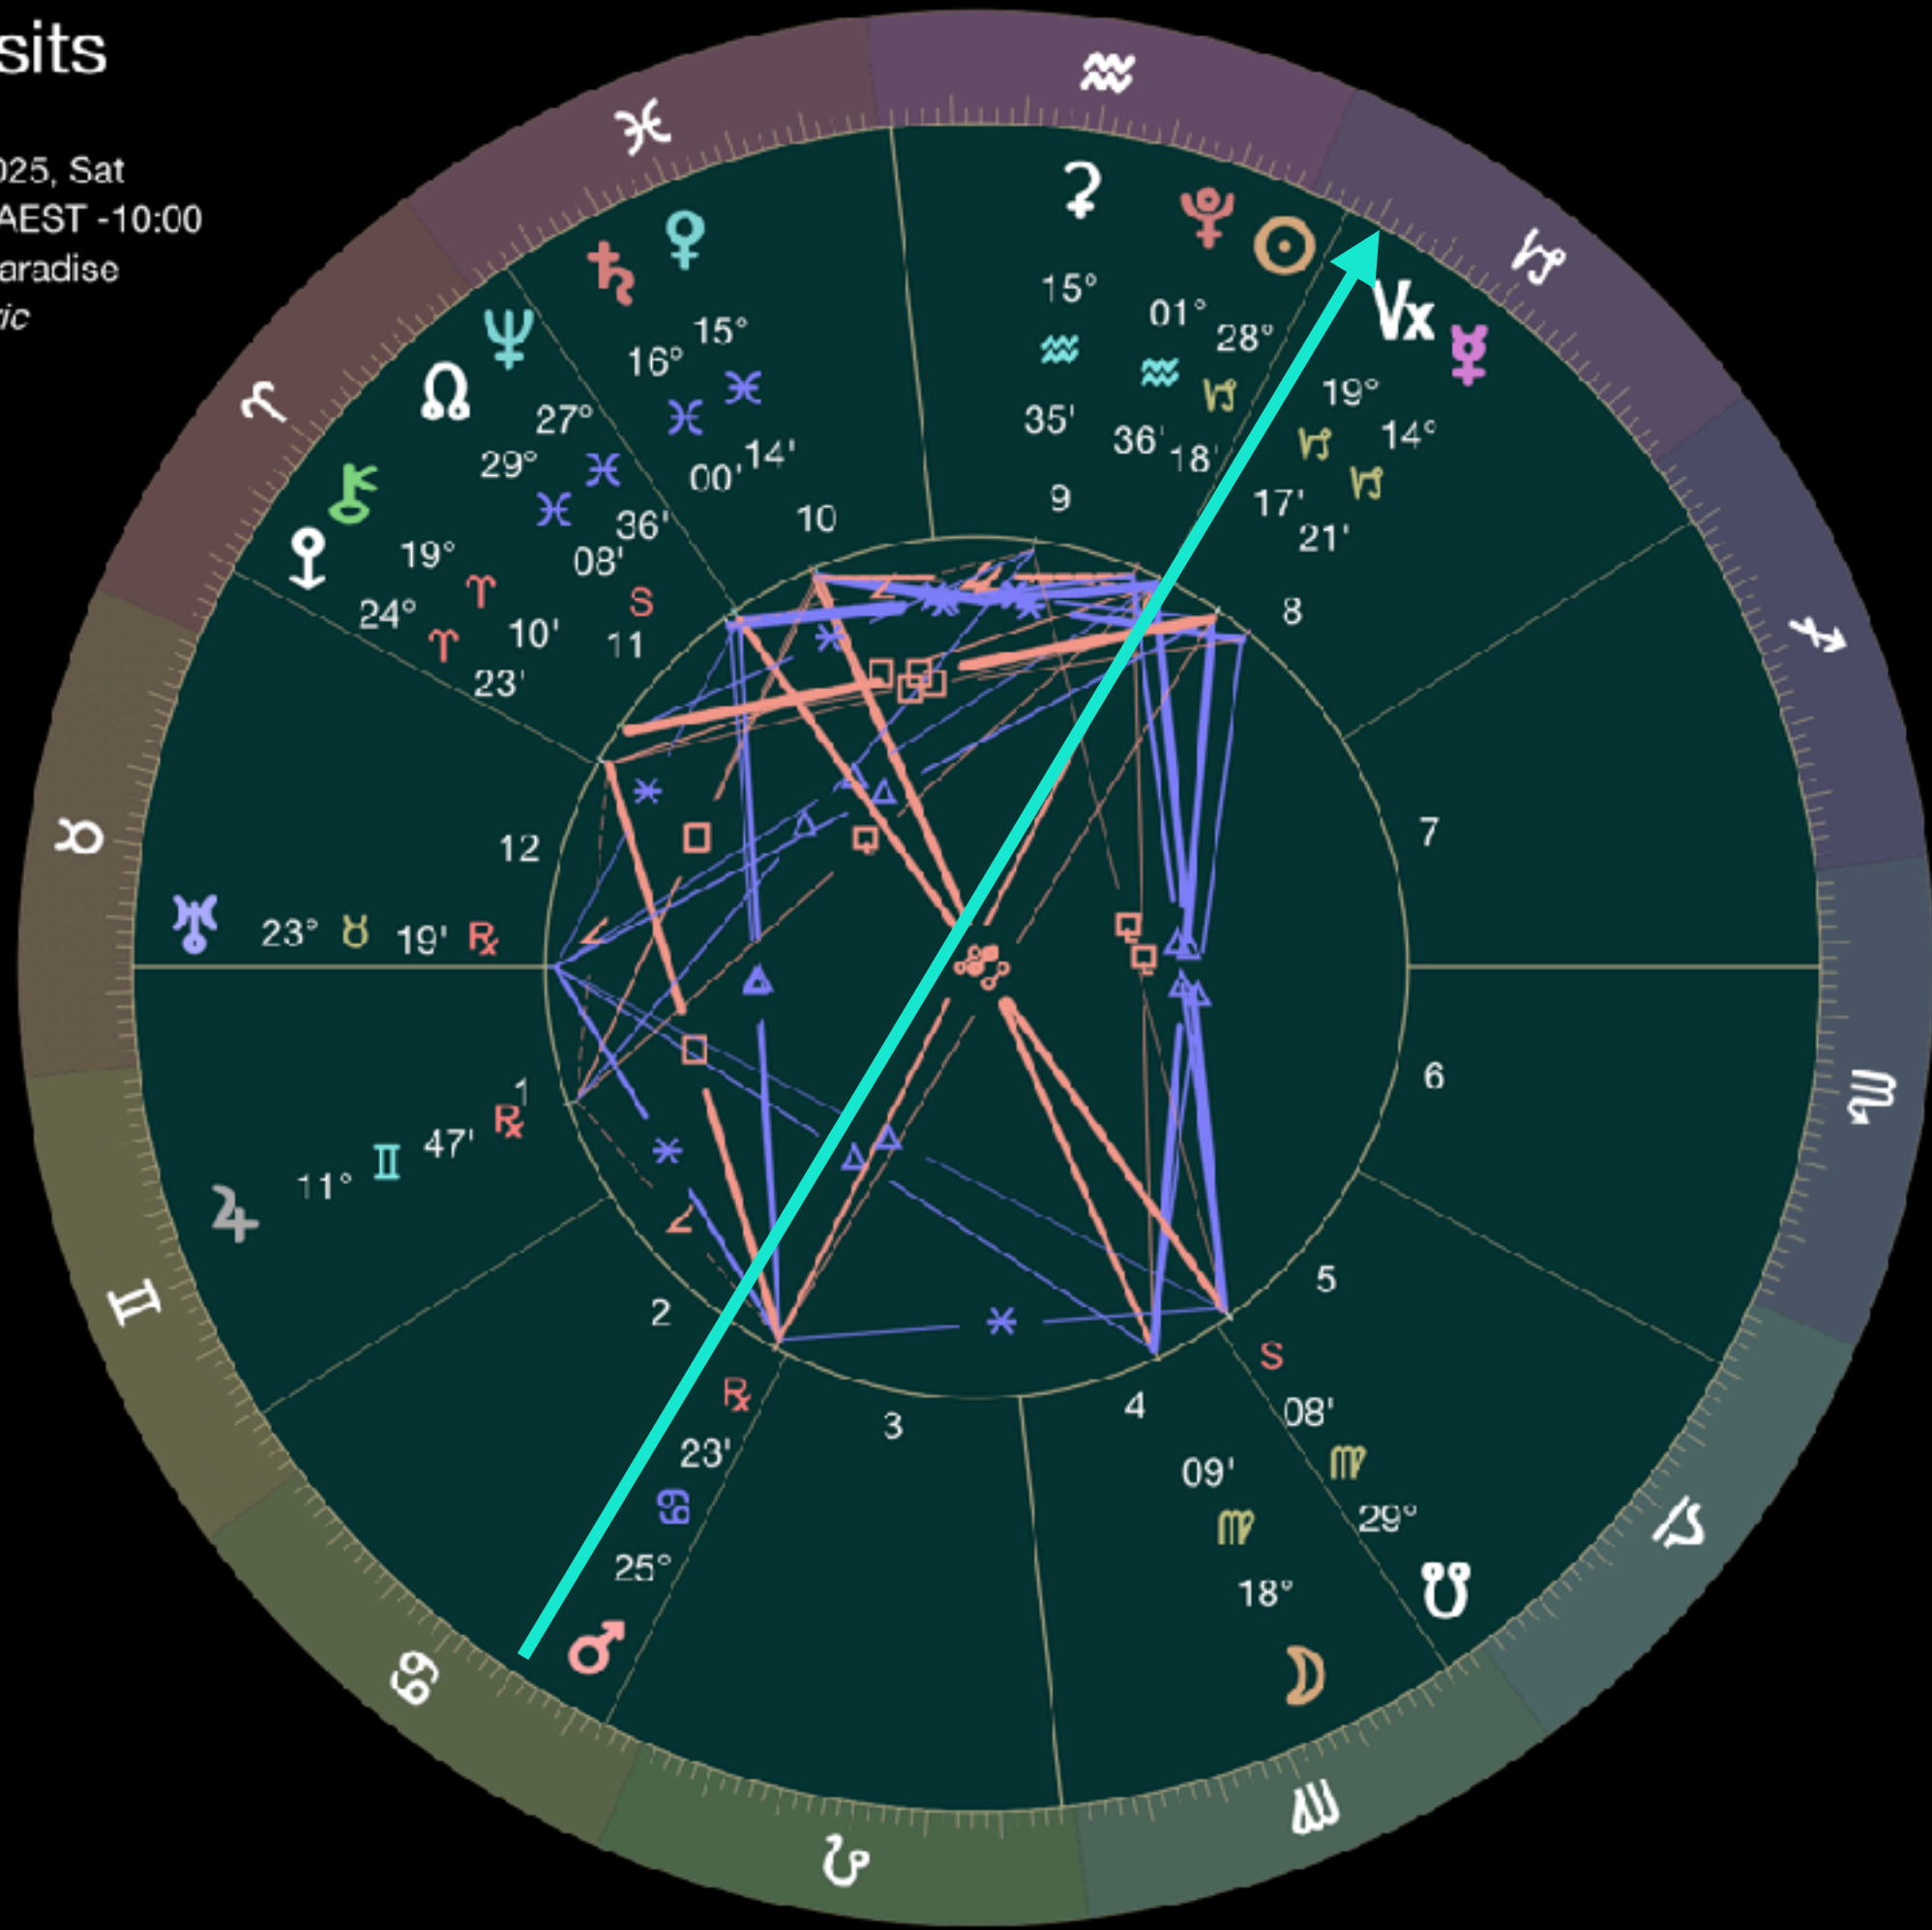

Horizon 360° view , planets Altitude projected down onto horizon, Azimuth
