

The Fractal Nature of Astrology

Julija Simas

Through the repeating patterns and cycles, we study when doing astrology, we get a sense that cycles repeat but are never quite the same.

Our Birth Charts, or any radix chart, represent the Initial conditions set off at birth, that bring with them the patterns of the past that unfold into the future. Just like fractals, we have a birth chart that is moving and alive, like nature itself.

In this session we will explore the nature of astrology as a fractal life pattern that we can learn to love, live and create with.

From the Venus Star cycle, to eclipse cycles to planetary pair dynamics, learn to be more conscious of the cycles you were born into that continue to shape your life.

Past, Present and Future

Why do we use astrology?

- Understand ourselves and others
- Seek guidance, get timing
- Find patterns and archetypes, become conscious and aware of drives and motivations, blockages, weaknesses
- Better ourselves, our experiences, find our purpose
- Heal, accept, help heal trauma, the past, unconscious drives, become conscious of life patterns, habits, past
- Grow, evolve, transform
- Change our lives
- Spirituality and transcendence
- To live a more fulfilling and creative life
- We are in awe of its magic

All of the above?

Workings of Astrology

- What brought us to astrology?
- We come into astrology with our own beliefs, knowledge, wisdom, training, biases, perspectives, particular interests
- We need to find our own confirmation, evidence, truth
- What makes sense to us about astrology and why it works?
- Fractal Nature helps explain to the uninitiated, the naysayers, the science minded
- This understanding gives one more room to, explore, design, co-create, participate, moving away from bounds of predictions (curses) and ancient, outdated, interpretations
- Choose growth and opportunities instead of limits and fear
- Astrology is dynamic and interactive, not static
- Our beliefs and philosophies will all be an influence on our practice

Background

- Entered astrological studies with the concepts, ideas and background of understanding the universe through quantum physics and reality
- Previous years of studies in metaphysics, alchemy and magic, leading to formal studies in astrology
 - all principles of magic and alchemy involved a knowing of astrology
- Contemporary books were :
 - The Hidden Messages in Water 2004 - Masuro Emoto
 - What the Bleep - 2004,- Zero point energy, quantum mechanics, mind over matter
 - The Secret - Rhonda Byrne - 2006,
 - The Science of Oneness - Malcolm Hollick - 2006
 - Astrology a Place in Chaos - 2006 Bernadette Brady - the origins of astrology and chaos theory
 - Cosmos and Psyche - Rick Tarnas - 2006 - The Enchanted Cosmos, 2 suitors
- Ongoing interest in the Philosophy behind Astrology and our conscious and changing relationship to what astrology is and why it works, wrote Astro Diploma finishing thesis 2004/2005 combining astrology with modern ideas and concepts
 - The co-creative aspect of astrology
 - The Astro Philosophies Worldview's that influenced astrology through the Ages
 - What is the worldview that influences the astrology of current times
 - Graduating January 2006
- Have updated concept ideas, graphics with various presentations over the years

Fractal Nature of Astrology Charts

Fractal Nature of Astrology

Our astrology chart - carries its own unique formula and fractal pattern, forever, unfolding, revealing and evolving

It has a past, a present and a future

Every astrology charts shows the cosmic fractals its was born into :
Moon cycle, synodic cycles, planetary pairs, nodal cycle, eclipse cycles, Venus Star

They depict our ever-changing fractal patterns of growth, evolution and co-creation

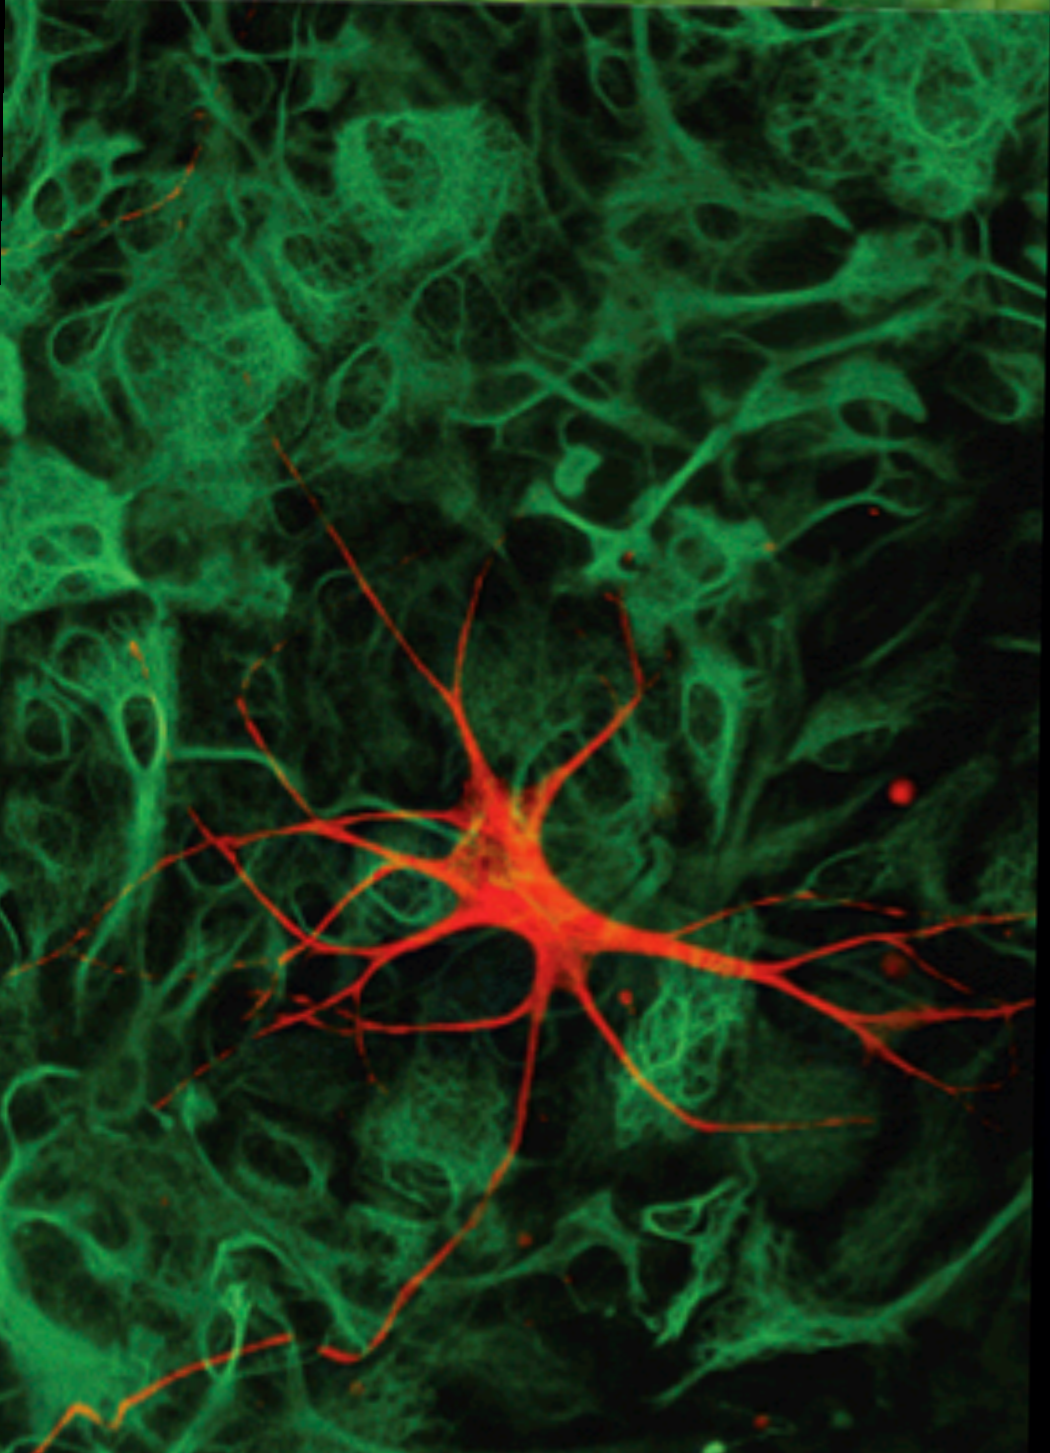

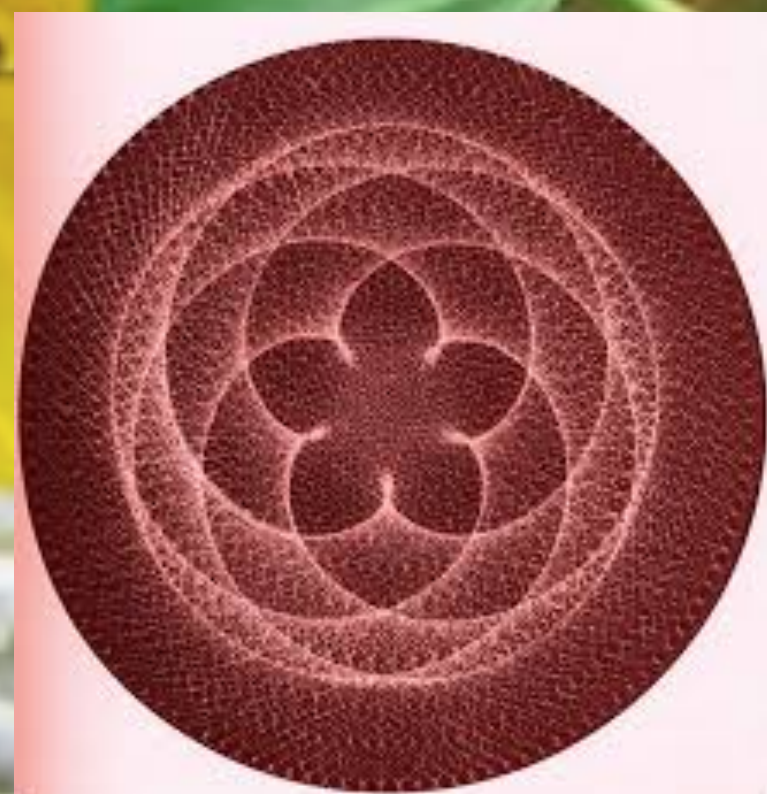

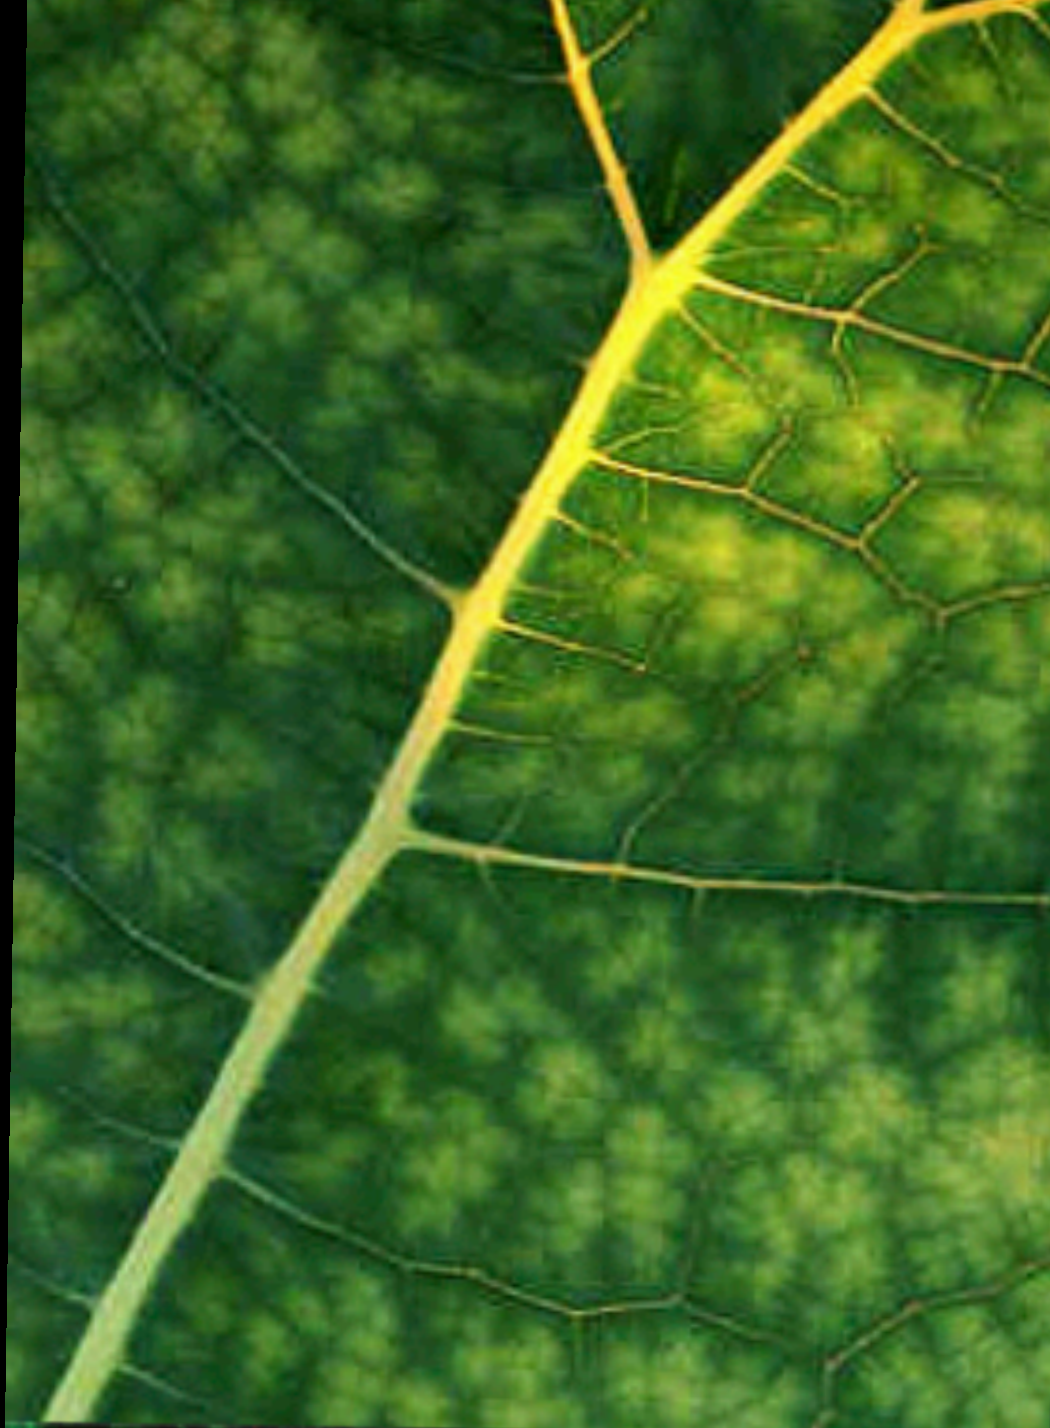

We are part of this fractal !!

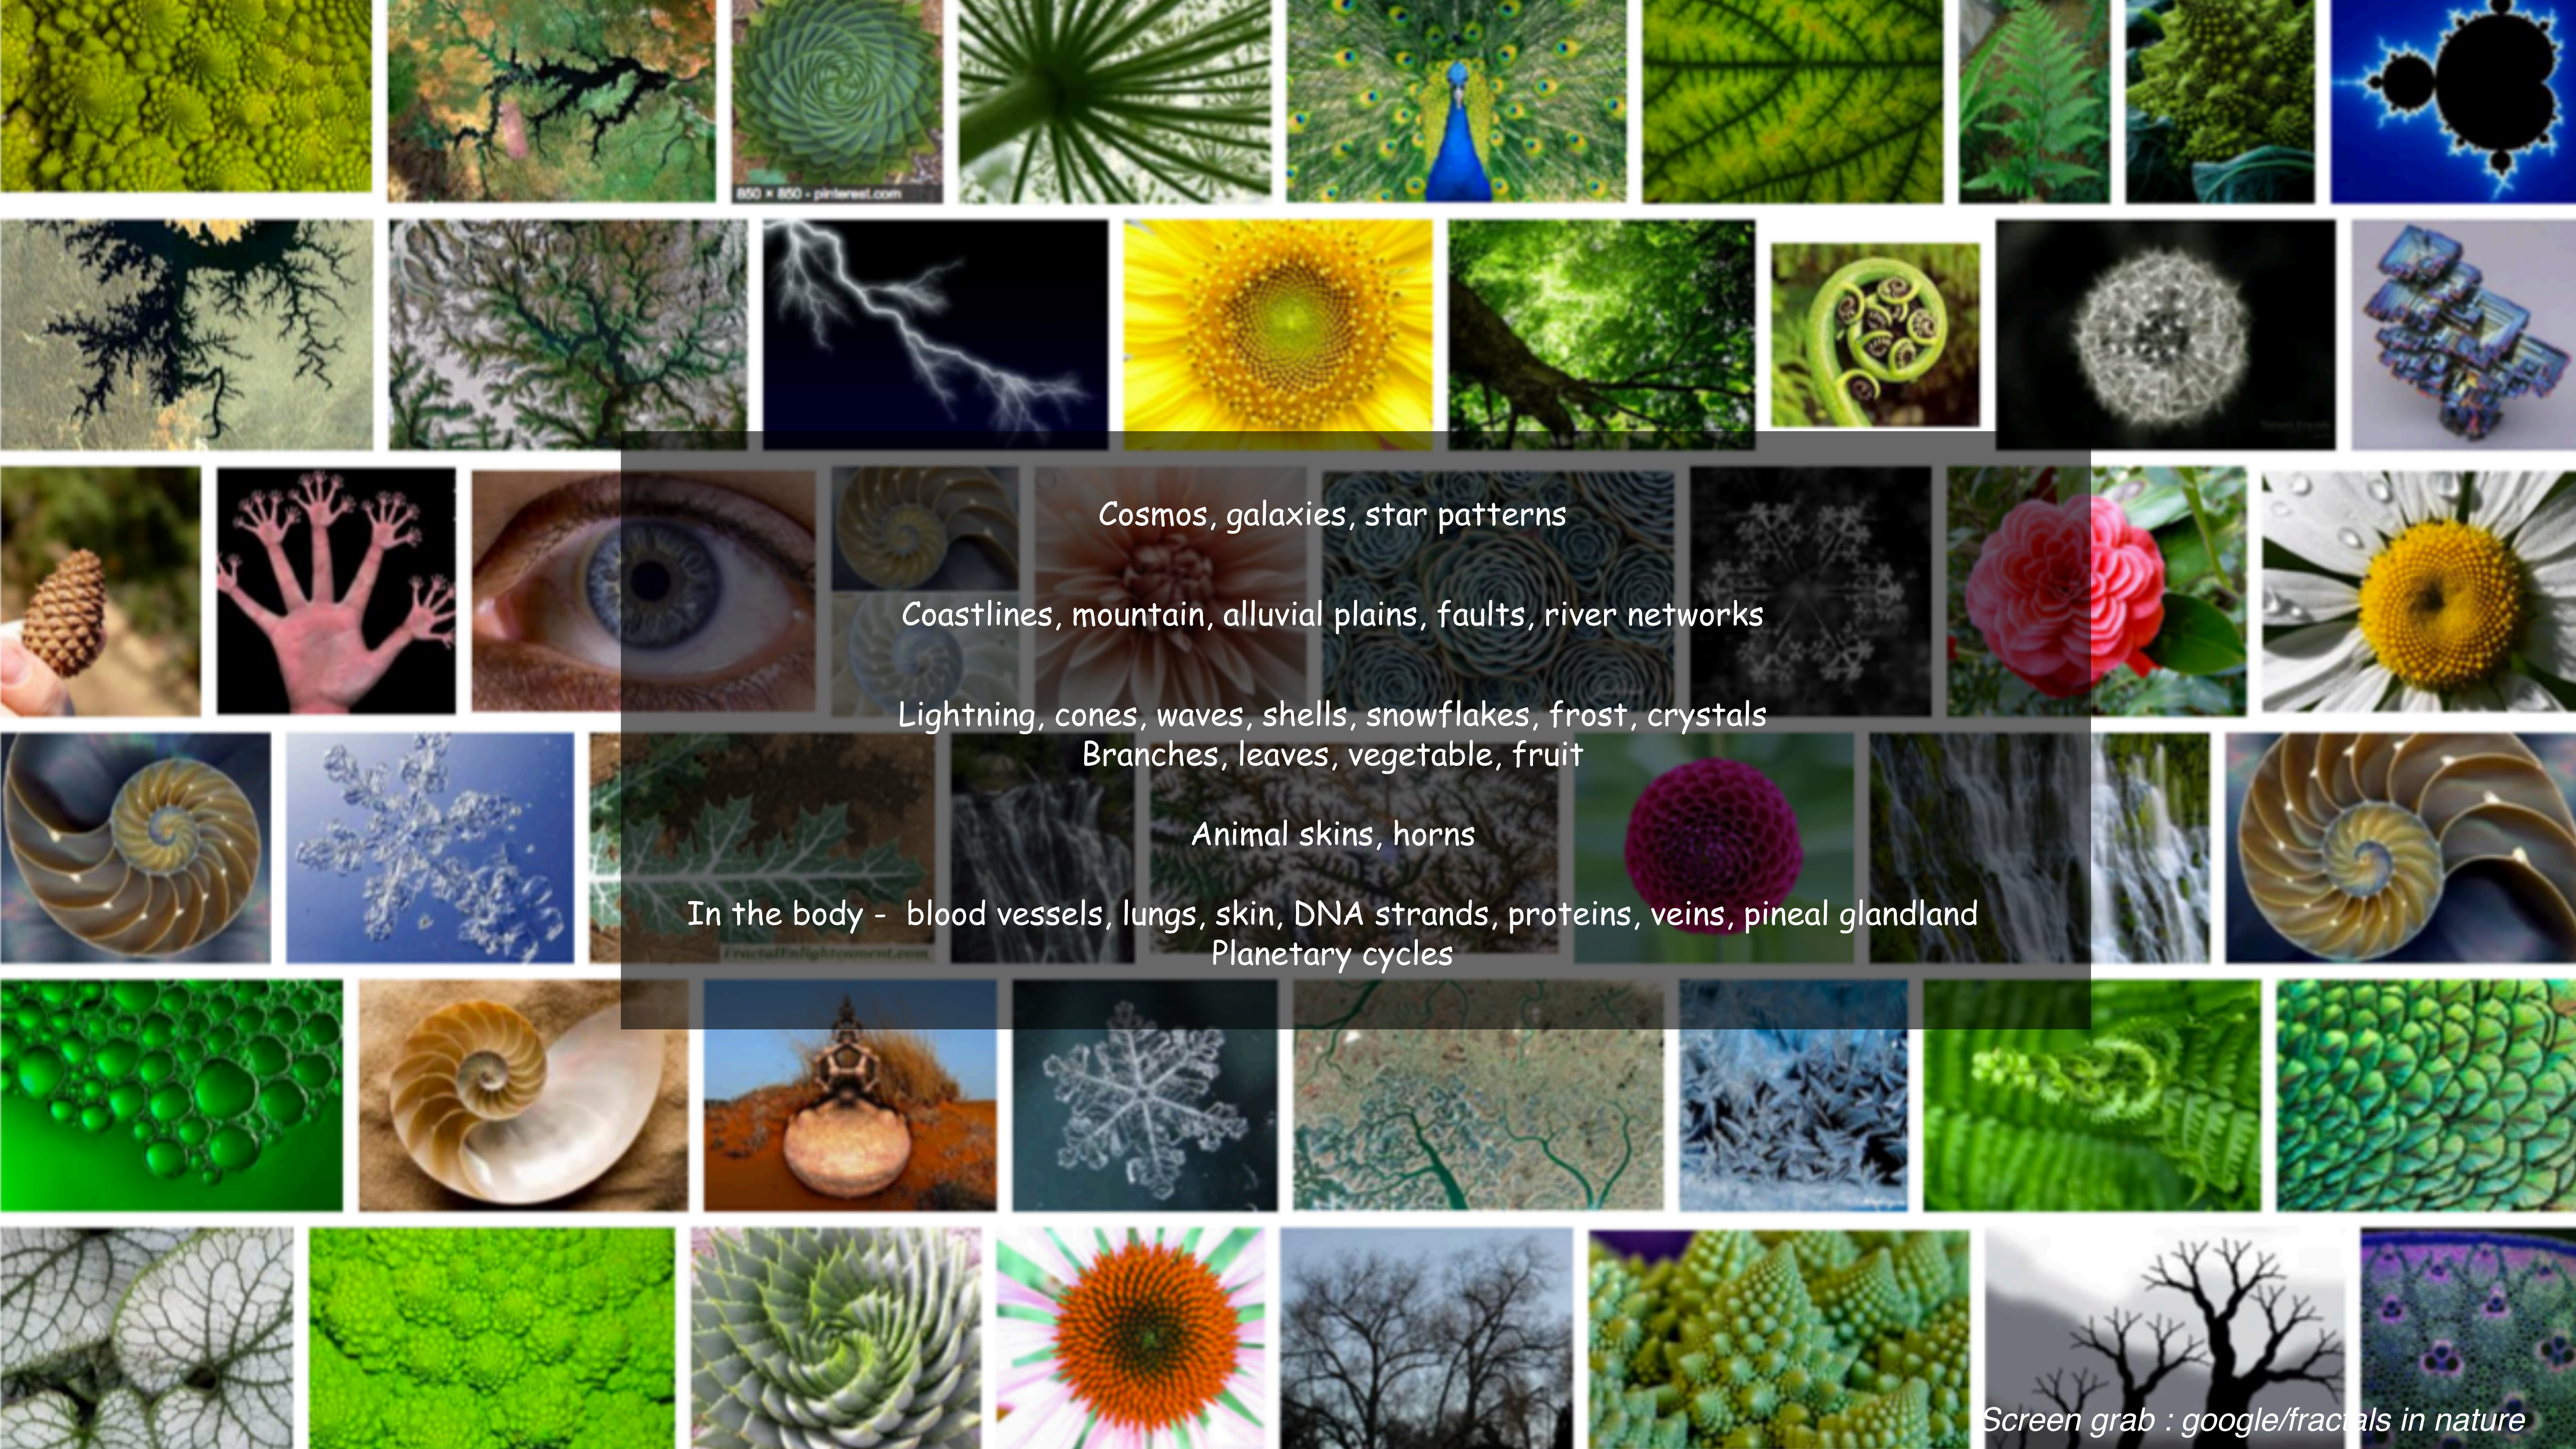

Fractal Nature

- A fractal is a never ending pattern. Fractals are infinitely complex patterns that are self-similar across different scales. They are created by repeating a simple process over in an ongoing feedback loop. A detailed pattern that repeats itself.
- A fractal is a natural phenomenon or a set of parameters that exhibits a repeating pattern that displays at different scales. It is also known as an expanding symmetry or evolving symmetry.
- Fractals are repetitive cycles of growth in nature and **dynamic systems**.
- Fractals are not limited to geometric patterns, but can also describe processes in time, images structures, sounds, nature, technology, art and law - **Astrology**
- Replication of patterns repeating at every scale.
- Can be set off as mathematical formulas with initial formulas that are :
Menger Sponge, Mandelbrot Set, Julia Set, Koch Snowflake

Cosmos, galaxies, star patterns

Coastlines, mountain, alluvial plains, faults, river networks

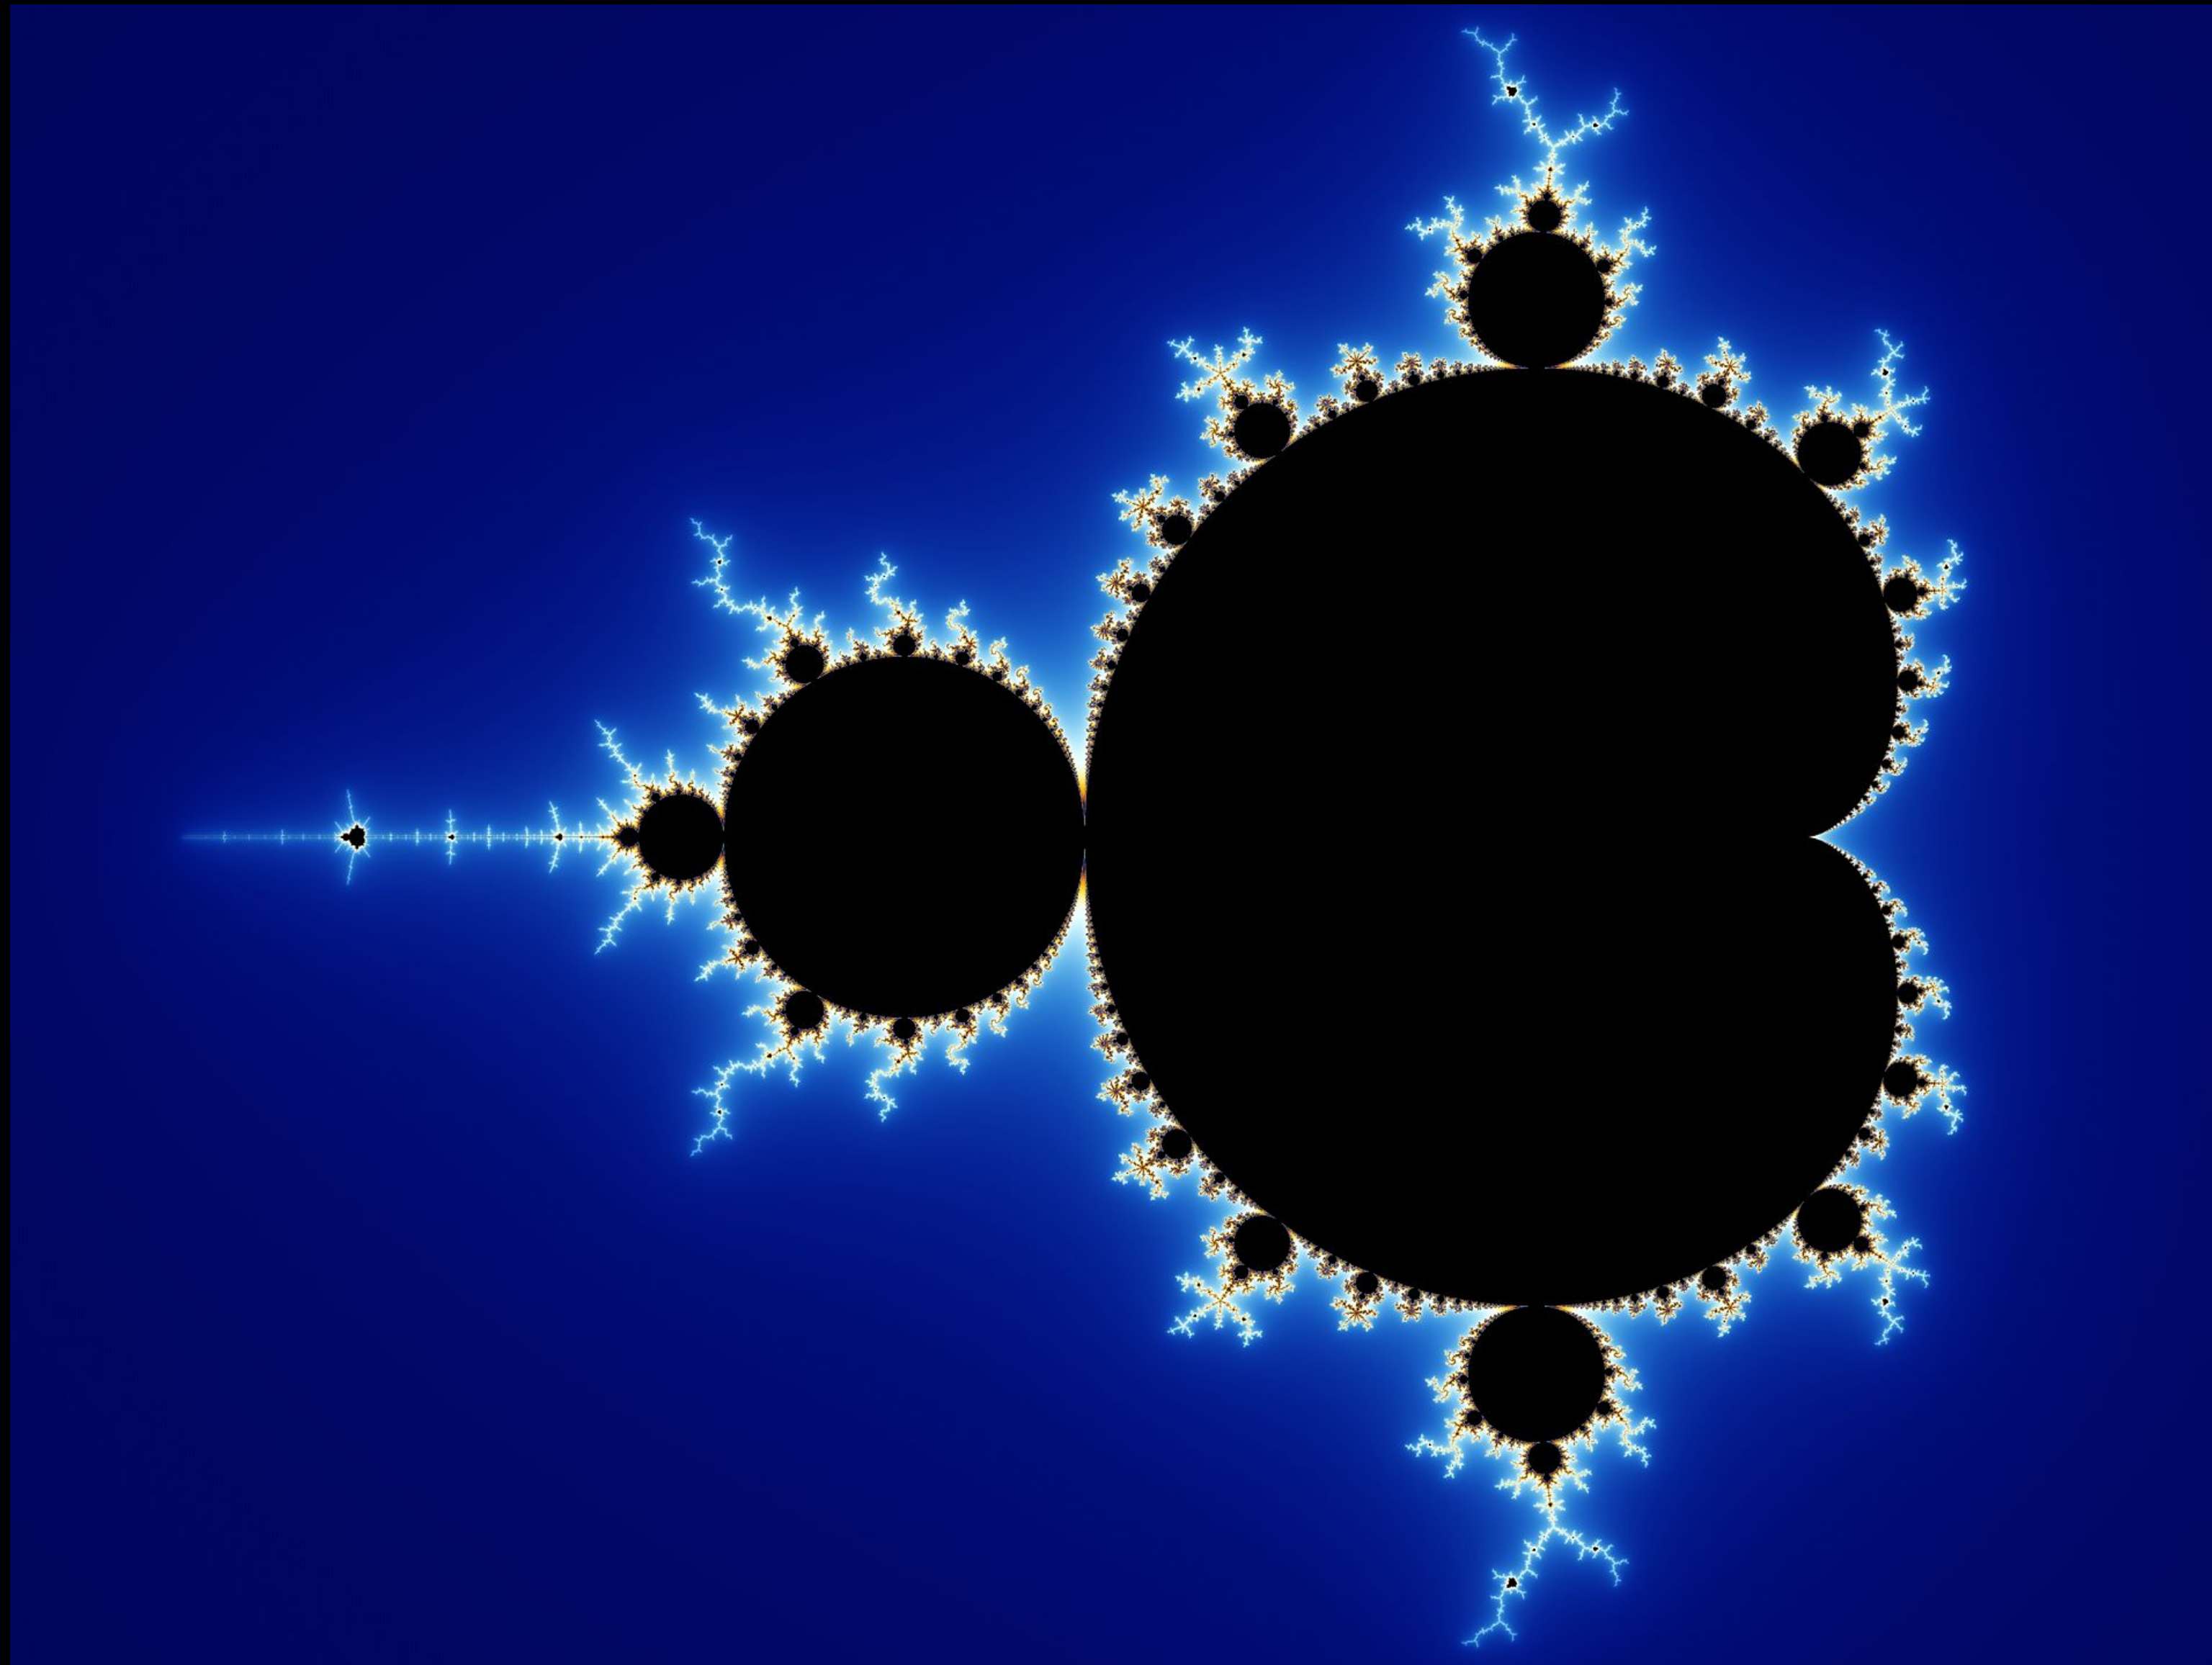

Lightning, cones, waves, shells, snowflakes, frost, crystals

Branches, leaves, vegetable, fruit

Animal skins, horns

In the body - blood vessels, lungs, skin, DNA strands, proteins, veins, pineal gland

Fractals and AI

- **Fractal AI**
A theory of general artificial intelligence that uses cellular automaton-like structures to model information. This theory can derive new mathematical tools and generate a large database of top-performing examples.
- **Self-similarity and recursion**
Many AI systems, like neural networks, break down complex problems into simpler, self-similar structures, similar to fractals.
- **Fractal geometry and data compression**
Fractal mathematics can model complex structures with fewer data points. This can make AI systems faster and less resource-intensive.
- **Fractal dimensions and feature detection**
Fractals can help AI algorithms recognize objects and patterns by detecting natural patterns in images.
- **Training AI with computer-generated fractals**
Researchers in Japan have shown that AIs can learn to recognize everyday objects by being trained on computer-generated fractals.
- **Graph-based Retrieval Augmented Generation (GraphRAG)**
GraphRAG organizes large datasets into structured knowledge graphs, which can enhance the accuracy and precision of fractal research.

Chaos Theory

Fractals, Butterfly Effect, AI

- Chaos theory is an interdisciplinary area of scientific study and branch of mathematics focused on underlying patterns and deterministic laws of dynamic systems that are highly sensitive to initial conditions and were once thought to have completely random states of order and disorder.
- Chaos theory explains that within visible randomness of complex chaotic systems there are inherent repetition, patterns, self organisations, interconnectedness, self similarity and constant feedback loops.

https://en.wikipedia.org/wiki/Chaos_theory

Chaos Theory

- Chaos is the science of surprises, of the nonlinear and the unpredictable. It teaches us to expect the unexpected. Traditional science deals with supposedly predictable phenomena like gravity, electricity, or chemical reactions, **Chaos Theory deals with nonlinear things that are effectively impossible to predict or control, like turbulence, weather, the stock market, our brain states, and so on.**
- These phenomena are often described by fractal mathematics, which captures the infinite complexity of nature. Many natural objects exhibit fractal properties, including landscapes, clouds, trees, organs, rivers etc, and many of the systems in which we live exhibit complex, chaotic behaviour.
- Recognizing the chaotic, fractal nature of our world can give us new insight, power, and wisdom. For example, **by understanding the complex, chaotic dynamics of the atmosphere, a balloon pilot can "steer" a balloon to a desired location.**
- **By understanding** that our ecosystems, our social systems, and our economic systems are interconnected, **we can hope to avoid actions which may end up being detrimental to our long-term well-being.**
- Chaos theory is the field of study in mathematics that studies the behaviour of **dynamic systems that are highly sensitive to initial conditions**—a response popularly referred to as the butterfly effect
- **Small difference in the initial conditions make the biggest difference**
- This happens even though **these systems are deterministic, meaning that their behaviour is fully determined by their initial conditions**
- **The deterministic nature of these systems does not make them predictable**

<https://fractalfoundation.org/resources/what-are-fractals/>

Bifurcation , Feedback, recursion

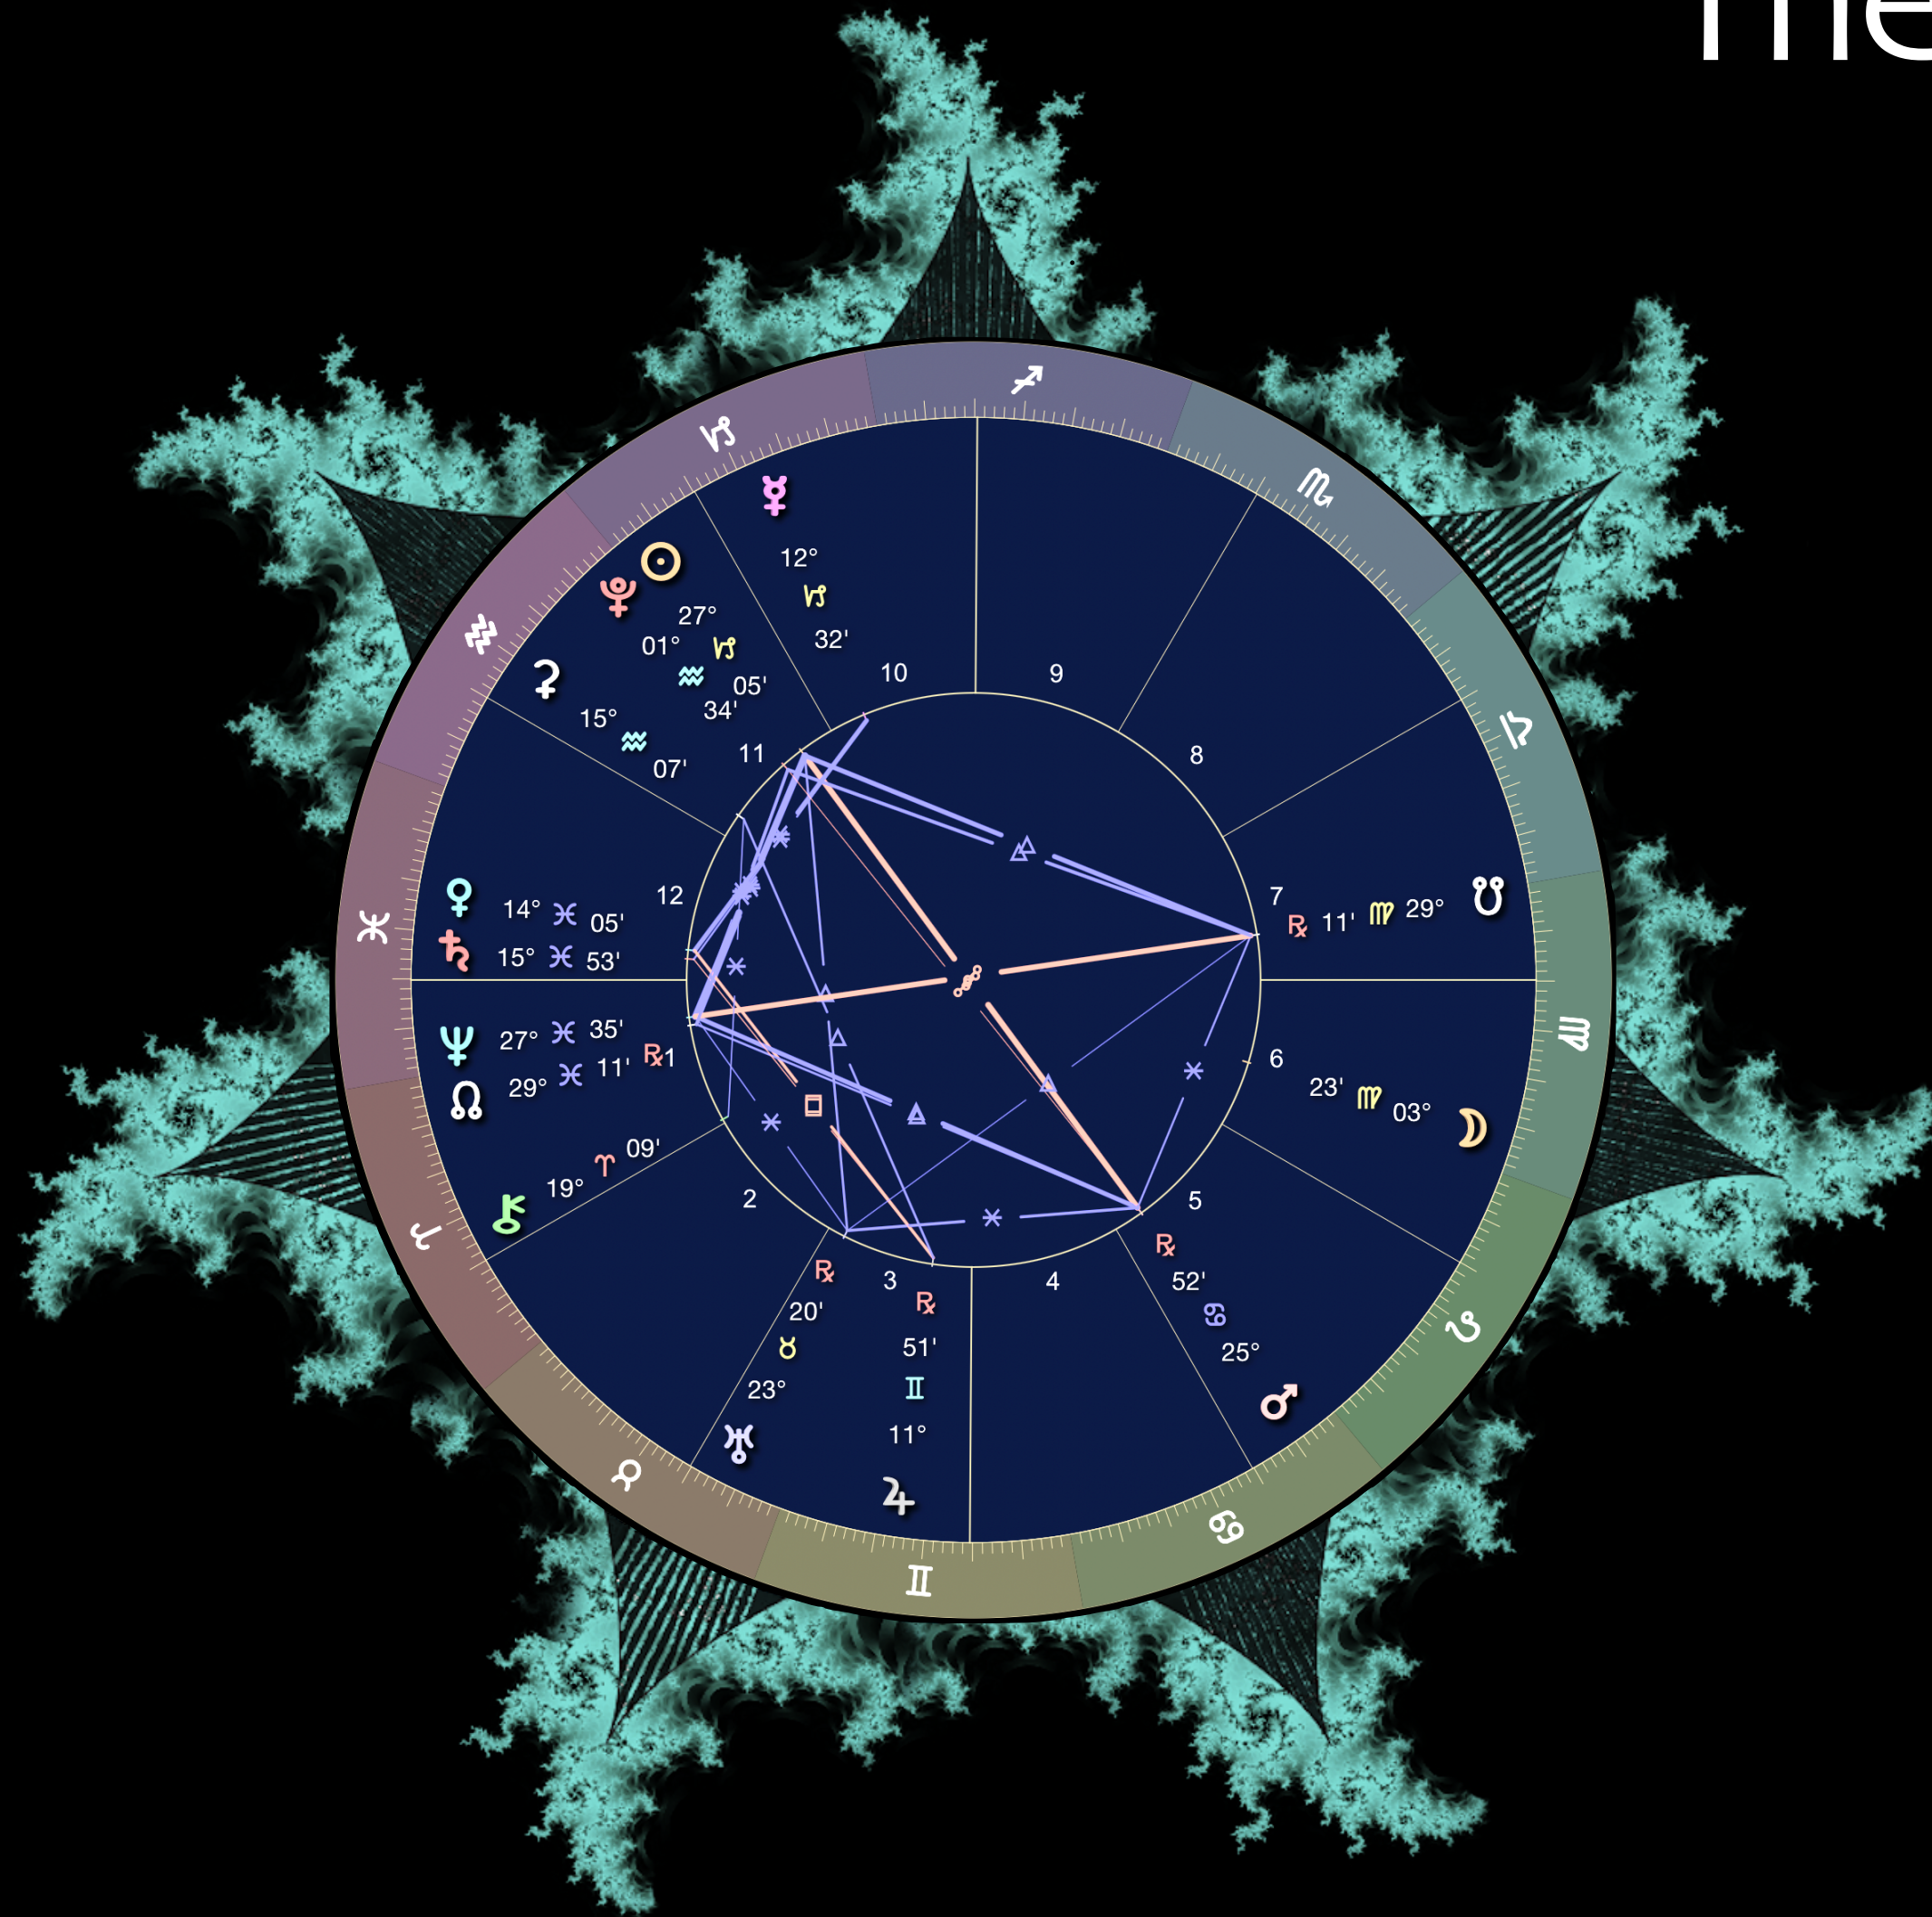

- **Bifurcation theory** is the mathematical study of changes in the qualitative or topological structure of a given family of curves, Most commonly applied to the mathematical study of dynamical systems, a **bifurcation** occurs when a small smooth change made to the parameter values (the bifurcation parameters) of a system causes a sudden 'qualitative' or topological change in its behavior. **Transits, progressions, timing**
https://en.wikipedia.org/wiki/Bifurcation_theory
- **Feedback** occurs when outputs of a system are routed back as inputs as part of a chain of cause-and-effect that forms a circuit or loop.^[1] The system can then be said to feed back into itself. The notion of cause-and-effect has to be handled carefully when applied to feedback systems: **Conscious, Awareness, fears, predictions**
- **Feedback** is a fundamental concept in fractals and chaos theory and the world in general.
- Feedback is what keeps complex systems stable. But - feedback can also cause things to change abruptly and unpredictably! **Patterns, growth, cycles, transformation**
- **Feedback Loop** - human, mental, everyday living, consciousness
positive and negative feedback, **mindfulness of what goes back into the loop with every pattern and growth cycle, every time we engage with astrology and our charts**
<https://en.wikipedia.org/wiki/Feedback>
- **Recursion** - same function reapplied a function being defined is applied within its own definition
eg - making of sourdough, the Ouroboros, Droste effect (images), the Torus
- **Same themes, planetary signatures, repeated, continued**
<https://en.wikipedia.org/wiki/Recursion>

The Fractal nature of Astrology

- Fractals are dynamic systems, so are astrology charts ,
- Never ending patterns - lifetimes past, lifetimes ahead
- An astrology chart, your astrology chart, a radix chart, are the initial conditions
- From initial conditions set at birth
- past, memory, family dynamics, unconscious , past lives environment, family religion, place, all reflect and are stamped into your birth chart
- Fractals follow patterns set by initial conditions
- Patterns repeating, incoming, changing, shifting, Consciousness evolving
- Constant feedback loop in process

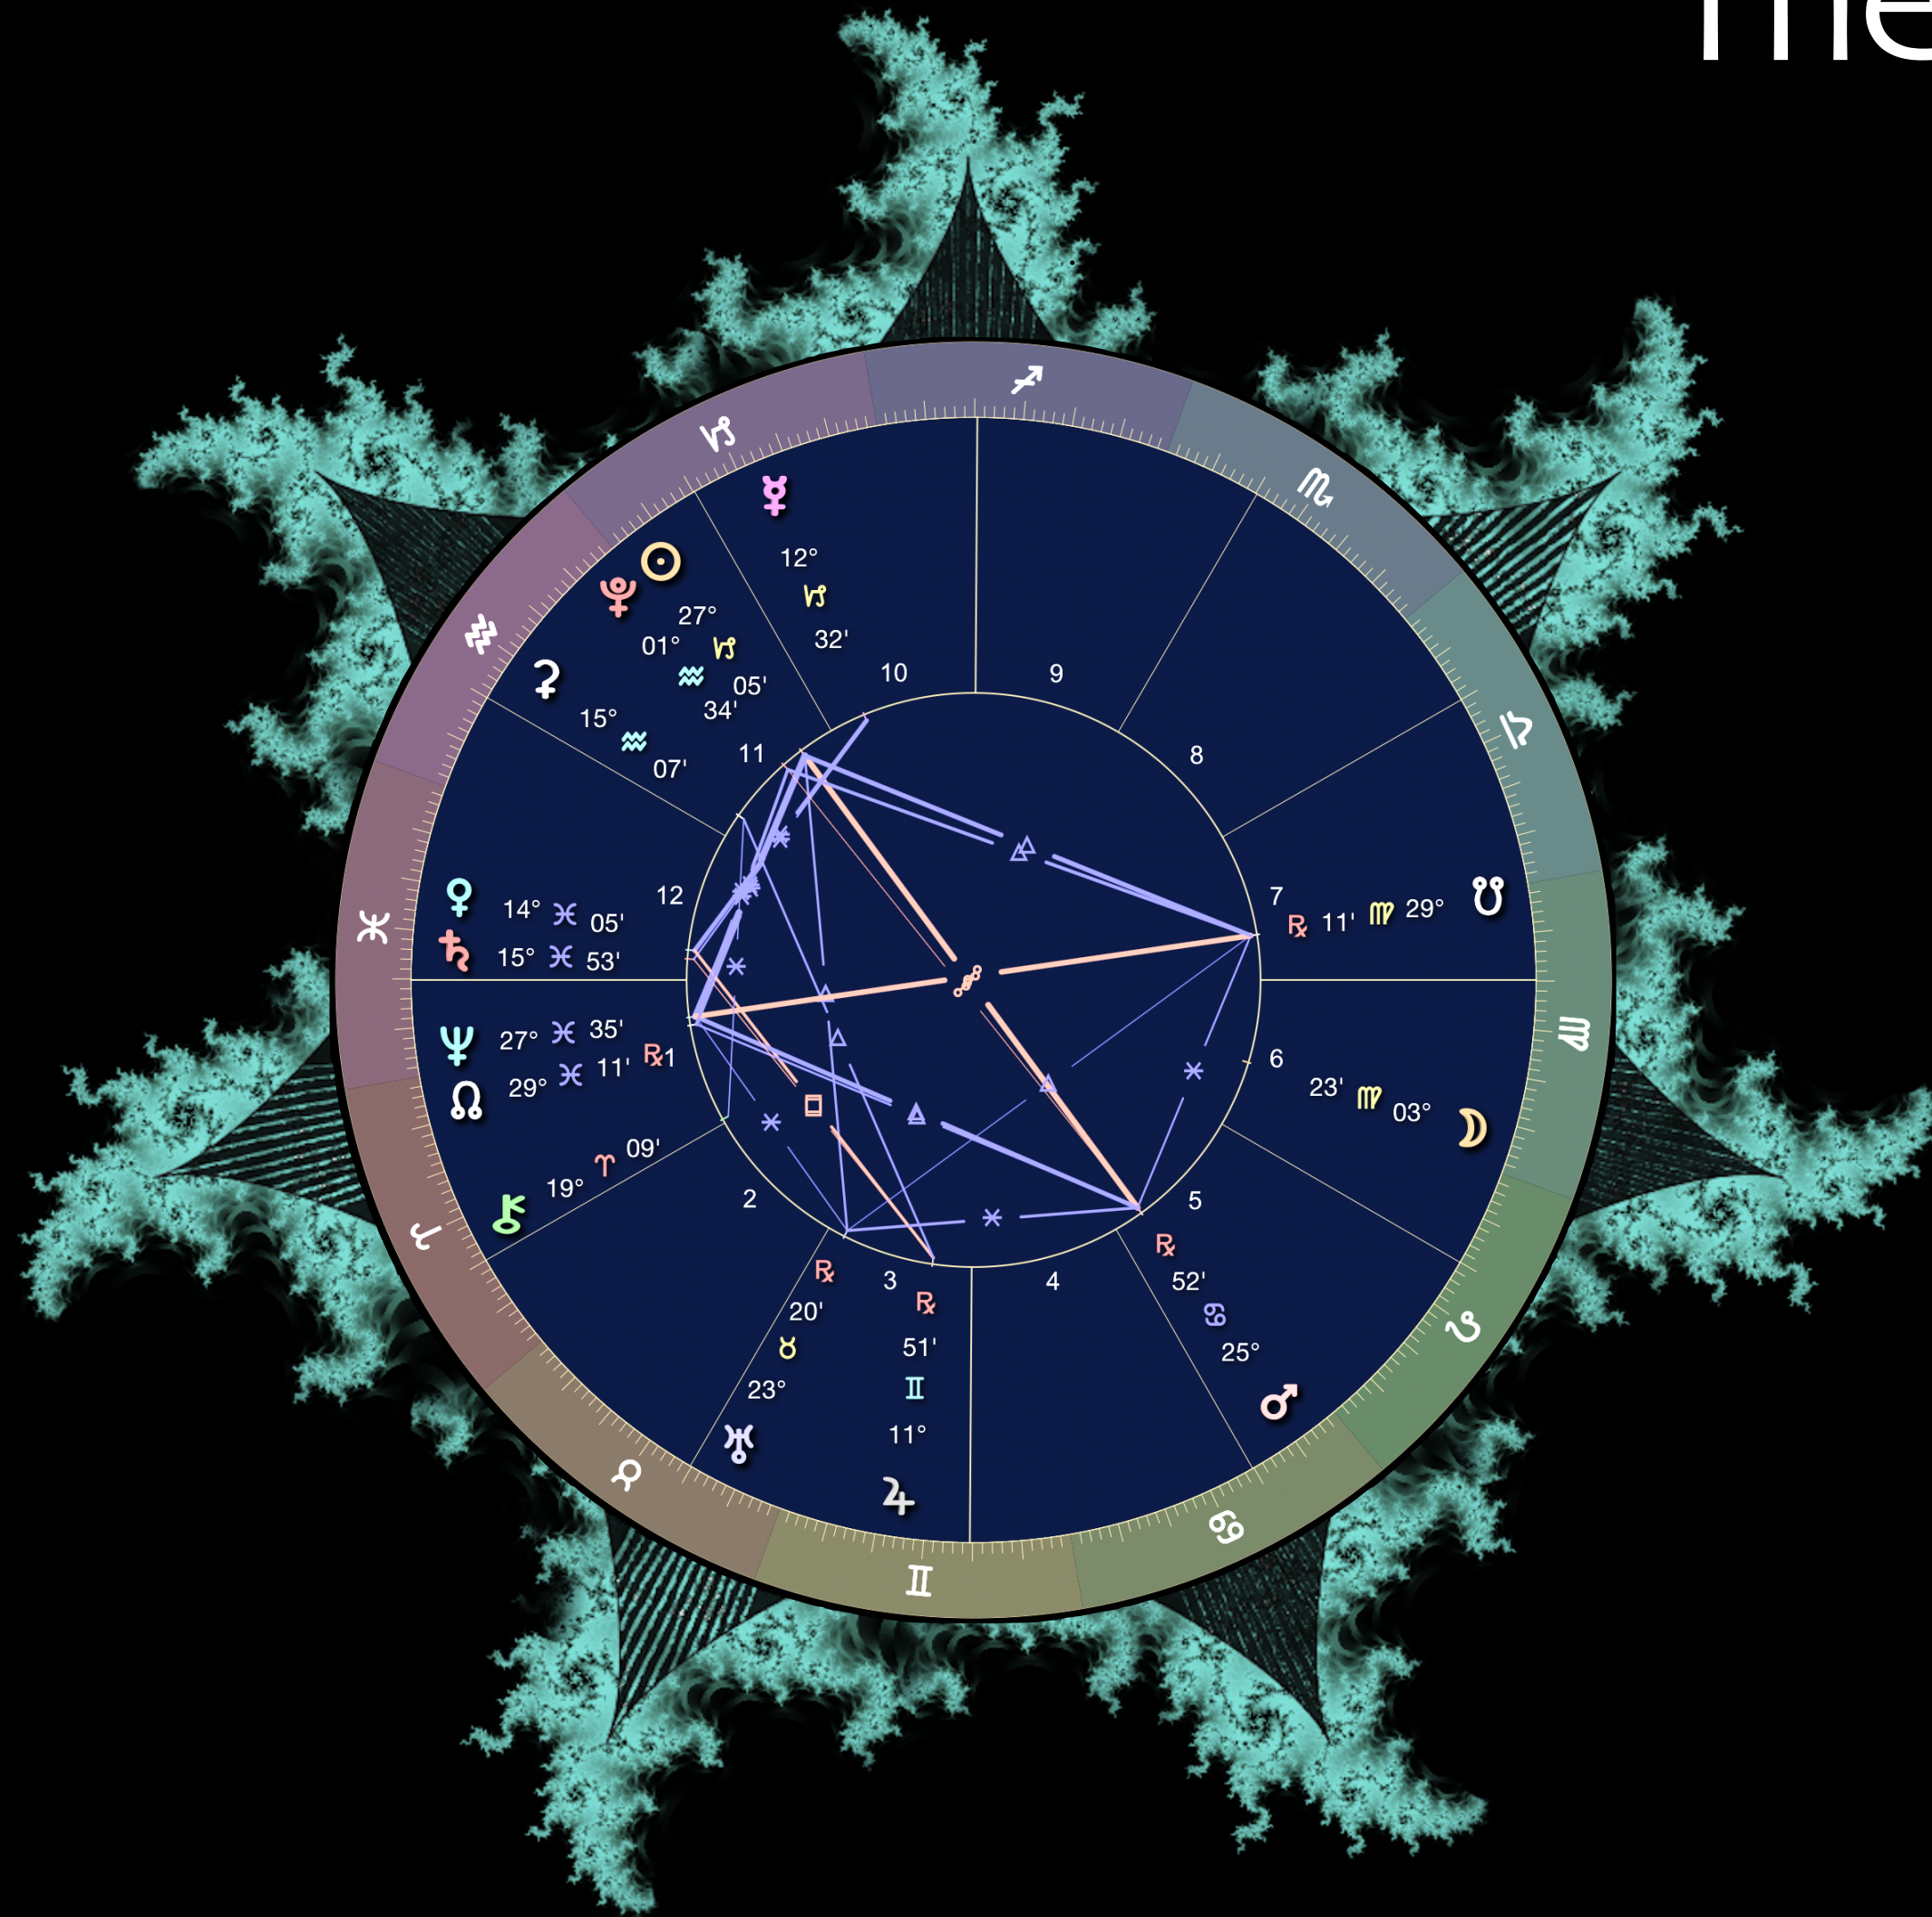

- Fractal nature explains more and more about why astrology works

Feed back Loop

- In psychology, feedback loops refer to the cyclical process through which information or responses from the environment or individuals' own behavior influence their thoughts, emotions, or behaviors. These loops can be either positive or negative.
- Every time we engage with our astrology, we add info into the feedback loop
- Every time we engage with particular aspect of your chart or astrology, we add information into the feedback loop, constantly updating
- Dynamic, engaged, co-creative
- What patterns are we encouraging, creating, fear, traumatized about

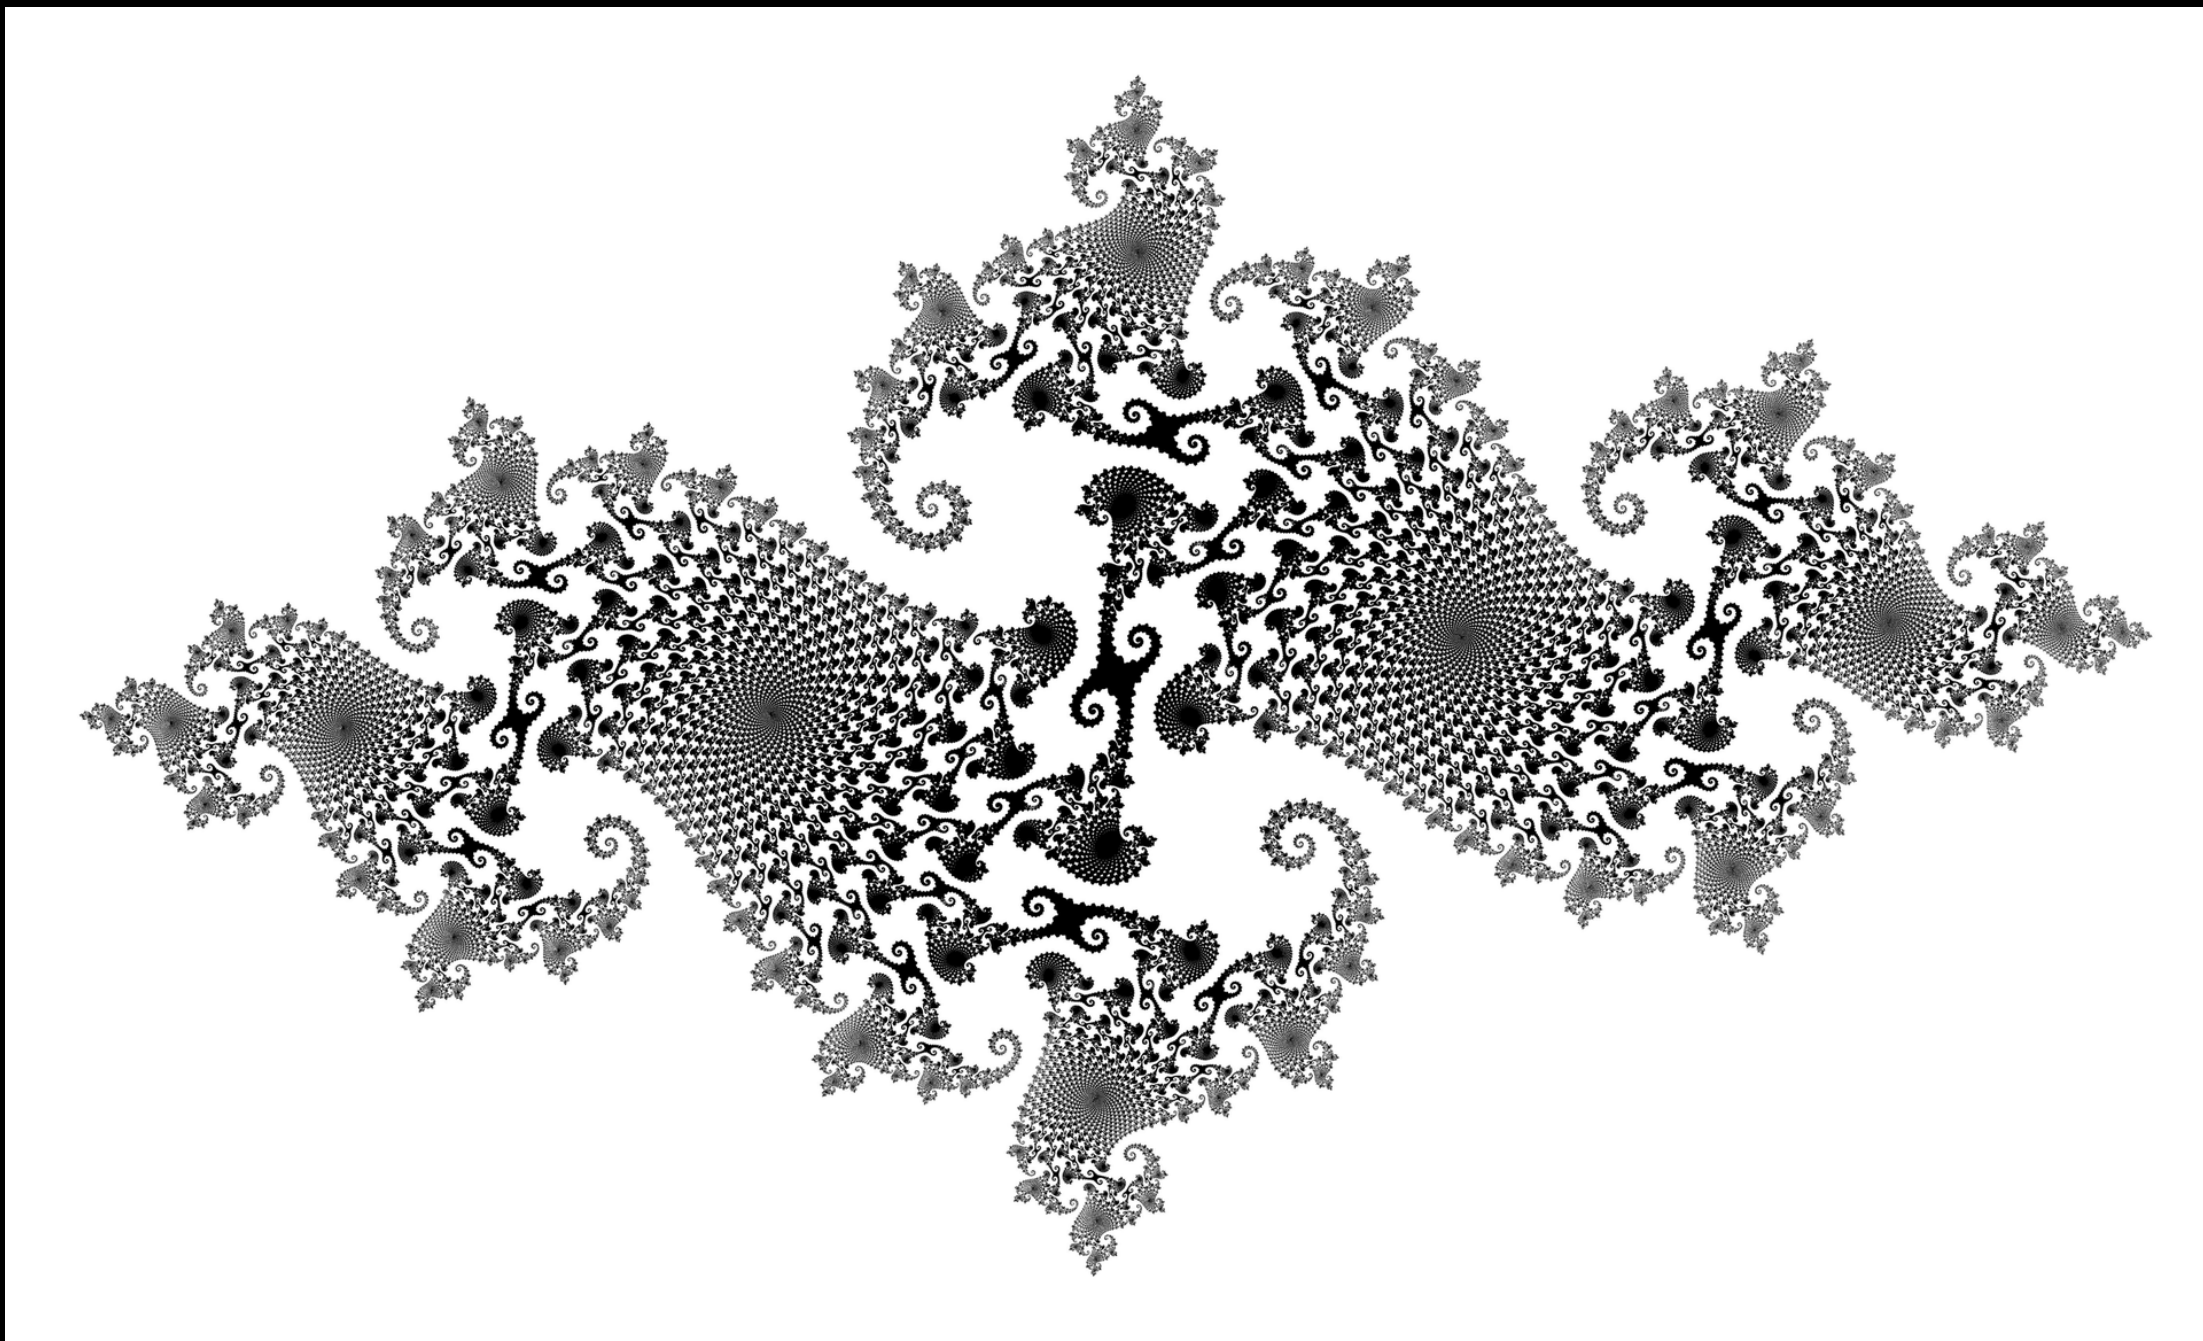

The Fractal nature of Astrology

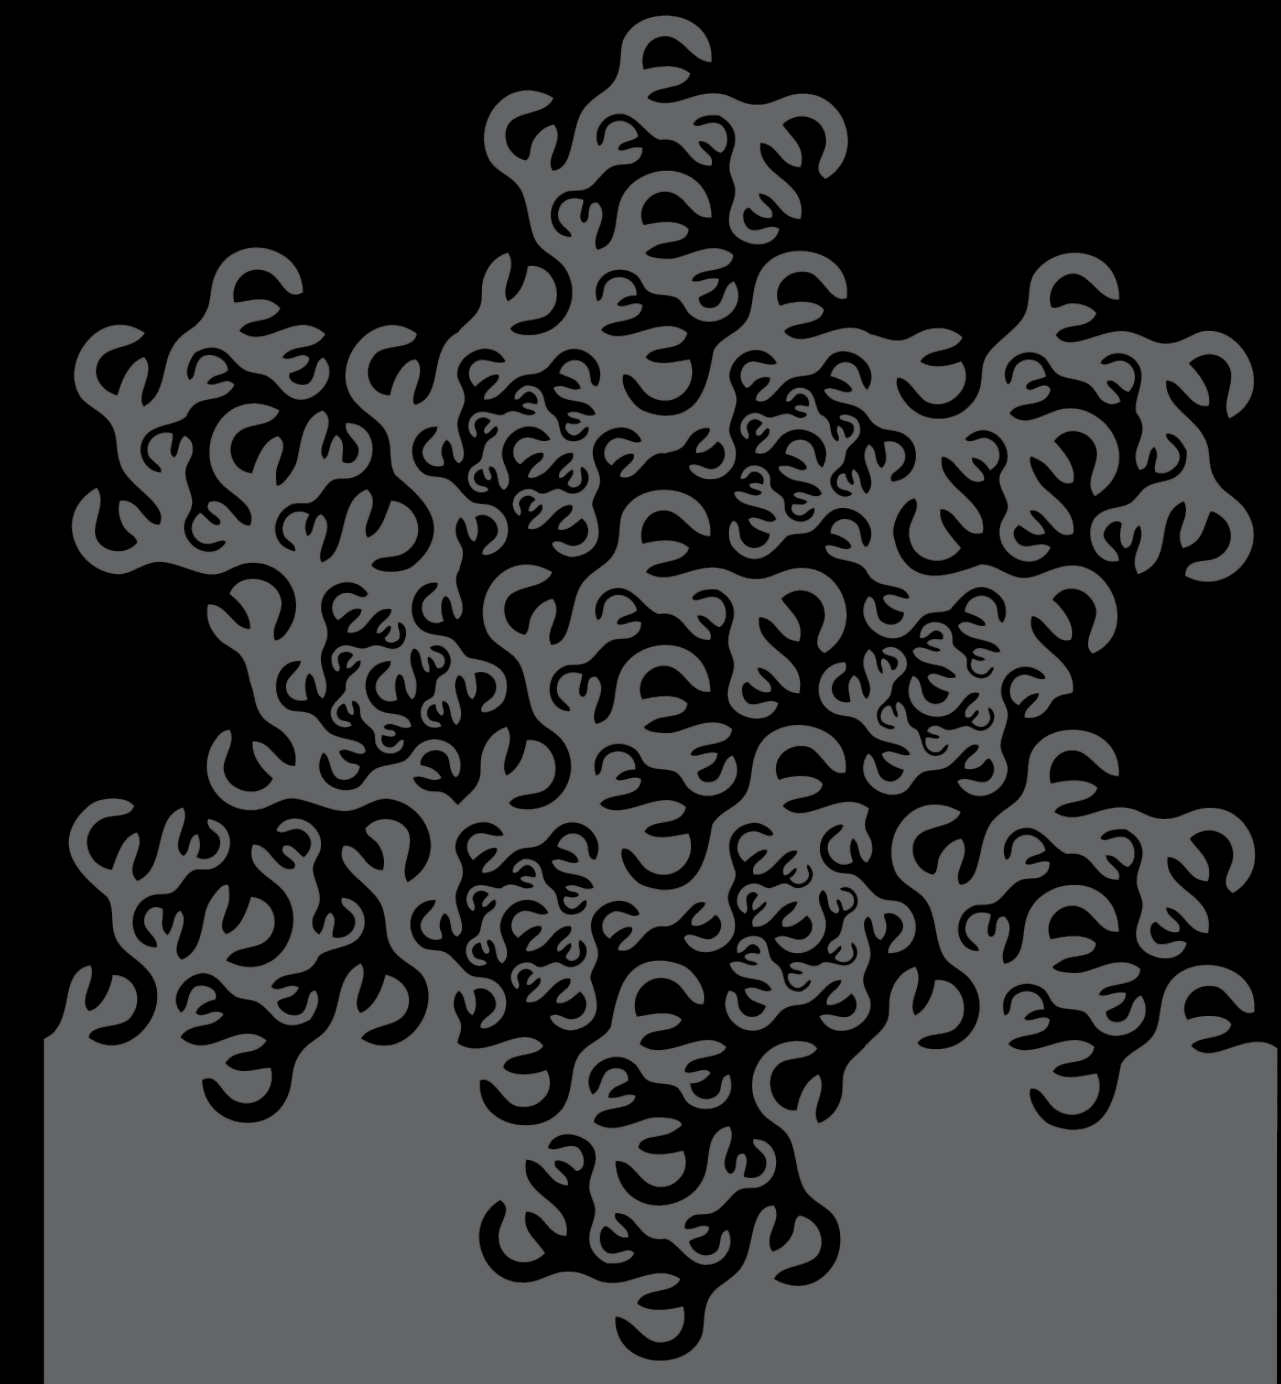

- What would your astrology chart birth fractal pattern look like?
- Imagine the whole pattern, what would it look like - colours, growth, changes
- Each part of the chart connects to so much more, all works together, making its own unique fractal pattern
- Every time you engage in your chart, or any part of it, you are setting off feedback loop, renewed consciousness, understanding, growth, evolution
- Bifurcations points, turning points, new patterns of growth emerge, retain the same initial pattern
- Fractal "rabbit holes"

- Fractal nature explains more and more about why astrology works

Harmonic Astrology

Harmonic horoscopes are based on principles of resonance, like overtones, which are present in every horoscope. The whole zodiac (360°) is taken as the basic tone, representing the number one (1). By using a higher vibration, we can 'cause' the circle to oscillate more quickly, so to speak, and investigate which planets work together in this particular pattern. For example, the fourth harmonic would involve all those planets which share square aspects (90° - division of the circle by four). In the harmonic chart, these planets form conjunctions. The number corresponding to each 'vibration' influences the interpretation.

360 degree circle is divided by the number of the particular harmonic

Edge of Chaos

- Don't isolate one aspect from another, all is connected
- Every cycle is part of a greater cycle
- Don't think of one transit happening on it's own or only once - connect, past, present and future
- Patterns change direction, colours, depth, influence
- Conscious beings, creators of our destiny, and reality
- The initial pattern will never completely change, but be modified, updated, bifurcated
- Some patterns are harder to shift, more layers, more deeply embedded
- WE are creating with each conscious thought - positive/negative
- Consciousness is the feedback loop that keeps informing us - careful what goes back into the feedback loop

Edge of chaos

- Informed by our thoughts, fears, memories, doubts, feelings, beliefs
- Intentions, magical thinking, rituals, mantras, vibrations, energy flow, movement, actions
- Living it, creating at every stage, new patterns of growth, healing
- Order from disorder
- Where the past, the present, and the future come together

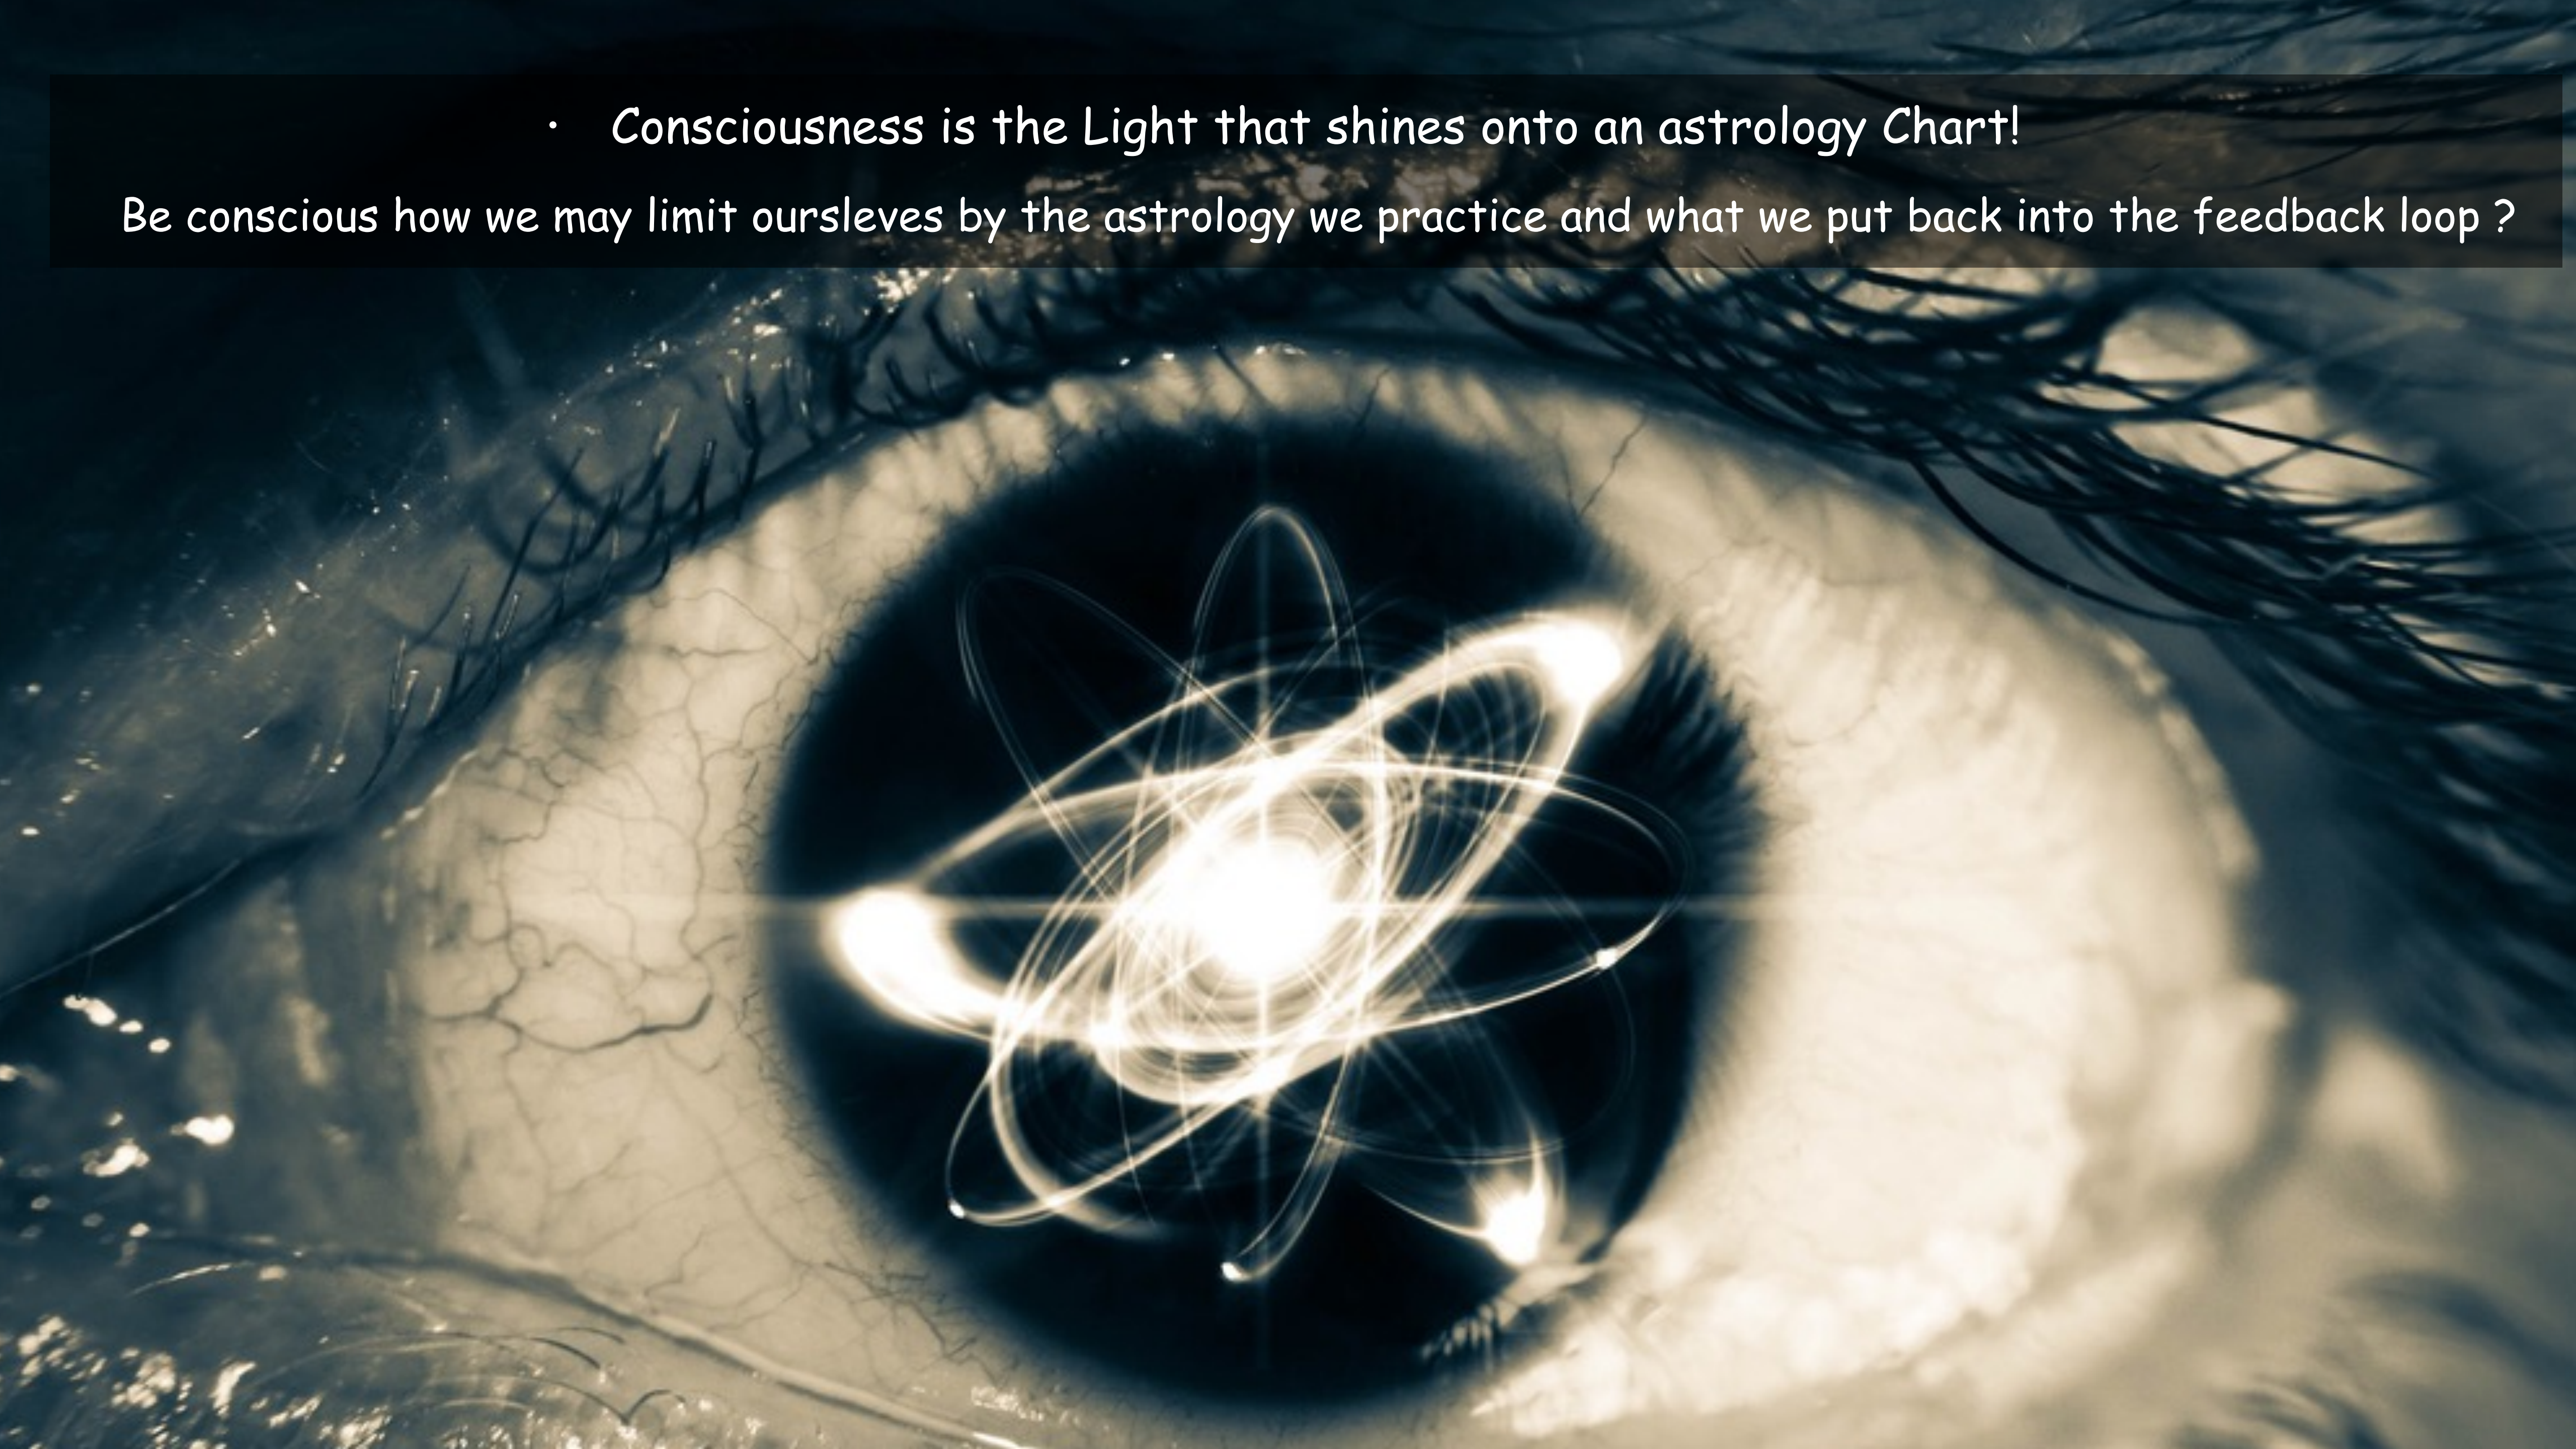

The universe is a fractal. Whatever energy signature we carry will be repeated infinitely, again and again... until we change that vibration.

- Consciousness is the Light that shines onto an astrology Chart!

Be conscious how we may limit ourselves by the astrology we practice and what we put back into the feedback loop ?
